## **HOME IS WHERE THE CHARGE IS !**

Multi-unit Dwelling (MuD) vehicle charging forms the basis for growing electric transportation. Everyone wants to charge at home if they have an electric vehicle. Approximately 40% of the US population (60%+ of San Diego, 70%+ of San Francisco) live in a version of MuD. Until we make MuD charging the TOP priority for infrastructure....then workplace, public access, and DCFC charging will be underutilized resources. Bring this underserved community into the EV marketplace with support for MuD charging...and THEN build additional secondary forms of charging that will be fully utilized. HOME is #1! Let MuD residents consider EVs as an option! Build the market!

*Additional submitted attachment is included below.*
