**SUNRISE POWER PROJECT (98-AFC-04C) AUTHORIZATION OF
REPLACEMENT OF CONTINUOUS EMISSION MONITORING SYSTEM
ANALYZERS**

Dear Mr. Seipel:

On April 28, 2021, the California Energy Commission received an inquiry from the Sunrise Power Company regarding the replacement of the continuous emissions monitoring system (CEMS) analyzers on both turbine units at the Sunrise Power Project. The proposed activities include replacing the computerized CEMS analyzers for both turbines with new updated analyzers. The process also includes testing for certification.

Staff has reviewed the proposed activities and determined that the activities are not subject to Title 20, California Code of Regulations, section 1769, and therefore do not require approval of a post-certification petition. This is because the proposed activities will not change the project design, operation, or performance requirements in the Final Commission Decision.

These activities do not require Delegate Chief Building Official (DCBO) oversight for plan review or inspections. The project owner is expected to adhere to all applicable Conditions of Certification in the Final Commission Decision, or as amended.

You are hereby authorized to proceed with your activities as outlined above. Should the scope of the above noted activities change, please contact us as this may change our decision that the activities do not require approval of a post-certification petition.

Mr. Scott Seipel
