Oppose Calpine application for power plant modification and restart

I work at Repco located at 23595 Cabot Blvd #112, we are kitty corner to the Hayward Navigation Center. I am very concerned that this plant should not reopen until a full investigation is complete on why this incident happened. Since the explosion caused debris to flew everywhere it is possible that we could be injured or killed. I encourage a full inspection be completed and safety measure put in place, before this plant is reopened. Respectfully yours Yvonne DeBone
