IN THE MATTER OF:
Midterm Reliability Modeling

Docket No. 21-ESR-01
NOTICE OF REMOTE-ACCESS WORKSHOP
RE: Midterm Reliability Modeling

Notice of Staff Informational Workshop on Midterm Reliability Modeling
Thursday, September 23, 2021
9:30 a.m.
Remote Access Only

The California Energy Commission (CEC) will host a follow-on workshop to provide additional information on the Midterm Reliability Analysis modeling for the years 2022-2026, and provide stakeholders another opportunity to ask questions on the method and results. The Midterm Reliability Analysis is being referenced in the California Public Utilities Commission’s (CPUC) integrated resource planning proceeding to help inform a decision on the CPUC’s preferred system plan expected later this year. A quorum of commissioners may participate, but no votes will be taken.

The workshop will be held remotely, consistent with Executive Orders N-08-21 to continue to help California respond to, recover from, and mitigate the impacts of the COVID-19 pandemic. The public can participate in the workshop consistent with the direction in the executive order.

Agenda
CEC staff will present the approach, assumptions, and preliminary results of the Midterm Reliability Analysis, which covers the years 2022–2026. Stakeholders will have multiple opportunities to ask questions about the analysis and the results. There will be designated time for public comment, though due to timing, comments may not be addressed in the current analysis. All comments will be considered as staff develop future iterations and improvements to the CEC’s electricity supply system reliability modeling.

Background
In response to identified resource needs, in part, driven by retiring once-through-cooling natural gas power plants and the Diablo Canyon Power Plant, the CPUC is pursuing additional procurement by all load-serving entities for 2023 through 2026. In the CPUC’s Decision 21-06-035 issued June
24, 2021, the CPUC indicated additional quantitative and qualitative analysis that it will perform in coordination with the CEC to help inform the preferred system plan decision expected later this year. This workshop will provide additional details about the Midterm Reliability Analysis, which uses data available on supply resources and projected demand and explores the probability of system outages.

Initial results for the Midterm Reliability Analysis were presented at an August 30, 2021, workshop, Presentation for August 30 Lead Commissioner Workshop on Midterm Reliability Analysis [https://efiling.energy.ca.gov/GetDocument.aspx?tn=239554&DocumentContentId=72991].

This workshop will provide additional details on the inputs, assumptions, method, and results of the Midterm Reliability Analysis, while providing stakeholders additional opportunities to ask questions on the study.

Remote Attendance
The workshop may be accessed by clicking the Zoom link below or visiting Zoom at https://join.zoom.us and entering the Workshop ID 924 0126 8026 and password 801558 for the workshop listed below. If you experience difficulties joining, contact Zoom at (888) 799-9666 ext. 2 or the Public Advisor's Office at publicadvisor@energy.ca.gov, at (916) 654-4489 or toll-free at (800) 822-6228.

Link to Workshop: Informational Midterm Reliability Modeling
Workshop ID: 924 0126 8026
Password: 801558

Use the “raise hand feature” to indicate you want to speak and the event facilitator will indicate when your line is open and ready for you to make comment.

To Participate by Telephone, dial toll-free at (888) 475-4499 or (669) 219-2599. When prompted, enter the Workshop ID: 924 0126 8026. To comment, dial *9 to “raise your hand” and *6 to mute/unmute your phone line.

Public Comment
Oral comments will be accepted at the end of the workshop. Comments may be limited to three minutes or less per speaker and one person per organization. If participating via Zoom’s online platform, use the “raise hand” feature so the administrator can announce your name and unmute you. If you are participating by telephone, press *9 to “raise your hand” and *6 to mute/unmute.

Written comments must be submitted to the Docket Unit by 5:00 p.m. on October 4, 2021. Written and oral comments, attachments, and associated contact information (including address, phone number, and email address) will become part of the public record of this proceeding with access available via any internet search engine.
The CEC encourages use of its electronic commenting system. Visit the e-commenting page at https://efiling.energy.ca.gov/Ecomment/Ecomment.aspx?docketnumber=21-ESR-01, which links to the comment page for this docket. Enter your contact information and a comment title describing the subject of your comment(s). Comments may be included in the “Comment Text” box or attached as a downloadable, searchable document in Microsoft® Word or Adobe® Acrobat®. The maximum file size allowed is 10 MB.

Written comments may be submitted by email. Include docket number 21-ESR-01 and Informational Midterm Reliability Modeling in the subject line and email to docket@energy.ca.gov.

A paper copy may be sent to:

Sacramento, California 95814

Public Advisor and Other CEC Contacts
The CEC’s Public Advisor’s Office provides the public with assistance in participating in CEC proceedings. For information on participation or to request interpreting services or reasonable accommodations reach out via email at publicadvisor@energy.ca.gov, by phone at (916) 654-4489, or toll free at (800) 822-6228. Requests for interpreting services and reasonable accommodations should be made at least five days in advance. The CEC will work diligently to accommodate all requests.

Direct media inquiries to mediaoffice@energy.ca.gov or (916) 654-4989.

Direct technical subject inquiries and general inquiries to Mark Kootstra at mark.kootstra@energy.ca.gov or (916) 931-8984.

Availability of Documents

When new information is posted, an email will be sent to the list servers provided at the bottom of this notice. Manage existing list servers or sign up for others at CEC List Servers, at https://ww2.energy.ca.gov/listservers/index_cms.html.
