4) CEC Commissioner Gunda's office provides update about Governor's Emergency Proclamation

Discussion / Member Comments

- What efforts will be undertaken to mitigate air quality impacts from gas and diesel temp gen? Would like an update at a future meeting.
- Good opportunity to focus on investments in zero emission technologies rather than just incremental improvements. Noting that this issue seems to recur every summer, and that we should be talking about it and planning our response year-round.
- Important to consider all of the available capacity – double down on analysis and make sure everything is accounted for. Don't want this to turn into an excuse to put more fossil fuels out there.

5) CPUC staff provides update about GO 156 supplier diversity efforts

Discussion / Member Comments

- CPUC can coordinate with CEC and CalSEED to identify diverse companies or entrepreneurs that might be a good fit for contracting opportunities
- SJV proceeding discussed job creation opportunities, refer to those discussions and to the Community Energy Navigators for ideas specific to the Central Valley.
- Least cost best fit model for contracting can be a barrier to creating equitable opportunities in areas like the SJV
- Current reporting doesn't sufficiently cover construction of new renewable projects, where there's a lot of potential for developers to contract with diverse construction-related firms, because it happens before the project's commercial online date. Potentially missed opportunity to further emphasize the importance of supplier diversity with renewable developers.

6) CPUC staff presents Distributed Energy Resources Action Plan (comment deadline is 10/8/2021)

Discussion / Member Comments

- DACAG needs to think about how to engage in more detail with the action plan which crosses different DACAG priority issues. Lots of opportunities for members to engage on many aspects of the Action Plan.
- Question about what outreach and engagement CPUC is undertaking with stakeholders who are not part of the typical regulatory processes (CBOs, etc.) to provide an overview and get feedback
- Question about how the ESJ action plan principles will show up in the DER action plan itself – specific goals and actions? How will equity outcomes be evaluated?
- Question about whether and how the action plan will address access gaps re: DERs in ESJ communities?
- Some of the Action Plan’s goals may encounter barriers that are outside of the CPUC’s jurisdiction, such as the upfront costs of DERs. CPUC should make recommendations where it identifies barriers that require a legislative solution, for example.

7) DACAG reviews and approves 2020 DACAG Annual Report
