NOTICE OF REMOTE-ACCESS  
WORKSHOP

RE: Charger Communications and  
Interoperability Proposal

Notice of  
**ISO 15118 Charger Communications and Interoperability Workshop**  
**November 10, 2021**  
9:00 a.m. – 12:00 p.m. Pacific  
**Remote Access Only**

The California Energy Commission (CEC) will host a workshop to discuss charger communications and interoperability for its future charger investments, specifically the examination of International Organization for Standardization (ISO) 15118.

The workshop will be held remotely, consistent with Assembly Bill 361 (Rivas, Chapter 165, Statutes of 2021) to improve and enhance public access to state agency processes during the COVID-19 pandemic by allowing broader access through teleconferencing options. The public can participate in the workshop consistent with the direction provided below. Please note that the CEC aims to begin promptly at the start time posted and the end time is an estimate based on the agenda proposed. The workshop may end sooner or later than the posted end time depending on various factors.

**Agenda**

Staff will provide an overview of a proposal that transitions future CEC charger investments toward chargers that are capable of communication using the ISO 15118 standard. Additionally, staff will convene industry stakeholders to discuss current and planned implementation of ISO 15118 in product offerings.

Prior to the workshop, a detailed agenda will be posted to the [CEC 19-AB-2127 docket](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=19-AB-2127) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=19-AB-2127>.

## **Background**

The Assembly Bill 2127 *Electric Vehicle Charging Infrastructure Assessment* identified the ISO 15118 standard as a promising pathway for charger-vehicle communication. Further, the report found that ISO 15118 has the capability to support an easier-than-gas charging experience for drivers and grid-integration functions. Based on stakeholder interest in this topic and the potential capabilities of ISO 15118, CEC staff have developed a proposal to support deployment of ISO 15118-ready charging equipment.
