RE: AMENDED CARLSBAD ENERGY CENTER PROJECT, DOCKET NO. 07-

AFC-06C, DEMOLITION OF ENCINA POWER STATION

CONDITION OF CERTIFICATION, COM-6

SEPTEMBER 2021, MONTHLY COMPLIANCE REPORT

Dear Dr. Ali:

Cabrillo Power I, LLC ("Project Owner") submits the September 2021 Monthly Compliance Report (MCR) in compliance with the AFC Docket No. 07-AFC-06C, Conditions of Certification (COCs) COM-6 for the Amended Carlsbad Energy Center Project (ACECP) located at 4600 Carlsbad Boulevard, Carlsbad, California.

During the month of September 2021, demolition activities included the following: interior asbestos abatement, removal of numerous facility structures and equipment within the powerblock building, and torch cutting of equipment (structural components piping, etc.).

Completion of demolition activities is targeted for April 2022 per the revised project schedule.

If you have any questions or comments, please do not hesitate to contact me at (760) 707-6833.

Sincerely,

George L. Piantka, PE

Sr. Director, Regulatory Environmental Services

NRG Energy, Inc.

I. Summary

This Monthly Compliance Report (MCR) focuses on Phase IV of the Amended Carlsbad Energy Center Project (i.e., demolition of Encina Power Station) as Phases I-III - pre-construction and construction/operations phases of ACECP and decommissioning of Encina Power Station - have been completed. MCRs documenting those phases of work can be found in Compliance Proceedings for the Carlsbad Energy Center Project (docket number 07-AFC-06C).

a. Demolition Status

Phase III (decommissioning) activities began December 11, 2018 with the retirement of the Encina Power Station; decommissioning was completed by Cabrillo Power I LLC (owner of Encina Power Station) in December 2019. The Project Owner completed all compliance activities and COC submittals necessary to achieve Phase IV, Start of Demolition, in December 2019. Demolition preparation was conducted December 2019 through January 2020; abatement and demolition began on January 29, 2020.

Due to the COVID-19 pandemic and the California State of Emergency, demolition activities were suspended from March 20, 2020 until July 5, 2020. Demolition-related equipment and materials were placed in a safe-condition and storm water best management practices were confirmed by on-site personnel during the suspension of demolition activities.

Demolition activities recommenced during the week of July 6-10, 2020 with limited remobilization during which staff were re-orientated to the site and the scope of work, and safety trained.

Full-scale demolition activities during September 2021 included the following: interior asbestos abatement, removal of numerous facility structures and equipment within the powerblock building, and torch cutting of equipment (structural components, piping, etc.).

b. Revised/Updated Schedule

Per COC COM-5, the Compliance Matrix and COC deliverables are provided in Attachment A. Attachment B provides a schedule of project milestones for demolition, remediation, and construction.

c. Explanation of Significant Permitting Activities and Changes to Schedule (as applicable)

Neither significant permitting activities pertaining to Phase IV nor changes to schedule have occurred since the CEC's approval of ACECP in 2015. The City of Carlsbad approved a 9-month extension to Phase IV via a City Resolution in December 2019. While we anticipate completing Phase IV by second quarter of 2022, the extension allows completion by third quarter of 2022.

The updated project schedule is provided in Attachment B.

II. List of documents submitted to meet specific conditions

- a. AQ-SC2: Air Quality Demolition Mitigation Plan
- b. AQ-SC3: Construction Fugitive Dust Control Air Quality Compliance Monthly Report.
- c. AQ-SC4: Dust Plume Response Requirement Air Quality Compliance Monthly Report.
- d. AQ-SC5: Diesel-Fueled Engine Control Air Quality Compliance Monthly Report.
- e. GEN-1: CBO Notice
- f. NOISE-1: Community Mailer and Noise Complaint Hotline Number
- g. NOISE-3: Noise Control Program
- h. SOIL&WATER-2: Non-Potable Construction Water Use Plan
 - i. SOIL&WATER-2&6: Construction water usage summary.
- i. SOIL&WATER-4&9: SDRWQCB email dated 11/22/2019
- j. SOIL&WATER-9: Wastewater disposal summary
- k. TRANS-1: Demolition Traffic Control Plan
- I. TRANS-7: Demolition Parking and Staging Plan

- m. WASTE-5: Demolition Waste Management Plan
- n. WORKER SAFETY-1: Demolition Safety and Health Program
- o. WORKER SAFETY-3: Construction Safety Supervisor monthly report
- p. WORKER SAFETY-4: CBO Safety Monitor monthly report
- q. WASTE-6: Asbestos Notification Form to San Diego Air Pollution Control District Email dated 6/29/2020 (5th Revision Notice)

III. Updated Compliance Matrices

The Compliance Matrix updated to reflect the ACECP is included in Attachment A.

IV. List of conditions satisfied during reporting period including reference to actions which satisfied certification

Air Quality: AQ-SC3, AQ-SC4, and AQ-SC5 - Air Quality Construction Compliance inspections and report. See Attachment C.

Biological Resources: BIO-5, BIO-6, BIO-7, and BIO-8 – Biological Resources Compliance inspections and report. See Attachment D.

NOISE-2/COM-11: Noise hotline log and complaint resolution process. See Attachment G.

WORKER SAFETY-3: Construction Safety Supervisor Monthly Report. See Attachment O.

WORKER SAFETY-4: CBO Safety Monitor Inspection Monthly Report. See Attachment P.

COM-13: Incident Reporting Requirements. See Attachment R.

V. List of submittal deadlines missed during reporting period including explanation and estimate of when information will be provided

None

VI. Cumulative list of approved changes to conditions of certification

The California Energy Commission approved changes to the COCs on August 3, 2015. An updated compliance matrix with amended COCs for demolition is provided in Attachment A.

VII. List of any filings with, or permits issued by, other governmental agencies during the month

None

VIII. Project compliance activities over next two months including changes to schedule

The Project Owner will make the following compliance filings, as needed, over the next two months:

- a. AQ-SC1: Air Quality Construction Mitigation Manager (AQCMM) will implement the monitoring and reporting requirements of AQ-SC2, AQ-SC3, AQ-SC4, and AQ-SC5.
- b. BIO-5: Worker Environmental Awareness Plan training (if required)
- c. BIO-6: Monitoring and reporting as required per the BRMIMP.
- d. COM-6: Submit Monthly Compliance Reports.
- e. SOIL&WATER-2: Water usage summary.
- f. TRANS-5: Inspection reports on roadway conditions. (if required)
- g. TRANS-6: Provide summary of overweight or oversized vehicle permits as needed. (*if required*)
- h. TRANS-8: Provide a summary of encroachment permits obtained or utilized during the reporting month. (*if required*)
- i. WASTE-1: Submit correspondence with San Diego County Department of Environmental Health as needed.
- j. WORKER SAFETY-5: As needed worker training on Automated. External Defibrillator (AED) locations.
- k. COM-11: Complaints requiring notifications and reporting will be submitted to CPM
- I. COM-13: Incidents requiring notifications and reporting will be submitted to CPM

IX. Additions to on-site compliance file

Files are maintained onsite on a regular basis as COCs are implemented.

X. List of complaints, notices of violation, official warnings, citations received during month, description of resolutions of any resolved complaints and status of any unresolved complaints

No violations, official warnings, or citations related to the demolition of the Encina Power Station were received in September 2021. A summary table of calls and complaints logged and responded to are included, as applicable, in Attachment G.

ATTACHMENT A

COMPLIANCE-5 AND COMPLIANCE-6 KEY EVENTS AND COMPLIANCE MATRIX SEPTEMBER 2021

| TECHINAL NAME | COC Number | Subtask | Condition Type | Deliverable Req. | Description | Comments | Date Submitted | Dated Approved by CEC |
|---------------|---------------|---------|---------------------|------------------|--|--|--|-----------------------|
| AQ-SC | 1 | | Air Quality Manager | | Air Quality Construction/Demolition Mitigation Manager (AQCMM): The project owner shall designate and retain an on-site AQCMM who shall be responsible for directing and documenting compliance with conditions AQ-SC3, AQ-SC4, and AQ-SC5 for the entire project site and linear facility construction/demolition. The on-site AQCMM may delegate responsibilities to one or more AQCMM Delegates. The AQCMM and AQCMM Delegates shall have full access to all areas of construction on the project site and linear facilities and shall have the authority to stop any or all construction/demolition activities as warranted by applicable construction/demolition mitigation conditions. The AQCMM and AQCMM Delegates may have other responsibilities in addition to those described in this condition. The AQCMM shall not be terminated without written consent of the Compliance Project Manager (CPM). | | 8/26/2019 | 9/20/2019 |
| AQ-SC | 2 | | Air Quality Plan | | Air Quality Construction/Demolition Mitigation Plan (AQCMP): The project owner shall provide an AQCMP, for approval, which details the steps that will be taken and the reporting requirements necessary to ensure compliance with conditions AQ-SC3, AQ-SC4, and AQ-SC5. | Submitted to CEC on 10/16/19. Resubmitted with updates per CEC request 12/28/19. Docketed by CEC on 1/2/2020 | 10/16/2019, resubmitted 12/28/19 | 1/2/2020 |
| AQ-SC | 3 | a | Air Quality Plan | | Construction Fugitive Dust Control: The AQCMM shall submit documentation to the CPM in each Monthly Compliance Report (MCR) that demonstrates compliance with the following mitigation measures for the purposes of preventing all fugitive dust plumes from leaving the project site and linear facility routes. Any deviation from the following mitigation measures shall require prior CPM notification and approval. A. All unpaved roads and disturbed areas in the project and laydown construction/demolition sites shall be watered as frequently as necessary to comply with the dust mitigation objectives of AQ-SC4. The frequency of watering may be reduced or eliminated during periods of precipitation. B. No vehicle shall exceed 10 miles per hour on unpaved areas within the project and laydown construction/demolition sites. C. The construction/demolition equipment vehicle tires shall be inspected and washed as necessary to be cleaned and free of dirt prior to entering paved roadways. E. Gravel ramps of at least 20 feet in length must be provided at the tire washing/cleaning station. F. All unpaved exits from the construction/demolition site shall be graveled or treated to prevent track-out to public roadways. G. All construction/demolition vehicles shall enter the construction/demolition site through the treated entrance roadways, unless an alternative route has been submitted to and approved by the CPM. H. Construction/demolition areas adjacent to any paved roadways shall be provided with sandbags or other measures as specified in the Storm Water Pollution Prevention Plan (SWPPP) to prevent runoff to roadways. I. All paved roads within the construction/demolition site shall be swept visually clean, using wet sweepers or air filtered dry vacuum sweepers, at least twice daily (or less during periods of precipitation) on days when construction/demolition activity occurs or on any other day when dirt or runoff from the construction/demolition site is visible on the public roadways. | included with AQ-SC2 | | |
| AQ-SC | 3 | b | Air Quality Plan | | K. All soil storage piles and disturbed areas that remain inactive for longer than 10 days shall be covered or shall be treated with appropriate dust suppressant compounds. L. All vehicles that are used to transport solid bulk material on public roadways and that have the potential to cause visible emissions shall be provided with a cover or the materials shall be sufficiently wetted and loaded onto the trucks in a manner to provide at least two feet of freeboard. M. Wind erosion control techniques (such as windbreaks, water, chemical dust suppressants, and/or vegetation) shall be used on all construction/demolition areas that may be disturbed. Any windbreaks installed to comply with this condition shall remain in place until the soil is stabilized or permanently covered with vegetation. N. Disturbed areas will be re-vegetated as soon as practical. O. Haul trucks used during the Encina Power Station demolition shall be limited to traveling on paved or graveled surfaces at all times within the boundary of the Encina Power Station property. The fugitive dust requirements listed in this condition may be replaced with as stringent or more stringent methods as required by SDAPCD Rule 55. | included with AQ-SC2 | | |
| AQ-SC | 4 | а | Air Quality Plan | | Dust Plume Response Requirement: The AQCMM or Delegate shall monitor all construction/demolition activities for visible dust plumes. Observations of visible dust plumes that have the potential to be transported: (1) off the project site, -(2) 200 feet beyond the centerline of the construction of linear facilities, (3) within 100 feet upwind of any regularly occupied structures not owned by the project owner, or (4) within 50 feet upwind of the I-5 freeway indicate that existing mitigation measures are not resulting in effective mitigation. The AQCMM or Delegate shall implement the following procedures for additional mitigation measures in the event that such visible dust plumes, other than those occurring upwind of the I-5 Freeway, are observed: Step 1: The AQCMM or Delegate shall direct more intensive application of the existing mitigation methods within 15 minutes of making such a determination. Step 2: The AQCMM or Delegate shall direct implementation of additional methods of dust suppression if Step 1 specified above fails to result in adequate mitigation within 30 minutes of the original determination. Step 3: The AQCMM or Delegate shall direct a temporary shutdown of the activity causing the emissions if Step 2 specified above fails to result in effective mitigation within one hour of the original determination. The activity shall not restart until the AQCMM or Delegate is satisfied that appropriate additional mitigation or other site conditions have changed so that visual dust plumes will not result upon restarting the shut-down source. The owner/operator may appeal to the CPM any directive from the AQCMM or Delegate to shut down an activity, provided that the shutdown shall go into effect within one hour of the original determination, unless overruled by the CPM before that time. | included with AQ-SC2 | | |

| AQ-SC | 4 | b | Air Quality Plan | | The AQCMM or Delegate shall implement the following procedures for additional mitigation measures in the event that such visible dust plumes occurring within 50 feet upwind of the I-5 Freeway are observed: Step 1: The AQCMM or Delegate shall immediately cease the activities causing the visible dust plumes if any obscuration of visibility is occurring to drivers on the I-5 freeway. The AQCMM or Delegate shall direct more intensive application of the existing mitigation methods immediately if the visible plumes are seen within 50 feet of the I-5 freeway but are not causing obscuration of visibility to drivers. Step 2: The AQCMM or Delegate shall direct implementation of additional methods of dust suppression and monitor the start-up and/or continuation of the dust causing activities to ensure that the additional mitigation is effective. Step 3: The AQCMM or Delegate shall direct a temporary shutdown of the activity causing the emissions if Step 2 specified above fails to result in effective mitigation. The activity shall not restart until the AQCMM or Delegate is satisfied that appropriate additional mitigation or other site conditions have changed so that visual dust plumes that could impact visibility on the I-5 Freeway will not occur upon restarting the shut-down fugitive dust source. | | |
|-------|----|---|------------------|---|--|----------------------|--|
| AQ-SC | 5 | a | Air Quality Plan | Y | Diesel-Fueled Engine Control: The AQCMM shall submit to the CPM, in the Monthly Compliance Report, a construction/demolition mitigation report that demonstrates compliance with the AQCMP mitigation measures for purposes of controlling diesel construction/demolition-related emissions. The following off-road diesel construction/demolition equipment mitigation measures shall be included in the Air Quality Construction Mitigation Plan (AQCMP) required by AQ-SC2, and any deviation from the AQCMP mitigation measures shall require prior CPM notification and approval. a) All diesel-fueled engines used in the construction/demolition of the facility shall have clearly visible tags issued by the on-site AQCMM showing that the engine meets the conditions set forth herein. b) All construction/demolition diesel engines with a rating of 50 hp or higher shall meet, at a minimum, the Tier 4 or 4i California Emission Standards for Off-Road Compression-Ignition Engines, as specified in California Code of Regulations, Title 13, section 2423(b)(1), unless a good faith effort to the satisfaction of the CPM that is certified by the on-site AQCMM demonstrates that such engine is not available for a particular item of equipment. In the event that a Tier 4 or 4i engine is not available for any off-road equipment larger than 50 hp, that equipment shall be equipped with a Tier 3 engine, or an engine that is equipped with retrofit controls to reduce exhaust emissions of nitrogen oxides (NOx) and diesel particulate matter (DPM) to no more than Tier 3 levels unless certified by engine manufacturers or the on-site AQCMM that the use of such devices is not practical for specific engine types. For purposes of this condition, the use of such devices is "not practical" for the following, as well as other, reasons. 1. There is no available retrofit control device that has been verified by either the California Air Resources Board or U.S. Environmental Protection Agency to control the engine in question; or 2. The construction/demolition equipmen | included with AQ-SC2 | |
| AQ-SC | 5 | b | Air Quality Plan | | c) The use of a retrofit control device may be terminated immediately, provided that the CPM is informed within ten working days of the termination and that a replacement for the equipment item in question meeting the controls required in item "b" occurs within ten days of termination of the use, if the equipment would be needed to continue working at this site for more than 15 days after the use of the retrofit control device is terminated, if one of the following conditions exists: 1. The use of the retrofit control device is excessively reducing the normal availability of the construction/demolition equipment due to increased down time for maintenance, and/or reduced power output due to an excessive increase in back pressure. 2. The retrofit control device is causing or is reasonably expected to cause engine damage. 3. The retrofit control device is causing or is reasonably expected to cause a substantial risk to workers or the public. 4. Any other seriously detrimental cause which has the approval of the CPM prior to implementation of the termination. d) All heavy earth-moving equipment and heavy duty construction/demolition-related trucks with engines meeting the requirements of (b) above shall be properly maintained and the engines tuned to the engine manufacturer's specifications. e) All diesel heavy construction/demolition equipment shall not idle for more than five minutes. Vehicles that need to idle as part of their normal operation (such as concrete trucks) are exempted from this requirement. f) Construction/demolition equipment will employ electric motors when feasible. | | |
| AQ-SC | 12 | | MCR | Y | The project owner shall not allow the overlap of specific construction and demolition phase activities. The following activities shall not be conducted concurrently with any of the other listed activities: 1. ASTs 5, 6, and 7 demolition (licensed CECP activity) 2. ASTs 1, 2, and 4 demolition and berm removal (PTR described activities). 3. Amended CECP construction (PTA described activities). 4. EPS demolition (PTA and Encina Power Station Demolition Plan described activities). In addition, the gas turbines initial commissioning activity and the EPS demolition activity shall not be performed concurrently. | N/A | |
| AQ-SC | 13 | | MCR | Y | The project owner shall not implode or fell any concrete or mortar structure, such as the main exhaust stack or the power plant building, during the demolition of the Encina Power Station. | | |

| GEN | 1 | С | СВО | | The project owner shall design, construct, and inspect the project in accordance with the 2013 California Building Standards Code (CBSC), also known as Title 24, California Code of Regulations, which encompasses the California Building Code (CBC), California Administrative Code, California Electrical Code, California Mechanical Code, California Plumbing Code, California Energy Code, California Fire Code, California Code for Building Conservation, California Reference Standards Code, and all other applicable engineering laws, ordinances, regulations and standards (LORS) in effect at the time initial design plans are submitted to the chief building official (CBO) for review and approval (the CBSC in effect is the edition that has been adopted by the California Building Standards Commission and published at least 180 days previously). The project owner shall ensure that all the provisions of the above applicable codes are enforced during the construction, addition, alteration, moving, demolition, repair, or maintenance of the completed facility, including the demolition of above-ground fuel oil storage tanks 1, 2, and 4 (ASTs 1, 2, and 4), and the demolition of the Encina Power Station (EPS) (2013 CBC, Appendix Chapter 1, §1.1.3, Scope). All transmission facilities (lines, switchyards, switching stations and substations) are covered in the conditions of certification in the Transmission System Engineering section of this document. In the event that the initial engineering designs are submitted to the CBO when the successor to the 2013 CBSC is in effect, the 2013 CBSC provisions shall be replaced with the applicable successor provisions. Where, in any specific case, different sections of the code specify different materials, methods of construction or other requirements, the most restrictive shall govern. Where there is a conflict between a general requirement and a specific requirement, the specific requirement shall govern. The project owner shall ensure that all contracts with contractors, subcontractors, and s | Comments Received from CBO on Execution Plan on 12/4/19 Comments returned to CBO on 1-9-20. CBO approved on 1/22/2020 | 01/09/2020 | 1/22/2020 |
|---------------------|------|---|-------------------|---|--|---|------------|------------|
| HAZ | 7 | | Security Plan | | Prior to commencing tank demolition, a site-specific Demolition and Construction Site Security Plan for the tank demolition and construction phases shall be prepared and made available to the CPM for review and approval. The Construction Security Plan shall include the following: 1. perimeter security consisting of fencing enclosing the demolition and construction areas; 2. security guards; 3. site access control consisting of a check-in procedure or tag system for demolition and construction personnel and visitors; 4. written standard procedures for employees, contractors, and vendors when encountering suspicious objects or packages on-site or off-site; 5. protocol for contacting law enforcement and the CPM in the event of suspicious activity or emergency; and 6. evacuation procedures. | Submitted to CEC | 11/6/2019 | 11/19/2019 |
| NOISE | 1 | | Notice | | At least 15 days prior to the start of any demolition activities associated with the amended CECP, the project owner shall notify the city of Carlsbad and all residents within one-half mile of the site, by mail or other effective means, of the commencement of project demolition and construction. At the same time, the project owner shall establish a telephone number for use by the public to report any undesirable noise conditions associated with the demolition, construction, and operation of the amended CECP and include that telephone number in the above notice. If the telephone is not staffed 24 hours per day, the project owner shall include an automatic answering feature, with date and time stamp recording, to answer calls when the phone is unattended. This telephone number shall be posted at the project site during construction in a manner visible to passersby. This telephone number shall be maintained until the project has been operational for at least one year, and all subsequent demolition activities at the Encina Power Station have been completed. | Noise Notification has been completed and mailers sent out to public/residents within one mile on 9/23. Notice sent to CEC on 9/25/19 | 9/25/2019 | 12/18/2019 |
| NOISE COMPLIANCE | 1 11 | | Hot Line Response | Y | Throughout the demolition of above-ground fuel oil storage tanks 1, 2, 4, 5, 6, and 7 (ASTs 1, 2, 4, 5, 6, and 7), construction and operation of the amended CECP, and demolition of the Encina Power Station the project owner shall document, investigate, evaluate, and attempt to resolve all project-related noise complaints. The project owner or authorized agent shall: • Use the Noise Complaint Resolution Form (below), or a functionally equivalent procedure acceptable to the CPM, to document and respond to each noise complaint; • Attempt to contact the person(s) making the noise complaint within 24 hours (within 12 hours if the complaint is related to nighttime concrete pour); • Conduct an investigation to determine the source of noise related to the complaint; • Take all feasible measures to reduce the noise at its source if the noise is project related; and • Submit a report documenting the complaint and the actions taken. The report shall include: a complaint summary, including final results of noise reduction efforts and, if obtainable, a signed statement by the complainant stating that the noise problem is resolved to the complainant's satisfaction. | Hot Line Established | 8/13/2019 | 10/2/2019 |
| NOISE | 3 | | Letter | | The project owner shall submit to the CPM for review and approval a noise control program and a statement, signed by the project owner's project manager, verifying that the noise control program will be implemented throughout the demolition of ASTs 5, 6, and 7, and construction and demolition activities associated with of the amended CECP. The noise control program shall be used to reduce employee exposure to high noise levels during demolition and construction in accordance with Title 8, California Code of Regulations, sections 5095-5099, and Title 29, Code of Federal Regulations, section 1910.95 | | 8/26/2019 | 10/3/2019 |

| NOISE | 6 | | Letter | Y N | loisy construction work relating to any project features shall be restricted to the times of day delineated below: | | | |

| SOIL&WATER | 6 | а | Water Use | pi C in di se ni | During normal operation the project shall use no more than three acre-feet per year (AFY) of potable water for drinking, sanitary, and fire protection testing purposes. The project shall use recycled water for all industrial and landscape irrigation purposes during operation of the CECP, unless potable water is needed for emergency backup use. For the purpose of this condition, the term emergency shall mean the nability of the CECP to take, or for the city of Carlsbad to deliver, recycled water to the CECP in a quantity sufficient to meet CECP demand lue to Acts of God, natural disaster, and other circumstances beyond the control of the project owner, including interruption of recycled water ervice and it is necessary for the CECP to prepare to or continue to operate to serve a peaking load. If more than 3AFY of potable water is needed during operation for non-emergency uses, the owner shall be required to file a formal petition to amend the project. If the CECP requires notable water for EPS demolition and emergencies that will cumulatively exceed 300 acre-feet, during the life of the project, the project owner shall file a petition to amend. All emergency water use shall be reported in annual compliance reports. Reported values shall include monthly | | | |
| SOIL&WATER | 6 | b | Reporting | Y | | | | |
| SOIL&WATER | 9 | а | Permit Reporting | ci tr aa T W R cd d ssi si W C | Prior to transport and disposal of any facility construction or demolition-related wastewaters offsite, the project owner shall test and classify the stored wastewater to determine proper management and disposal requirements. The project owner shall provide evidence that wastewater is disposed of at an appropriately licensed facility. The project owner shall ensure that the wastewater is transported and disposed of in accordance with the wastewater's characteristics and classification and all applicable LORS (including any CCR itile 22 Hazardous Waste and Title 23 Waste Discharges to Land requirements). Where discharge of wastewater must comply with the San Diego Regional Water Quality Control Board (SDRWQCB) and State Water Resources Control Board regulatory requirements, the project owner shall submit a Report of Waste Discharge (ROWD) to the compliance project manager (CPM) and SDRWQCB for determination of which regulatory waiver or permit applies to the proposed lischarges. The project owner shall pay all necessary fees for filing and review of the ROWD and all other related fees. Checks for such fees shall be submitted to the SDRWQCB and shall be payable to the State Water Resources Control Board. The project owner shall ensure compliance with the provisions of the waiver or permit applicable to the discharge. Where the regulatory requirements are not applied pursuant to a National Pollutant Discharge Elimination System permit, it is the commission's intent that the requirements of the applicable waiver or permit be enforceable by both the Commission and the SDRWQCB. In furtherance of that objective, the Commission hereby delegates the enforcement of the waiver or permit requirements, and associated monitoring, inspection, and annual fee collection authority, to the SDRWQCB. The CPM and SDRWQCB shall confer with each other and coordinate, as needed, in the enforcement of the requirements. | ROWD not needed as existing permits (Encina industrial NPDES permit and Construction General NPDES Permit for stormwater discharges) will be used to confirm compliance with COC. NRG submitted email to CEC from SDWRQCB in regards to permits on 11/22/2019. | 11/22/2019 | 11/27/2019 |
| | | | | | | | | |

| SOIL&WATER | 9 | d | Reporting | | | As needed | | |
| TRANS | 1 | | Permit | Y | The project owner shall consult with the City of Carlsbad and prepare and submit to the city of Carlsbad for review and comment and the Compliance Project Manager (CPM) for approval a construction/demolition traffic control plan. The plan shall be implemented during all phases of construction/demolition and shall addresses the following issues: • timing of truck trips, including heavy equipment and building materials deliveries, especially those that would cross the railroad tracks; • redirecting construction and demolition traffic with a flag person at a minimum for trucks traveling eastbound on Cannon Road from the SDG&E Service Gate to cross the railroad tracks; • signing, lighting, and traffic control device placement if required; • need for construction work hours and arrival/departure times outside and during peak traffic periods; • insurance of access for emergency vehicles to the project site; • temporary closure of travel lanes; • access to adjacent residential and commercial property during the construction of all pipelines; • specification of construction-related haul routes; and • identify safety procedures for exiting and entering the site access gate. | and the CEC to allow for the City of Carlsbad's Jack-and-bore project. Due to the left turn from Gate 3 being obstructed, the temporary TCP allows for a right turn while | 10/29/2019, Modified Plan sent 11/14/19; Temporary Traffic Control Plan approved on 11/9/2020 | 12/12/2019 |
| TRANS | 5 | а | Reporting | Y | During and following completion of project construction and demolition, the project owner shall repair any damage to roadways affected by construction/demolition activity to pre-project road conditions or better. Restoration of significant damage which could cause hazards (such as potholes, deterioration of pavement edges, or damaged signage) shall take place immediately after the damage has occurred. Prior to the start of demolition and construction, the project owner shall photograph or videotape, all roadways that will be affected by pipeline construction and heavy truck traffic. The project owner shall provide the CPM and the city of Carlsbad with a copy of the images for the roadway segments under its jurisdiction. Also, prior to start of demolition and construction, the project owner shall notify the city about the schedule for project demolition/construction. The purpose of this notification is to allow the city the opportunity to postpone any planned roadway resurfacing and/or improvement projects until after the project demolition/construction has taken place and to coordinate demolition/construction-related activities associated with other projects. | - CALIBOVARA | 9/16/2019 | 9/30/2019 |
| TRANS | 7 | | Plan | Y | During project construction/demolition, the project owner shall implement a parking and staging plan for project construction and demolition to enforce a policy that all project-related parking occurs on site or in designated off-site parking areas. | | 10/16/2019 | 10/22/2019 |
| WASTE | 5 | a | Plan | | The project owner shall prepare a Demolition and Construction Waste Management Plan for all wastes generated during demolition and construction of the facility and shall submit the plan to the CPM for review and approval. The plan may be submitted in two sections: Demolition activities and Construction activities. Both sections of the plan shall contain, at a minimum, the following: • a description of all demolition and construction waste streams, including projections of frequency, amounts generated, and hazard classifications; and • management methods to be used for each waste stream, including temporary on-site storage, housekeeping and best management practices to be employed, treatment methods and companies providing treatment services, waste testing methods to assure correct classification, methods of transportation, disposal requirements and sites, and recycling and waste minimization/source reduction plans. • a reuse/recycling Debris Management Plan for demolition and construction materials that meets or exceeds the waste diversion goals established by the Integrated Waste Management Compliance Act (Pub. Resources Code, § 41780 et seq.) and CAL Green Title 24, California Code of Regulations, Part 11sections 4.408, 5.408, 301.1.1 and 301.3. | | 10/16/2019 | 11/12/2019 |
| WASTE | 6 | | Permit | Y | Prior to demolition of existing structures, the project owner shall complete and submit a copy of a San Diego County Air Pollution Control District (District) Asbestos Renovation and Demolition Notification Form to the CPM and the District for review. The project owner shall remove all asbestos-containing material (ACM) from the site prior to demolition. | Final (4th) Revised Asbestos Notification Form was submitted to San Diego Air Pollution Control District and CPM for January 29, 2020 Start of Demoltion of Asbestos Abatement. | 1/10/2020 1/17/2020 1/21/2020 1/24/2020 | 1/29/2020 |

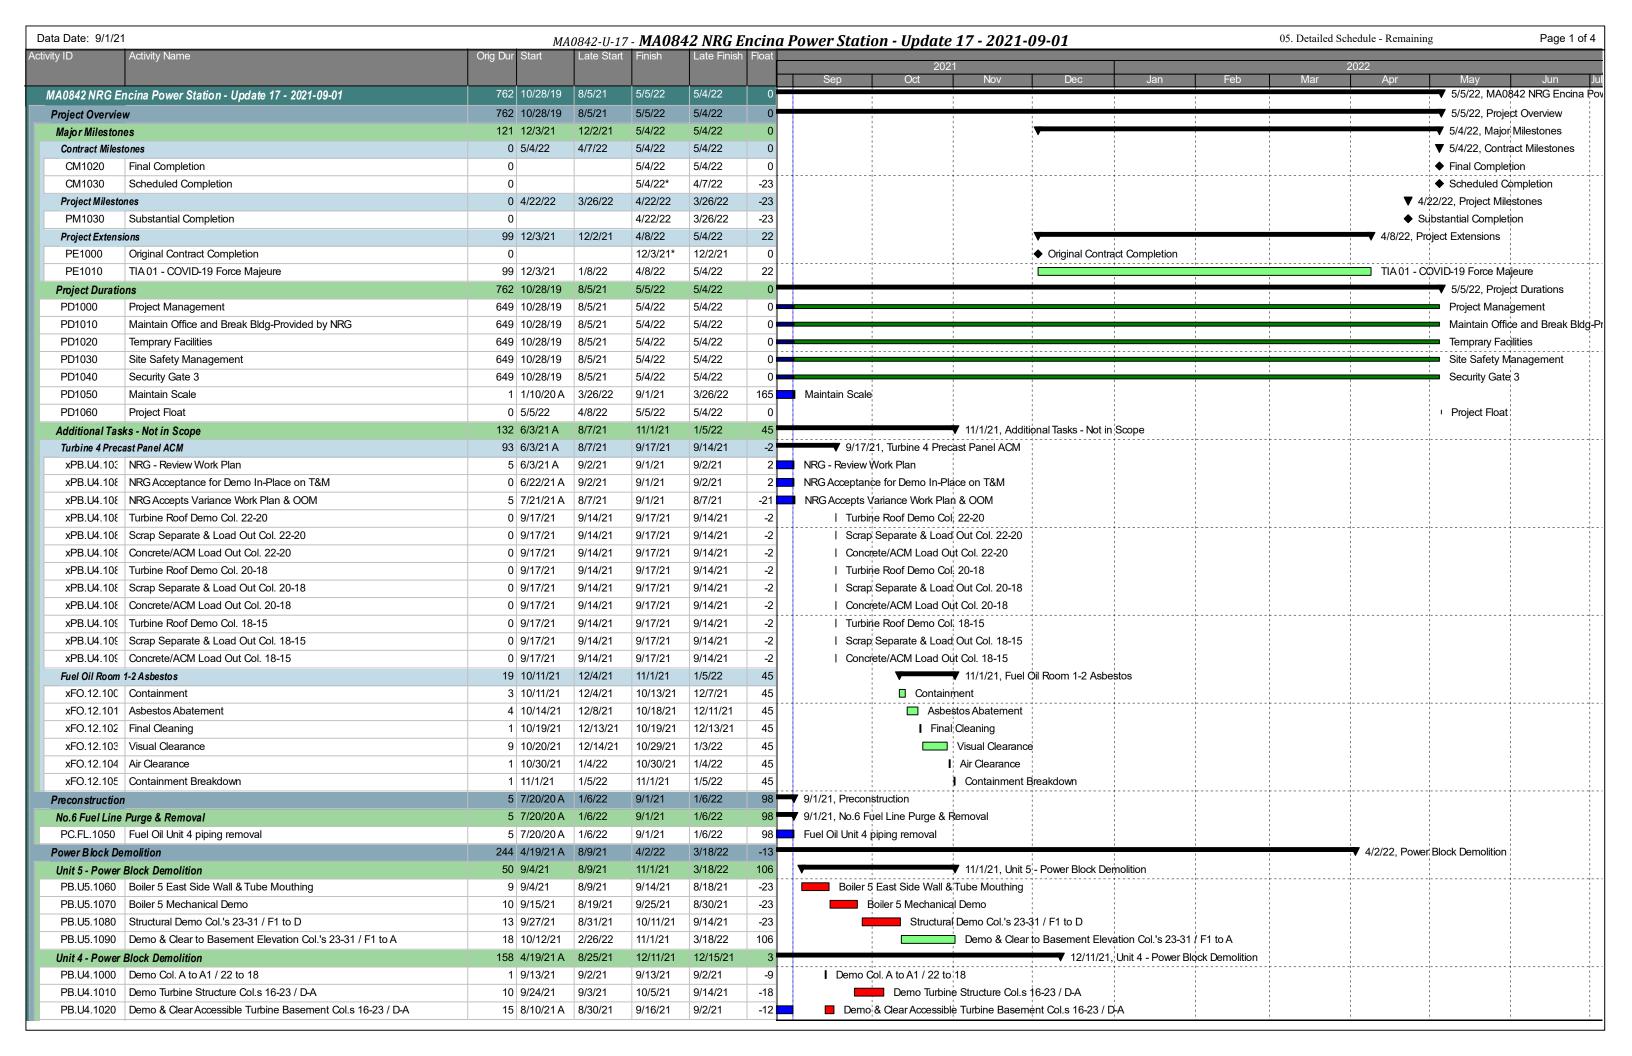

| VIS | 3 | В | Screening | | If necessary to provide visual screening of staging activities, equipment and materials in the short term, the project owner shall provide temporary dark-colored, opaque fencing to provide visual screening until landscape screening described above has achieved sufficient maturity to provide visual screening. Existing opaque fencing shall be maintained along the Carlsbad Boulevard frontage of the EPS for the duration of construction and demolition. The project owner shall submit to the CPM for review and approval, and simultaneously to the city of Carlsbad for review and comment, a landscaping plan whose proper implementation will satisfy these requirements. The plan shall include: a) A detailed landscape, grading, and irrigation plan, at a reasonable scale. The plan shall demonstrate how the requirements stated above shall be met. The plan shall provide a detailed installation schedule demonstrating installation of as much of the landscaping as early in the construction process as is feasible in coordination with project construction. The intent of the plan shall be to minimize loss of existing perimeter tree and shrub screening, particularly at the northeast laydown site; and to provide supplemental and replacement plantings as needed to screen staging sites. | | |
|---------------|---|---|------------|---|--|-----------|---|
| WORKER SAFETY | 1 | b | Plan | Y | The project owner shall submit to the Compliance Project Manager (CPM) a copy of the Project Demolition and Construction Safety and Health Program containing the following: 1. a Demolition and Construction Personal Protective Equipment Program; 2. a Demolition and Construction Exposure Monitoring Program; 3. a Demolition and Construction Injury and Illness Prevention Program; 4. a Demolition and Construction Emergency Action Plan; and 5. a Demolition and Construction Fire Prevention Plan. 6. an Encina Power Statin Demolition Plan. The Personal Protective Equipment Program, the Exposure Monitoring Program, and the Injury and Illness Prevention Program shall be submitted to the CPM for review and approval concerning compliance of the program with all applicable safety orders. The Demolition and Construction Emergency Action Plan, the Demolition and Construction Plan, and an Encina Power Station Demolition Plan shall be submitted to the Carlsbad Fire Department for review and comment prior to submittal to the CPM for approval. | 11/6/2019 | 12/11/2019 |
| WORKER SAFETY | 3 | a | Supervisor | Y | The project owner shall provide a site Demolition Safety Supervisor (DSS) and a Construction Safety Supervisor (CSS) who, by way of training and/or experience, is are knowledgeable of tank demolition, power plant construction activities and relevant laws, ordinances, regulations, and standards; is are capable of identifying workplace hazards relating to the demolition and/or construction activities; and has authority to take appropriate action to assure compliance and mitigate hazards. The DSS or CSS shall: 1. have overall authority for coordination and implementation of all occupational safety and health practices, policies, and programs; 2. assure that the safety program for the project complies with Cal/OSHA and federal regulations related to power plant projects; 3. assure that all demolition, construction and commissioning workers and supervisors receive adequate safety training; 4. complete accident and safety-related incident investigations and emergency response reports for injuries and inform the CPM of safety-related incidents; and 5. assure that all the plans identified in Conditions of Certification Worker Safety-1 and -2 are implemented. | | 12/11/19 - But need to update all Federal OSHA citations with the appropriate Cal/OSHA code citations |
| WORKER SAFETY | 4 | | СВО | Y | The project owner shall make payments to the Chief Building Official (CBO) for the services of a Safety Monitor based upon a reasonable fee schedule to be negotiated between the project owner and the CBO. Those services shall be in addition to other work performed by the CBO. The Safety Monitor shall be selected by and report directly to the CBO and will be responsible for verifying that the Construction Safety Supervisor, as required in Condition of Certification Worker Safety-3, implements all appropriate Cal/OSHA and Energy Commission safety requirements. The Safety Monitor shall conduct on-site (including linear facilities) safety inspections at intervals necessary to fulfill those responsibilities and shall do this during the period of tank demolition/removal, construction of the CECP, and demolition/removal of the EPS. | 9/12/2019 | 10/10/2019 |

| WORKER SAFETY | 5 | Training | | The project owner shall ensure that a portable automatic external defibrillator (AED) is located on site during tank demolition, construction and operations and demolition/removal of the EPS and shall implement a program to ensure that workers are properly trained in its use and that the equipment is properly maintained and functioning at all times. During demolition of the tanks and the EPS, construction and commissioning, the following persons shall be trained in its use and shall be on site whenever the workers that they supervise are on site: the Demolition or Construction Project Manager or delegate, the Demolition or Construction Safety Supervisor or delegate, and all shift foremen. During operations, all power plant employees shall be trained in its use. The training program shall be submitted to the CPM for review and approval. | AED Training. | 12/5/2019 | 12/10/2019 |

COMPLIANCE SUMMARY
SEPTEMBER 2021

Air Quality Construction Compliance Summary

Amended Carlsbad Energy Center Project, Phase IV, San Diego County, CA (07-AFC-06C)

PREPARED FOR: Carlsbad Power I, LLC for the licensed

Carlsbad Energy Center Project

PREPARED BY: Timothy Sisk (Alternate AQCMM), NRG Energy, Inc.

DATE: October 13, 2021
COMPLIANCE PERIOD: September 2021

This compliance memorandum summarizes the activities conducted in June 2021 to demonstrate compliance with the approved *Air Quality Construction Mitigation Plan (AQCMP) for Phase IV of the Amended Carlsbad Energy Center Project* (Amended CECP) (CEC, 2019). The Amended CECP Phase IV AQCMP covers the aboveground demolition/removal of Encina Power Station. Below grade demolition and site remediation, which would be accomplished under the authority of San Diego County Environmental Health Department (site remediation) and the City of Carlsbad (redevelopment of the site for future use), are beyond the scope of Phase IV of the Amended CECP.

Mobilization for Phase IV of the project started during the first week of November 2019. Limited demolition and asbestos abatement began on January 29, 2020.

Due to the COVID-19 pandemic and the California State of Emergency, demolition activities were suspended on March 20, 2020. Demolition activities recommenced during the week of July 6-10, 2020 with limited remobilization during which staff were re-orientated to the site and the scope of work, and safety trained.

The demolition contractor provided a relief request on February 14, 2021 through the Encina Power Station Air Quality Construction Mitigation Manager (AQCMM) Tier 3 engine relief/variance from Condition of Certification AQ-SC5 for a specialized excavator. The modified and retrofitted Liebherr 984C-ER excavator was designed and engineered over the course of several years to specifically meet and eliminate the safety concerns encountered during the demolition of power plants. The CEC approved the relief/variance request on February 21, 2021. The Liebherr 984C-ER excavator arrived in August 2021 and is expected to be the primary demolition machine onsite.

Demolition activities during September 2021 involved interior and exterior asbestos abatement, removal of numerous facility structures and equipment within the powerblock building, removal of Unit 5, and torch cutting of metallic equipment (structural components, piping, etc.).

Fugitive Dust Compliance Measures

For this compliance period during Phase IV of the Encina Power Station Demolition, the following compliance measures were implemented, if they occurred, using the compliance checklist:

• Observance of a visible dust plume

- Additional control measures implemented to reduce a visible dust plume
- Complaints filed with the San Diego Air Pollution Control District
- Deviations from the AQCMP

No deviations from conditions AQ-SC3 or AQ-SC4 occurred during the compliance period. No visible dust plumes, additional control measures, nor complaints occurred during the compliance period.

Fugitive dust control measures prescribed in the AQCMP are monitored via checklists, which are included in Attachment A of this report.

Diesel Equipment Compliance Measures

Diesel-fueled engines subject to the AQCMP and used during this compliance period that met the diesel equipment compliance measures were tagged by the Air Quality Construction Mitigation Manager (AQCMM) and/or the Delegated AQCMM to indicate the equipment are approved for use onsite. The equipment tagged during this compliance period are included in Table 1.

The following compliance measures were implemented during this compliance period:

- Equipment with diesel engines with a rating of 50 horsepower (hp) or higher shall meet Tier 4/4i emissions standards. No exemptions were requested for this compliance period.
- Equipment is maintained in accordance with manufactures recommendations.
- Equipment idling limited to 5 minutes or less to the extent practical.
- Equipment is labeled in accordance with Air Resources Board requirements.
- Equipment will employ electric motors where feasible.

Equipment onsite and used during this compliance period are being recorded and are listed in Table 1 Documentation confirming that equipment used for ten (10) days or more are Tier 4 or Tier 4i, along with the appropriate letter from the equipment owner confirming maintenance is performed as required for the equipment listed in Table 1, are included as Attachment B to this memorandum.

Going Requirements

Area Affected:
Requirement:
(Y/N): Notes:

| Construction site entrance and Travel through | Post visible speed limit signs of a maximum of 10 MPH for unpaved | YES | Signs posted is various areas |
|---|--|-----|---|
| Construction Eq Vehicle tires | Inspected and washed as necessary to clean off dirt prior to leaving | NA | No Dirt traffic at current time |
| Construction entrance | Enter only through treated entrance roadways as noted on Site Map. Alternative route approved by CPM - If alternative route chosen indicated on Site Map and note rationale for change | YES | Gate #3 is the designated rout of entry for project. Paved road |
| Unpaved roads and disturbed areas in project and laydown area | Water areas to limit visible dust. If watering is required note frequency and time in notes section of checklist | NA | No dirt traffic at current time |
| Construction areas adjacent to any paved roadways | Provided with sandbags or other measures in SWPPP to prevent runoff, note location of measures in Site Figure Map | YES | |
| Tire washing / cleaning station | Gravel ramps min 20 ft in length - identify location in Site Figure Map | YES | No truck traffic at current time |
| Unpaved Exits | At all exit locations: Gravel or treated to prevent track-out – identify | YES | Rumble plate put in place |
| Paved Areas | Swept at least twice daily (or less during periods of precipitation during active days of construction) | YES | Is being completed twice a day |
| Public Roadway existing construction site | 500 feet of public roadway swept visually clean at least twice daily (or less during periods of precipitation) during active | YES | No dirt traffic at current time |
| Bulk transport vehicles with materials that have potential to cause visible emissions on public | Cover or wet and load so that the trucks have at least 2 feet of freeboard | NA | No truck traffic at current time |
| Storage areas inactive for more than 10 days | Covered or treated with dust suppressants, and vehicle access will be restricted. | N/A | |
| Construction Areas that may be disturbed and are generating fugitive dust | Install wind erosions control techniques (such as gravel, windbreaks, water, chemical dust suppressants, and/or vegetation) until soil is stabilized or permanently covered w/ vegetation. | NA | No truck traffic at current time |
| Disturbed areas Demolition Haul Trucks - | Re-Vegetated as soon as possible Travel limited to paved or | YES | No dirt traffic at the |

1. The activity shall not restart until the AQCMM or AQCMM Delegate is satisfied that appropriate additional mitigation or other site conditions have changed so that visual dust plumes will not result upon restarting the activity that caused the shut-down. The owner/operator may appeal to the CPM any directive from the AQCMM or AQCMM Delegate to shut down an activity, provided that the shutdown shall go into effect within one hour of the original determination, unless overruled by the CPM before that time.

Diesel Engine Tier and Maintenance

Documentation

October 1st, 2021 Project Code: MA0842

NRG-Encina Power Station 4600 Carlsbad Blvd. Carlsbad, CA. 92008

Attn: Tim Sisk

Environmental Manager

Subject: Maintenance and Inspection of Equipment

Dear Mr. Sisk:

This letter confirms that Brandenburg Industrial Services Company performs daily inspection reports when equipment is utilized and performs required maintenance for all on-site equipment. Attached is a current Equipment Log for equipment currently on site.

Please let me know if any further information is required.

Best regards,

Liam & Campbell

1.0 INTRODUCTION

This Monthly Compliance Report (MCR) summarizes biological resources monitoring activities and documentation conducted during the demolition phase of the Encina Power Station (EPS) from September 1 through September 30, 2021, in accordance with the Biological Resources Mitigation Implementation and Monitoring Plan (BRMIMP). The following biological Conditions of Certification (COCs) pertaining to monitoring activities covered by this MCR include, but are not limited to:

- BIO-2 Designated Biologist Duties
- BIO-4 Designated Biologist and Biological Monitor Authority
- BIO-5 Biological Resources Worker Environmental Awareness Program (WEAP);
- BIO-6 Biological Resources Mitigation Implementation and Monitoring Plan;
- BIO-7 General Impact Avoidance Mitigation Features; and
- BIO-8 Mitigation Management to Avoid Harassment or Harm.

2.0 BIOLOGICAL MONITORING SUMMARY

This section summarizes biological monitoring activities conducted during the September 2021 reporting period. Demolition mobilization began November 2019, and the start of demolition began on January 29, 2020.

Biological monitoring by the Designated Biologist is conducted on a monthly basis outside of the nesting season. The Biological Resources Compliance Monitoring Logs are provided in Appendix A. A list of wildlife species observed during the monitoring events is included in Appendix B. There are no Wildlife Observation Forms (WOF) for this reporting period.

The frequency and duration of monitoring is dependent upon the biological resources located within, as well as transiting through the work area. Biological monitoring will continue as described above, as well as on-call monitoring, when necessary, until the Designated Biologist determines that a change is necessary for the protection of sensitive biological resources or a reduction in monitoring is warranted because of a lack of biological resources within the site.

All on-site staff receives WEAP training prior to start of work. The hardcopy sign-in training logs are submitted separately.

2.1 NESTING BIRDS

There are no active nests or Environmentally Sensitive Area (ESA) buffers on-site. A list of wildlife species observed during the monitoring events are included in Appendix B.

2.3 SPECIAL-STATUS SPECIES

Three special-status avian species were observed during the reporting period, which included the following: California brown pelican (*Pelecanus occidentalis californicus*; California Department of Fish and Wildlife [CDFW] Fully Protected [FP]), California gull (*Larus californicus*; CDFW Watch List [WL]), and double-crested cormorant (*Phalacrocorax auratus*; CDFW WL). California Natural Diversity Database (CNDDB) forms were not submitted for the species listed above because the occurrences are not qualifying life event. As stated in the CNDDB data submission guidelines, birds in transit (fly-overs) and detections of foraging or perched birds are

not added (CDFW, 2016)¹. A list of wildlife species observed during the monitoring events are included in Appendix B.

2.4 WILDLIFE DISPLACEMENT, INJURIES, AND MORTALITIES

2.4.1 Migratory Bird Treaty Act Protected Species

No injured or dead species protected by the MBTA were observed within the EPS site. The American peregrine falcon pair readily hunts and consumes prey within the EPS site. Therefore, small pieces of prey remnants are found, but not whole bird carcasses. A list of wildlife species observed during the monitoring events are included in Appendix B.

2.4.2 Other Species

No additional injured or dead wildlife species were observed within the EPS site. A list of wildlife species observed during the monitoring events are included in Appendix B.

2.5 HAZARDOUS MATERIAL SPILLS

No project-related hazardous material spills were observed during the biological monitoring visits.

2.6 TRASH

Litter, including wind-blown, were observed during the biological monitoring visits. Litter removal requests were submitted to the demolition contractor.

2.8 NON-COMPLIANCE REPORT

No non-compliance notifications or incident reports were issued.

Summary of Biological Resources Monitoring Observations

Biological resources monitoring for biological constraints, special-status species, and nesting birds was conducted at the NRG EPS site.

Nesting Bird Observations:

• No observations were noted.

Special-Status Species Observed:

- California brown pelicans (*Pelecanus occidentalis californicus*; California Department of Fish and Wildlife Service
 [CDFW] Fully Protected [FP]) were observed within the project vicinity.
- A California gull (Larus californicus; CDFW Watch List [WL]) was observed within the project vicinity.
- Double-crested cormorants (Nannopterum auritum; CDFW WL) were observed within the project vicinity.
- No additional special-status species were observed.

Other Biological Resources Observations:

No additional observations were noted.

Other Observations/Comments:

- Litter was observed within the EPS site. A litter removal request was submitted to the contractor.
- Uncovered trash receptacles were observed. A request was submitted to the contractor to cover all trash receptacles.
- No additional observations were noted.

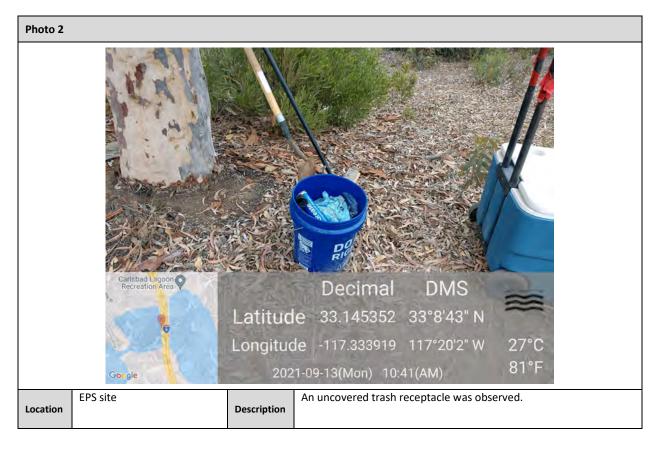

Items Requiring Action/Follow-up

A request was submitted to the contractor to conduct litter removal and cover all trash receptacles.

Wildlife Species Observed

American crow (*Corvus brachyrhynchos*), Anna's hummingbird (*Calypte anna*), black-chinned hummingbird (*Archilochus alexandri*), California brown pelican, California gull, California towhee (*Melozone crissalis*), common yellowthroat (*Geothlypis trichas*), double-crested cormorant, European starling (*Sturnus vulgaris*), house finch (*Haemorhous mexicanus*), lesser goldfinch (*Spinus psaltria*), mourning dove (*Zenaida macroura*), royal tern (*Thalasseus maximus*), song sparrow (*Melospiza melodia*), western fence lizard (*Sceloporus occidentalis*), and western gull (*Larus occidentalis*).

Appendix B Observed Wildlife Species List

Observed Wildlife Species List September 2021 Encina Power Station

| Common Name | Scientific Name | Status Federal/State/Other |
|---------------------------|-------------------------------------|-------------------------------|
| Birds | | |
| American crow | Corvus brachyrhynchos | // |
| Anna's hummingbird | Calypte anna | // |
| Black-chinned hummingbird | Archilochus alexandri | // |
| California brown pelican | Pelecanus occidentalis californicus | /FP/ |
| California gull | Larus californicus | /WL/ |
| California towhee | Melozone crissalis | // |
| Common yellowthroat | Geothlypis trichas | // |
| Double-crested cormorant | Nannopterum auratus | /WL/ |
| European starling | Sturnus vulgaris | // |
| House finch | Haemorhous mexicanus | // |
| Lesser goldfinch | Spinus psaltria | // |
| Mourning dove | Zenaida macroura | // |
| Royal tern | Thalasseus maximus | // |
| Song sparrow | Melospiza melodia | // |
| Western gull | Larus occidentalis | // |
| Reptiles | | |
| Western fence lizard | Sceloporus occidentalis | // |

Source:

California Department of Fish and Wildlife (CDFW), Natural Diversity Database. November 2020. Special Animals List. Periodic publication. 116 pp.

Status Codes:

If status codes are not provided, it indicates that the observed species is not a special-status species.

Federal:

FE = Federally listed Endangered: species in danger of extinction throughout a significant portion of its range

FT = Federally listed Threatened: species likely to become endangered within the foreseeable future

BCC = Birds of Conservation Concern

State:

SE = State listed as Endangered

ST = State listed as Threatened

FP = Fully Protected

CSC = California Species of Special Concern Species of concern to California Department of Fish and Wildlife (CDFW) because of declining population levels, limited ranges, and/or continuing threats have made them vulnerable to extinction.

S = Sensitive

WL = Watch List

SP = Special Animals List

Other:

- Bureau of Land Management (BLM), United States Department of Interior Sensitive (S)
- California Department of Forestry and Fire Protection (CDF) classifies "sensitive species" as those species that warrant special protection during timber operations.
- North American Bird Conservation Initiative (NABCI) Red Watch List (RWL)
- United States Forest Service (USFS) Sensitive (S)

No noise hotline calls or project related complaints in September 2021

Encina Power Station Demolition Noise Hotline Calls September 2019 through September 2021

| Date | Time | Log Number | Caller | Issue | Returned Call / Resolution | Corrective Action Completion Date |
|------------|----------|------------|---|--|---|---|
| 10/2/2020 | 10:48 AM | 10022020-1 | Michelle Peters - Poseidon - email | Carlsbad Desalination Plant inquired about visible emissions during demolition/equipment cutting activities. | Cabrillo Power I LLC responded on 10/2/2020 via email and have continued communications with Poseidon/Carlsbad Desalination Plant. Measures to reduce visible emissions and monitoring (personal and visible emissions estimator) have been implemented and continue to be evaluated. | 10/14/2020 - Issue resolved |
| 10/13/2020 | 6:43 PM | 10132020-1 | Mr. Halpin - Hotline Call | Community member walking along the western perimeter of Encina, along Carlsbad Blvd, called with concerns about smelling fumes from the demolition activities. | Caller was contacted and the odor issue was discussed. Odor was related to demolition activities associated with cutting the generators. Additional industrial fans have been placed within the power block building during these cutting activities. | 10/14/2020 - Issue resolved |
| 10/28/2020 | Unk | 10282020-2 | California OSHA - Letter dated October 22, 2020 and received on October 28, 2020 | Letter from CA OSHA regarding anonymous complaint that demolition project was in violation of five (5) separate California Title 8 Code of Regulations. | Cabrillo Power I LLC provided a written response to CA OSHA on November 6, 2020, which individually addressed and provided evidence to support compliance with each of the five (5) California Title 8 Code of Regulations which were alleged to be non-compliant. | 11/6/2020 - Issue resolved |
| 11/5/2020 | 2:38 PM | 11052020-2 | Tina Carter- SDG&E - Called Cabrillo directly | Mrs. Tina Carter, an employee of SDG&E contacted Encina Power Station directly regarding a complaint she received from an SDG&E Storeroom employee at the Cannon Road SDG&E service center. The storeroom employee was concerned with the air quality of the air he was breathing as he observed smoke emanating from the Encina Power Station powerblock. | In response to the complaint, SDG&E was contacted and informed the work had been discontinued for the remainder of the day. NRG's Air Quality Compliance Manager for the demolition project suspended cutting/torching activities, known as "shotgunning" that use the larger diameter cutting rods, due to the current ambient weather conditions. Mitigation measures were implemented with numerous fans and short duration cutting periods, but may not have been sufficient due the changing ambient weather conditions. A Visible Emissions Evaluator (VEE) was also monitoring and visible emissions were not observed that exceed SDAPCD Rule 50 or criteria in AQ-SC3 or AQ-SC4. | Phone call - 11/05/2020 @2:51PM Issue resolved |

Encina Power Station Demolition Noise Hotline Calls September 2019 through September 2021

| Date | Time | Log Number | Caller | Issue | Returned Call / Resolution | Corrective Action Completion Date |
|------------|---------|------------|---|--|---|--|
| | | | | Mrs. Michelle Peters an employee of Poseidon's Desalination Facility emailed Encina Power Station regarding a complaint she received from Poseidon contracted employees regarding concerns related to air quality and a "metallic" odor in the air as a result of smoke emanating from the Encina Power Station powerblock during demolition activities entailing equipment cutting. | In response to the complaint, NRG's Air Quality Compliance Manager responded to Mrs. Peters and explained that the cutting process has been completed, and will not recommence until January 2021. Personal monitoring has been conducted inside the turbine hall and outside during these activities. Area monitoring has been conducted at monitoring stations near Encina gates 2 and 3. Personal and area monitoring stations within the building have recorded data that have been below CA OSHA permissible exposure limits (PELs) for dust and the several monitored metals, including lead, arsenic, and cadmium. Mitigation measures were implemented with numerous fans and short duration cutting periods, but may not have been sufficient due to the direction of the wind. A Visible Emissions Evaluator (VEE) was also monitoring and visible emissions were not observed that exceed SDAPCD Rule 50 or criteria in AQ-SC3 or AQ-SC4 | Initial Email response on 11/10/2020 - Fina email response on 12/4/2020 Issue Resolved |
| 11/6/2020 | 1:06PM | 11062020-3 | Michelle Peters - Poseidon - email | | | |
| 11/24/2020 | 12:00PM | | Kristin Hamon - SDG&E- Emailed Cabrillo directly | Mrs. Kristin Hamon, an employee of SDG&E contacted Encina Power Station via email regarding a complaint she received from an SDG&E employee at the Cannon Road SDG&E service center. The employee was concerned with the air quality and when the activities causing the air quality concerns would cease. The question of what Prop 65 exposures to SDG&E employees were occurring at or around the property lines was asked. | The emissions that the SDG&E employee noted were from typical torch cutting of equipment in the basement. The cutting had been conducted during the morning and was completed by the early afternoon. There was a 10-15 mph southwest wind that was present during the cutting which would have moved any emissions away from the SDG&E Cannon Service Center. In response to the complaint, NRG's Air Quality Compliance Manager for the demolition project confirmed that mitigation measures were implemented with numerous fans operating. No visible emissions were observed leaving the Encina power block according to site personnel contacted after the complaint. SDG&E was contacted and informed the work had been discontinued for the remainder of the day, and would not resume again until after the Thanksgiving Holiday period. SDG&E was also informed that prior results from similar activities have indicated results below PELs for Prop 65 listed metals (arsenic, cadmium, chromium and lead). | Email response on 11/24/2020 - Issue resolved |

Encina Power Station Demolition Noise Hotline Calls September 2019 through September 2021

| Date | Time | Log Number | Caller | Issue | Returned Call / Resolution | Corrective Action Completion Date |
|------------|---------|------------|--|---|---|---|
| 11/30/2020 | 2:41PM | N/A | Terry Cook | Ms. Cook's father was one of the first operators at Encina Power Station. She heard that she may be able to get a piece of the demolition material. She asked if she could have a piece of the demolition material? Would like a call back. | Ms. Cook was contacted and informed that no decisions regarding these types of special requests have been considered yet. The projected committed to staying in touch, and communicated that the project will be in a better position during the Summer of 2021 to consider these requests more fully. | Email and phone response on 12/04/2020 - ongoing review |
| 11/30/2020 | 2:41PM | IN/A | Terry Cook | Ms. Siekmann contacted the Carlsbad Energy | Encina Power Station confirmed by inspection of | |
| | | | Kerry Siekmann - | Center Noise Hotline at 11:37PM rather than the Encina Demolition Hotline to indicate that the FAA lights on the Stack/Chimney were not on/illuminated. She expressed a safety concern for aircraft that would rely on the stack lights. Heavy fog was present during Ms. Siekman observations. | security camera footage at 11:38 PM and 11:43 PM from Carlsbad Energy Center that the FAA stack lights were orking/illuminated. Ms. Siekmann was texted at 11:57 PM that the lights were confirmed to be on/working. Ms. Siekmann responded on January 8 at 9:11 AM that the lights were not visible. Following Ms. Siekmann's text, the lights were again confirmed to be working. | Text response on 01/07/2021 - Issue resolved |
| 1/7/2021 | 11:37PM | 01072021-7 | Terramar Community Member | | | |
| 1/19/2021 | 4:00PM | 01192021-6 | SDAPCD Inspector - Jason LaBlond on behalf of local community member | On January 26, 2021 the San Diego Air Pollution Control District (SDAPCD) notified Encina that a jogger running on Carlsbad Boulevard between 10:00 and 10:30PM on the night of January 19, 2021 complained of an odor and burning eyes. The project's demolition contractor was cutting the Unit 3 stator with a smaller propane/oxygen torch within the powerbock building. Santa Anatype winds (offshore winds from east to west toward Carlsbad Blvd) were apparent according to NRG personnel who were onsite observing the work and wind direction. Industrial fans were used during torch cutting of the stator to help dissipate potential odors. Cutting was also done intermittently to minimize potential for accumulation of odors or visible emissions. This specific cutting work was conducted from January 19-26, 2021, and no other complaints were reported during this period. This cutting work has been completed. | The SDAPCD inspector was contacted and the work that was being performed was described. The inspector understood the type of activity that was taking place, and had no other questions. | Verbal communication wit the SDAPCD inspector 01/27/2021 - Issue resolved |

WORKER SAFETY-3 CONSTRUCTION SAFETY SUPERVISOR MONTHLY SAFETY REPORT & SAFETY INCIDENTS SEPTEMBER 2021

MONTHLY SAFETY REPORT

October 7, 2021

This letter serves as a summary of safety related activities for the month of October 2021.

During the month of September, a total of 10 employees completed site training for the Encina Power Station demolition project. Trained personnel consisted of employees from Brandenburg, Paul Hansen Equipment, and University Mechanical (Paul Hansen Equipment Sub-Contractor).

Brandenburg had 22 working days in the month of September. On each of these days, safety briefings were held with the individual crews each morning. After each morning briefing, each crew would break off to work areas to put together and complete their Task Safety Analysis prior to beginning work.

Also completed during the month was monthly safety topic covering Crystalline Silica Hazard Awareness, and COVID-19 precautions.

Brandenburg management completed 28 documented safety related inspections.

Brandenburg completed 479 Safety Observations (SOS submittals) for the month of September. See attached documents that review the specific data of these observations.

Sean Greenya, ASP, CHST - Brandenburg Project Safety Manager

October 7, 2021 Project Code: MA0842

NRG-Encina Power Station 4600 Carlsbad Blvd. Carlsbad, Ca. 92008

Attn: Tim Sisk

Environmental Manager

Subject: Monthly Onboarding

Dear Mr. Sisk:

This letter confirms that Brandenburg Industrial Services Company performs montly onboarding and orientation of new employee's. Attached is the monthly onboarding of employee's.

Please let me know if any further information is required.

Best regards,

Liam J Gamphell

DOCKET # 07-AFC-06C

Project Name: ENCINA DEMOLITION Phase 4

TIME: 0630 hrs.

Persons Contacted: Ralph Wagner, NRG Project Director; Tommy Brister, NRG Site Safety Manager; Dave Michelsen, NRG Project Manager, Scott Smith, Encina Plant Manager

DESCRIPTION of VISIT & FINDINGS:

1.) Arrived at Guard Station and displayed Entry ID Badge at 0630 hrs. Met with Tommy Brister, NRG CSS, Dave Michelsen, Project Manager. Discussed current status of work and any additional events. Workforce continues to be at 100 craft and supervisors. Safety remains the most serious focus recent violations of Brandenberg's Health & Safety Policy have led to removals of violators and a Safety Stand Down in recent weeks and retraining of all craft onsite. NRG and staff have maintained a rigid position on all safety miscues. There have been no near miss or first aid incidents due to this serious approach by NRG. Work hours continue at 5 – 10 hour days and 1 – 8 hour day. Safety Meetings/Tailboard Meetings are held each day within each individual crew group. On site the largest single work group continues to be the abatement crews. There still is significant Asbestos removal to be completed. Approximately 60 workers are engaged in that effort daily. Water misters are continuously keeping the concrete demo areas damp to control the dust generation. There will be future confined space work and backfilling of water channels is ongoing. Chipping Operations are in progress on turbine foundations in Unit #4. PPE use and work habits as observed on this date were carefully being utilized and I was impressed by the housekeeping conditions of the site and the care taken to address any issues on a continuous basis throughout the day.

RECOMMENDATIONS:

With ongoing craft numbers to remain at 100 onsite through October adjustments will need to be made for work schedules and consideration given to available daylight. Temperatures will also be affected by seasonal changes. Given the lengthening of the overall schedule caution should be exercised to refrain from any effort to accelerate the pace of the work. NRG is preparing for these potential challenges.

DOCKET # 07-AFC-06C

Project Name: ENCINA DEMOLITION Phase 4

TIME: 0630 hrs.

Persons Contacted: Ralph Wagner, NRG Project Director; Tommy Brister, NRG Site Safety Manager; Dave Michelsen, NRG Project Manager, Scott Smith, Encina Plant Manager

DESCRIPTION of VISIT & FINDINGS:

1.) Arrived at Guard Station presented my ID Badge at 0630 hrs. Met with Tommy Brister, NRG CSS, Dave Michelsen, Project Manager. Discussed current status of work. Workforce continues to be at 100 craft and supervisors. On site the largest single work group continues to be the abatement crews. There is continuing Asbestos removal activity in Unit #2 & Unit #1. Approximately 60 workers are engaged in that effort daily. Turbine Foundations in Unit #4 have been removed completely. Unit #5 superstructure is currently the focus of heavy demo. Structural supports are removed after internal equipment is extracted from the east side of the Unit. Clean up of rebar and steel components are loaded onto trucks to be hauled to the recycler. All trucks are weighed on the scale at Gate #3 before exiting the site. Fifteen Trucks daily are removing scrap metal materials offsite. Soil import activity is completed approx. 32,000 cu. yds. have been moved onsite for backfill around the power station. Unit #3 ACM roofing material is in process of removal once removed and dropped in enclosed chutes into sealed containers it is moved into sealed debris boxes and removed from site. Turbine Roofs at Unit #1, #2, & #3 are ongoing work for removal. Final Cleaning in the basement area of Unit #3 is completed. As ACM removal is completed in Units #1 & Unit #2 Final Cleaning will be undertaken Final Air Clearance will be done at completion of cleaning. Backfilling is underway in below floor discharge tunnels. Addition of a double shift is in planning stages for Encapsulation Work in Unit #1 & Unit #2 a decision has not been made however at this time. At the end of the day Ralph Wagner, NRG Project Director and I took a detailed tour of the remaining planned demo activity outside the power plant footprint including the WWTT Tanks and Pumps, Warehouse Structures on the Southeast corner of the project site as well as locations and elevations of final grade at the conclusion of backfill activity onsite. I found it informative and a very detailed illustration of how extensive the project is. I appreciated Ralph's time and explanations through the afternoon.

RECOMMENDATIONS:

Going forward as the site demo becomes increasingly mechanized the crew size onsite will be reduced from the daily 100 men and women at this time to approx. 35-40 equipment operators and supervision. There will continue to be foot traffic onsite as spotters and flagmen are spread across the site. The reduction in crew does not lessen the potential for accidents or injury, heavy equipment, numerous types moving in erratic directions performing demo work are dangerous environs for operators and foot traffic onsite. Increased vigilant supervision is required to ensure the safety of all workers. Dust and obscured vision from all demo activity are also a concern. Dust protection masks should be worn by all foot traffic, operators in equipment with environmental cabs are protected all others are not. **Required PPE should be rigidly enforced onsite.**

Completed ACM abatement per Unit is as follows:

| Unit #1 | 90% |
|---------|------|
| Unit #2 | 90% |
| Unit #3 | 100% |
| Unit #4 | 100% |
| Unit #5 | 100% |

Asbestos Roof Panels still remain in Units #1, #2, #3 and a portion of Unit #4

Transite Panel Abatement:

```
100% Abated 0% Remaining
```

Completion of Abatement onsite Scheduled for Fall 2021

Turbine Machinery Status Removal:

| Unit #1 | Completed | 100% |
|---------|-----------|------|
| Unit #2 | Completed | 100% |
| Unit #3 | Completed | 100% |
| Unit #4 | Completed | 100% |
| Unit #5 | Completed | 100% |

Structural Demo Percentages Completed

| Unit #1 | 0% none completed |
|---------|-------------------------------|
| Unit #2 | 0% none completed |
| Unit #3 | 0% none completed |
| Unit #4 | Turbine Fdn. 100% completed |
| Unit #5 | W. Struct Steel 45% completed |
| | Turbine Fdn. 100% |

Site Work Force.

| Brandenberg Supervisors/Managers & | 100 |
|------------------------------------|-----|
| Brandenberg Craft Workers onsite | |
| Morrow Meadows Electric onsite | 0 |
| Pullman Demolition | 0 |
