## Recommissioning Activity Report for March 2021 And Confidential Appendices

Submitted May 10, 2021

Pursuant to COM-4, and as part of Geysers Power Company’s (“GPC”) ongoing efforts to keep the Energy Commission informed of fire system recommissioning activities at the Geysers, GPC is providing this report summarizing the recommissioning activities at Sonoma (Unit 3), Quicksilver (Unit 16), Lakeview (Unit 17), Socrates (Unit 18), Calistoga (Unit 19), and Grant (Unit 20), collectively referred to herein as “the Geysers.” This report covers recommissioning activities during April 2021 (April 1-30, 2021) and provides recommissioning schedule updates.

### 1. **Fire Protection Project Status**

The Fire Protection Recommissioning project at the Geysers continued in the month of April. The gland seal steam inspections at Units 18 and 20 were completed in April. In addition, the Unit 17 wetting system was inspected. Comments were received from the CEC on the Unit 16 Basis of Design Narrative and Re-Commissioning Plan. The CEC requested that the Re-Commissioning Plan and the Basis of Design Narrative (“BOD”) be separated. Accordingly, GHD is working on revising the Unit 16 Re-Commissioning Plan and BOD, which will be submitted in May. GHD is also working on the design details for the deluge system for the Unit 3 turbine bearings to replace the inactive CO<sub>2</sub> system.

While implementation of some of the projects slowed due to delays in personnel availability resulting from COVID and the imposition of pandemic restrictions, recommissioning activities continue to progress.
