Sizing Up the Challenges in Extracting Lithium from Geothermal Brine

Dear Ms. De Jong and members of the Lithium Valley Commission,

I am sharing a link to "Sizing Up the Challenges in Extracting Lithium from Geothermal Brine" published in Berkeley Lab's Newscenter November 29 -- https://newscenter.lbl.gov/2021/11/29/sizing-up-the-challenges-in-extracting-lithium-from-geothermal-brine/. This discusses the Energies review surveying lithium extract technologies, authored by Will Stringfellow and Patrick Dobson, both of whom are members of Berkeley Lab's Lithium Resource Research and Innovation Center (LiRRIC). I thought that this summary may be helpful to the Commission members and stakeholders.
