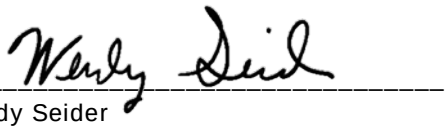
RAMBOLL

ENVIRONMENT
& HEALTH

SIGNATURE AND ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Wendy Seider
Principal

1. SUMMARY OF CONCLUSIONS

1.1 Introduction

The Environment & Health group of Ramboll US Consulting, Inc. (Ramboll)[1] was retained by SI SVYL2, LLC, a Delaware limited liability company (Stack or the "Client") to conduct a Phase I Environmental Site Assessment (ESA) of the Olympus Corporation of the Americas (Olympus or the "Company") facility at 2400 Ringwood Avenue in San Jose, California (the "site" or the "facility").

The objective of the Phase I ESA, which was conducted in conformance with the scope and limitations of ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* E1527-13 (the "ASTM Standard"), was to identify Recognized Environmental Conditions (RECs), as defined in the ASTM Standard.

To help evaluate the business risk of the identified environmental findings, Ramboll considered various factors, exercised its judgment, and categorized these findings, based on a significance threshold of $50,000, as follows:

> *Significant* – Confirmed or otherwise demonstrated impairment of environmental media that typically would require expenditures in excess of the significance threshold.
>
> *Potentially Significant* – Potential impairment of environmental media that has not been confirmed or otherwise demonstrated through appropriate collection of data or technical analysis. Expenditures in excess of the significance threshold could be required if potential impairment were to be confirmed.
>
> *Unlikely Significant* – Issues that are not expected to result in expenditures in excess of the significance threshold.

Table 1.1 presents an overview of Ramboll's key findings and the business risk that these findings represent, and additional discussion of the individual findings is presented in Section 1.2 below. The findings and conclusions of Ramboll's Phase I ESA are presented in Section 3.7 of this report.

Table 1.1: Overview of Ramboll's Key Findings

Finding (and ASTM Characterization [1], where applicable)		Business Risk
Phase I Environmental Site Assessment		
Potential for Migration of Contamination from Off-site Property	Other Finding	Unlikely Significant
Past Use of Site for Residential Purposes and Agricultural Orchards	Other Finding	Unlikely Significant

Notes:

[1] See Chapter 4 for definitions from the ASTM Standard.

[1] Ramboll was previously known as Ramboll US Corporation, Ramboll Environ US Corporation, and ENVIRON International Corporation.

1.2 Summary of Phase I ESA

Olympus leases and operates a medical equipment servicing facility in San Jose, California. The approximately 6.2-acre site is improved with an approximately 80,000-square-foot building.

The site was farmland, including orchards, from at least 1939 until the existing building was constructed in 1996 for its current use as a medical equipment servicing facility. Olympus has leased the site since 2010 from the current owner, Ringwood LLC.

Recognized Environmental Conditions

Ramboll performed a Phase I ESA of the site at 2400 Ringwood Avenue in San Jose, California in conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 3.8 of this report. This assessment has revealed no RECs in connection with the site.

Other Findings

Although not considered RECs, Ramboll identified the following other findings. The term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

- **Potential for Migration of Contamination from Off-Site Property.** Based on documentation provided by the Client, the south adjacent property (i.e., 1849 Fortune Drive) was used for the fabrication of semiconductor microchips from the early 1980s to 2016, which involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning. These activities included the use of solvents, gases, acids, and other chemicals. The facility underwent decommissioning and closure activities between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-site disposal of arsenic-impacted soils from this area to commercial/industrial cleanup standards or background levels). The facility closure activities did not involve the collection of soil gas or groundwater samples or the collection of soil samples in areas of the site other than in the vicinity of the former acid neutralization system. Given that this property is located in a presumed upgradient direction as compared to the subject site, that no groundwater sampling is known to have been conducted, and that past industrial operations dating back to the early 1980s were reasonably chemically intensive, Ramboll cannot rule out the possibility of contaminant migration onto the subject site from this off-site source. However, Ramboll notes that no groundwater contamination has been identified to date, the adjoining facility was decommissioned to the satisfaction of regulatory authorities in 2019, this facility is not under regulatory scrutiny related to contamination matters, and there is no apparent impetus to trigger regulatory scrutiny at present. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product to the subject site related to this matter, it is not considered a REC. Further, if contamination associated with off-site properties is found to have migrated onto the subject site, it is expected that any remedial activities would be the responsibility of the entities named in the listing or other designated responsible party and not Olympus. As such, this finding is considered unlikely significant from a business risk perspective.

- **Past Use of Site for Residential Purposes and Agricultural Orchards.** The site was previously used for agricultural purposes, including for fruit orchards, from at least 1939 until the

1980s. During this time period, a few residences and associated outbuildings were present on the site to the west of the road that bisected the site. The residences and outbuildings may have used aboveground or underground fuel oil tanks for heating purposes and for farm vehicle fueling. Ramboll was not provided with any specific information regarding historical agricultural chemical use, but past orchard operations may have involved the application of arsenical and lead-based pesticides commonly used on orchards in the first half of the 20th century, or other organic pesticides commonly used on orchards thereafter. Facility personnel reported no knowledge of past subsurface testing for any pesticides. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product related to this matter, it is not considered a REC; however, absent further information, the potential presence of these compounds in the site subsurface cannot be ruled out. Ramboll notes that this matter is unlikely to result in regulatory scrutiny, assuming no changes to site use. Ramboll further notes that the use of such substances in this region (which is and has been historically widely used for fruit production) would have been fairly widespread and ubiquitous.

A discussion of one *de minimis* condition identified during this review is presented in Section 3.7 of this report.

2. INTRODUCTION

2.1 Scope of Work

Ramboll conducted a Phase I ESA of the Olympus facility in San Jose, California. The environmental review relied on the references noted below and included the following tasks:

- A visit to the site by Emily Cox of Ramboll on October 7, 2020 to observe the exterior and interior features of the site and to identify the uses and conditions specified in Sections 9.4.1 through 9.4.4.7 of the ASTM Standard. In addition, Ramboll observed the adjoining properties from the site or adjacent public thoroughfares. Photographs taken during the site visit are presented in Appendix A.
- A phone interview prior to the visit on October 6, 2020 and an additional interview during the visit with George Greene, Facilities Associate Manager at the site since 2006. The aforementioned individual is referred to herein as "facility personnel." The facility personnel interviewed by Ramboll were identified by the Company as having good knowledge of the uses and physical characteristics of the site.
- A review of information contained in federal and state environmental databases, as obtained from the sources noted below:
  - A radius report prepared by Environmental Data Resources, LLC (EDR, see Appendix B), which presents the results of searches of federal and state databases for the subject site, as well as properties near the subject site. The radius searched for each database, as well as the databases themselves, were selected in accordance with the ASTM Standard.
  - The U.S. Environmental Protection Agency's (USEPA's) Envirofacts database, which provides site information contained in multiple USEPA regulatory databases.
  - The USEPA's Enforcement and Compliance History Online (ECHO) database, which provides information on sites' enforcement and compliance history.
  - The California GeoTracker and EnviroStor databases, which contain contamination-related information from the State Water Resources Control Board (SWRCB) and Department of Toxic Substances Control (DTSC), respectively.
  - The California Hazardous Waste Tracking System (HWTS), which provides information from waste manifests submitted to the DTSC, and the Stormwater Multiple Application and Report Tracking System (SMARTS), which provides information on stormwater permits, violations, and monitoring reports.
  - The California Environmental Protection Agency (CalEPA) Regulated Sites Portal, which provides compliance-related information for facilities throughout the state.
  - The California Geologic Energy Management Division (CalGEM) Wellfinder tool, which contains information on oil and gas, dry, injection, and extraction wells.
- A review of standard historical sources and local agency inquiries, as defined in the ASTM Standard. The following resources were reviewed:
  - Readily available historical sources (as identified in Section 3.2 of this report and included as Appendix C) to develop a history of the previous uses of the site and surrounding area.

  - Local building permit information from the San Jose Department of Planning, Building, and Code Enforcement, as obtained from EDR.
  - Historical and site-specific information obtained from the following local agencies: the County of Santa Clara Office of the Assessor, San Jose Fire Department (SJFD), and Santa Clara County Department of Environmental Health (SCCDEH). Ramboll also attempted to obtain information from the Santa Clara County Fire Department, but personnel from this agency reported having no information pertaining to the site.

- A review of documents provided to Ramboll by facility personnel, including property condition reports, correspondence with regulatory agencies, facility-prepared plans and procedures, and seismic assessments. In addition, Ramboll was provided with the following previous environmental assessment reports for the site and the south-adjoining property:
  - *Trade Zone Blvd. & Ringwood Ave. Phase I Environmental Audit Post Construction,* prepared by WHF, Inc., Environmental & Engineering Group (WHF), dated December 1996 (the "1996 Phase I report); and
  - *Phase I Environmental Site Assessment, Olympus America, Inc.*, prepared by Clayton Group Services, Inc. (Clayton), dated October 2006 (the "2006 Phase I report");
  - *Phase I Environmental Site Assessment, Microchip Fab Plant*, prepared by Partner Engineering and Science, Inc (Partner), dated April 2017 (the "2017 Adjacent Property Phase I report"); and
  - *Soil Sampling Activities, Former Micrel Manufacturing Facility,* prepared by Geosyntec Consultants (Geosyntec), dated October 2018 (the "2018 Adjacent Property Soil Sampling report").
- A review of physical setting sources, as defined in the ASTM Standard, including:
  - The current USGS 7.5-minute topographic map that shows the area on which the site is located.
  - Geologic, hydrogeologic, or hydrologic sources as provided in the EDR report and in the above-listed previous reports.
- A search for environmental liens or other activity and use limitations (AULs), provided by the third-party database provider (as shown in Appendix D). Ramboll ordered the lien search using the parcel number identified by the local tax assessor's office and other online resources as being associated with the main portion of the site.

2.2 Reliance and General Limitations

This report has been prepared for the exclusive use of Stack and may not be relied upon by any other person or entity without Ramboll's prior express written permission.

This report is considered current only for a period of 180 days from the site inspection. The conclusions presented in this report represent Ramboll's best professional judgment based upon the information available and conditions existing as of the date of the review. In performing its assignment, Ramboll must rely upon publicly available information, information provided by the client and information provided by third parties. Accordingly, the conclusions in this report are valid only to the extent that the information provided to Ramboll was accurate and complete. This review is not intended as legal advice, nor is it an exhaustive review of site conditions or facility compliance. Ramboll makes no representations or warranties, express or implied, about the conditions of the site.

Ramboll's scope of work for this assignment did not include collecting samples of any environmental media. As such, this review cannot rule out the existence of latent conditions, and is intended, consistent with normal standards of practice and care, to assist the client in identifying the risks of such conditions.

The scope of work for this assessment did not include an asbestos survey or inspection. According to federal OSHA regulations (29 CFR §1910.1001) and the Model Accreditation Plan (MAP; 40 CFR Part 763, Subpart E, Appendix C), the inspection, testing, evaluation, and/or sampling of suspect asbestos-containing materials must be conducted by an accredited inspector; these activities were not performed as part of this environmental review. Comments in this report regarding the condition of building materials at the site, including presumed or suspect ACM, represent only Ramboll's observations at the time of the site visit and are not intended to be consistent with definitions regarding ACM condition in the Asbestos Hazard Emergency Response Act (AHERA) or in other federal or state asbestos regulations or industry standards.

Other issues considered outside the scope of the ASTM Standard and this review include regulatory compliance, asbestos-containing materials, off-site waste management facilities, radon, lead-based paint, lead in drinking water, wetlands, polychlorinated biphenyls (PCBs) in building materials, cultural and historic resources, ecological resources, endangered species, fire safety, and high voltage power lines.

3. PHASE I ENVIRONMENTAL SITE ASSESSMENT

3.1 Site Setting

Olympus leases and operates a medical equipment servicing facility located at 2400 Ringwood Avenue in San Jose, Santa Clara County, California (the "site" or the "facility"). The approximately 6.2-acre site is located approximately 4.5 miles north of downtown San Jose (Figure 1).

The site is developed with an approximately 80,000-square-foot building, which is located in the center of the property. The single-story building houses production, storage, shipping/receiving, training, customer service, and office operations (Figure 2). Other smaller structures on the site consist of a trailer containing a concrete pad-mounted emergency generator and two temporary trailers used for warehouse employee bathrooms and a breakroom during the COVID-19 pandemic.

The primary site access is from Trade Zone Boulevard at the northern site boundary. Asphalt-paved parking areas are located on all sides of the building, and two paved shipping/receiving loading docks are located on the south side of the building. The area east of the building is landscaped with grass and a large dirt patch. There are no on-site surface water bodies. Table 3.1 provides an overview of physical setting and utility information for the site.

Table 3.1: Physical Setting and Utility Information

Conditions	Source	Description
Topography and Local Land Use		
Elevation (above mean sea level)	USGS topographic map; Google Earth	Ranges from approximately 44 feet near the northwestern corner to 48 feet near the southeastern corner.
Topographic Gradient	USGS topographic map; Visual observations	Relatively flat, with a gentle downward slope to the northwest. Regional topography slopes gently downward to the northwest.
Local Land Use	Visual observations	The facility is located in a mixed industrial and commercial land use area. North: Trade Zone Boulevard, beyond which is a residential neighborhood. West: Ringwood Avenue, beyond which is a church and an Amazon Delivery Station. Several commercial buildings with tenants including several machine shops and commercial printers are located to the southwest of the site. South: A vacant industrial property (former microchip semiconductor manufacturer) and offices for Microchip Technology, beyond which is Fortune Drive. East: Several commercial buildings including data centers and machine shops. Ramboll did not observe any conditions on adjacent properties that represent a potential contamination concern to the subject site.

Table 3.1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Nearest Residence	Visual observations	Adjacent to the north, approximately 80 feet north of the site.
Hydrology		
Storm Water Runoff	Visual observations	Percolates into the ground surface at unpaved areas or enters catch basins that discharge to the municipal storm sewer system.
Nearest Surface Water Body to the Site	USGS topographic map; Visual observations	Penitencia Creek located 0.25 miles west-northwest. The tributary ultimately discharges to Coyote Creek, a northerly-flowing creek located 1.1 miles east.
Flood Plain	FEMA*; Facility personnel	Facility personnel reported no known occurrences of flooding at the site. The entire site is located within a 100-year flood zone.
Wetlands	NWI*	No on-site federally designated wetlands.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	1996 Phase I report; USGS topographic map	Information obtained from the Santa Clara Valley Water District in the 1996 Phase I report indicated that groundwater flows in a northwest direction. This is consistent with surface topography.
Depth to Groundwater	1996 Phase I report	Local hydrological information obtained from the Santa Clara Valley Water District as part of the 1996 Phase I indicated that groundwater in the vicinity of the site averaged five feet below ground surface (bgs) in unspecified water level measurements taken in September 1992.
On-site Wells	Facility personnel; Visual observations	No production, monitoring, or oil/gas wells.
Nearest Groundwater Supply Wells	Database report	No federally registered wells are present within one mile of the site. One private or municipal well that may be used for water supply was identified between one-half mile and one mile west-northwest of the site.
Geologic Conditions	2018 Adjacent Property Soil Sampling report	Based on 2018 soil sampling at the site adjacent to the south, the soils in the vicinity are underlain by a combination of lean clay, clayey sand, and silt to a depth of 25 feet below ground surface (the boring termination depth).

Table 3.1: Physical Setting and Utility Information

Conditions	Source	Description
Site Utility Information		
Heating and Cooling Equipment	Facility personnel	Natural gas-fired heating units supply building heat. The building is cooled with air conditioning units.
Natural Gas Service	Facility personnel	The site is provided with natural gas service.
Use of Fuel Oil for Building Heat	Facility personnel	No known current or former use of fuel oil for building heat.
Foam-based Fire Suppression System	Facility personnel	According to facility personnel, the site is not equipped with a built-in foam-based fire suppression system.
Water Supply	Facility personnel	The facility receives drinking water from the San Jose water system.
Sanitary Sewer	Facility personnel	The facility discharges its wastewater to the municipal sanitary sewer system.
Septic Systems	Facility personnel	No identified current or former septic systems.

Notes:

FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey; NWI = National Wetlands Inventory

* Source was provided in the environmental database report.

During the site visit, Ramboll walked or drove by the borders of the properties that are adjacent to the subject site. Ramboll did not enter the neighboring properties.

3.2 Historical Uses of the Site and Adjacent Sites

3.2.1 Past Uses of the Site

The site was farmland, including orchards, from at least 1939 until the existing building was constructed in 1996 for its current use as a medical equipment servicing facility. Olympus has leased the site since 2010 from the site owner, Ringwood LLC.

A summary of Ramboll's key observations from the available historical sources is presented in Table 3.2.

Table 3.2: Summary of Key Observations from Historical Sources for the Subject Site

Historical Source	Key Observations Regarding Site History
Aerial Photographs (1939, 1940, 1948, 1950, 1956, 1963, 1968, 1974, 1979, 1982, 1993, 1998, 2006, 2009, 2012, and 2016) Satellite Imagery[1] (1993 to 2000)	The site appears as farmland, including orchards, with a road bisecting the site on all photographs until 1982, when the western portion of the site appears cleared for construction. From 1950 until 1982, at least two structures are visible on-site to the west of the road. The 1999 and subsequent photographs show the site in its present configuration, with one building present. No concerns are noted.
Topographic Maps (1889 to 2012)	No development is depicted until 1953, when the map depicts three structures to the west of the road in the central portion of the site. All subsequent maps depict three structures on the site, until the 2012 map, in which no development is depicted.
City Directory Abstracts (1922, 1925, 1926, 1930, 1931, 1935, 1936, 1940, 1942, 1945, 1946, 1950, 1955, 1957, 1960, 1962, 1963, 1964, 1965, 1966, 1968, 1970, 1974, 1975, 1978, 1980, 1982, 1985, 1986, 1994, 1996, 1999, 2000, 2001, 2004, 2006, 2009, 2014, and 2017)	The address was not listed on any directories until 1999. The occupants of the site are listed as: Olympus America Incorporated/Olympus America Inc/Olympus America/Olympus Medical Equipment Services I/Olympus (1999-2017) and Ako Hayashi, Shinichi Harada, Yasuhiro Kikuchi, and Yoichi Murata (2004). It is unclear why specific individuals are listed in the city directory in 2004, as other historical information confirms that the site was occupied by Olympus during that time period.
Lien Search Report	The lien search report indicates that Ringwood LLC acquired the site in 2010 from Los Angeles Royal Vista Golf Courses, Inc. No liens or AULs are associated with the site.
Santa Clara County Tax Assessor Website	Tax assessor records indicate that the deed for the site was last transferred on December 3, 2010. The Assessor's Parcel Number (APN) is 244-17-014.
San Jose Fire Department	The 2006 Phase I report reviewed files from 1996 to 2002 and describes the documents as inspection records and permits for fire sprinklers. Documentation reviewed by Ramboll included Hazardous Materials Business Plans (HMBPs) from 2004, 2006, 2010 – 2014, and 2016, which reported hazardous materials such as etchants, lithium ion batteries, cleaners, epoxy adhesives, and hardeners. Documentation provided also included records of fire prevention inspections from 2004, 2006, 2008, 2011, and 2017 – 2019. The only violation noted was compliance-related and has since been corrected.
City of San Jose Building Department	According to building permits provided by EDR, the exterior concrete pad for the generator was installed in 2005. Electrical lifts were installed in the warehouse in 200, and the air conditioning unit was updated in 2007.

Table 3.2: Summary of Key Observations from Historical Sources for the Subject Site	
Historical Source	**Key Observations Regarding Site History**
Santa Clara County Department of Environmental Health	Documentation provided by the SCCDEH included notices of inspection from the Hazardous Materials Compliance Division from 2011 and 2016. Violations were compliance-related and have since been corrected. Other documentation included correspondence, HMBPs, and a hazardous waste generator permit application that notes all hazardous wastes are shipped off-site for recycling/treatment/disposal.
Notes: [1] In addition to aerial photographs provided by the third-party provider, Ramboll viewed historical satellite imagery provided via Google Earth. Printed copies were not obtained, and imagery dates were not independently verified. The third-party provider reported that Sanborn fire insurance map coverage is not available for the site.	

3.2.2 Past Uses of Adjacent Sites

The properties adjacent to the site were used for agricultural purposes, including orchards, from at least 1939 to 1968, with industrial development present starting in the 1970s. Notable operations on surrounding properties include grinding operations (adjacent to the west in the 1986 city directory), automobile repair (adjacent to the west in the 1991 city directory), and machining shops (adjacent to the west in the 2017 city directory and database report in 2018). In addition, properties to the north were developed with industrial buildings sometime prior to 2016, when the properties were redeveloped as residential condos. Database listings for adjacent sites are further discussed in Section 3.4.2.

Additionally, based on Ramboll's review of documentation provided by the Client, the property adjoining to the south was formerly used for the fabrication of semiconductor microchips by SEEQ Technology Incorporate (SEEQ) from the early 1980s to 1995 and by Micrel Semi Conductor Inc. (Micrel, later acquired by Microchip Technologies) from 1995 until 2016. These past operations involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning, which included the use of solvents, gases, acids, and other chemicals. Of note, these past operations involved the use of an acid waste neutralization system (which appears to have been comprised of epoxy-coated subgrade trenches containing piping, and a sump as well as aboveground process tanks),[2] generation of hazardous wastes, and use of two vapor degreasers containing halogenated solvent presumed to be trichlorotrifluoroethane (Freon 113 or Blaco Tron TMS+) based on information in the 2017 Adjacent Property Phase I report (a 1992 regulatory inspection noted a solvent leak that was reportedly contained and cleaned up, but no details were available). The facility underwent decommissioning and closure activities between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-site disposal of arsenic-impacted soils from this area to commercial/ industrial cleanup standards or background levels). The facility closure activities did not involve the collection of soil gas or groundwater samples or the

[2] The site is listed on environmental databases related to a subgrade 375-gallon acid waste sump and a 350-gallon waste underground storage tank (UST). The 2017 Adjacent Property Phase I report suggests that one or both of these features may have been part of the former acid neutralization system, discussed further in Section 3.4.2.

collection of soil samples in areas of the site other than in the vicinity of the former acid neutralization system. This matter is further discussed in Section 3.7.3.

3.3 Current Use of Site

The site is currently used by Olympus for medical equipment servicing, which involves receiving damaged endoscopes and endoscope support equipment, cleaning, repairing, testing, and shipping repaired equipment. Ancillary operations at the facility include administrative activities, office operations, equipment rentals for use during longer repairs, and building maintenance. The primary materials used at the site are isopropyl alcohol for wipe cleaning and a proprietary glue. Additionally, graphite powder is used as a lubricant. Maintenance-related chemicals and janitorial supplies, including sanitizers and detergents, are used in small quantities (containers of five gallons and smaller). Facility personnel knew of no use of chlorinated solvents by the Company. According to facility personnel, Olympus's operations have remained generally consistent during its period of occupancy at the facility.

3.4 Database Review for the Site and Surrounding Properties

3.4.1 Database Review for the Site

Ramboll reviewed the results of the state and federal environmental database searches performed by a third-party database provider (see Appendix B) and also reviewed information available in the California databases. The site is listed on several environmental databases related to hazardous materials and hazardous waste, as discussed in Table 3.3.

Table 3.3: Summary of Environmental Database Listings for the Site

Summary of Information Contained in Database	Ramboll's Comments
Olympus America is listed on the California Environmental Reporting System Hazardous Waste (CA CERS HAZ WASTE), California Certified Unified Program Agency (CA CUPA) Listings, Facility and Manifest Data (HAZNET), DTSC HWTS, CA CERS, and California Hazardous Materials (CA HAZMAT) databases related to hazardous waste generation. Wastes generated in 2019 included laboratory waste chemicals, unspecified aqueous solution, waste oil and mixed oil, and oxygenated solvents. The only violations listed are compliance related. Olympus America Inc is listed on the Resource Conservation and Recovery Act Non Generator/No Longer Regulated (RCRA NonGen/NLR) database as a non generator from 1996 through 2018.	The listings do not suggest a contamination concern to the site.

Notes:

The site is also listed on the following databases related to regulatory compliance: Envirofacts, ECHO, California Emissions Inventory Data (CA EMI), and Facility Index System/Facility Registration System (FINDS). Listings on these databases, by themselves, are not necessarily indicative of contamination.

3.4.2 Database Review for Adjoining Properties

Based on a review of the environmental database search report, Ramboll identified the adjoining sites listed in Table 3.4 on databases indicative of a potential contamination concern.

Table 3.4: Contamination-Related Database Listings for Adjoining Properties [1]		
Listing Name or Address and Location Relative to the Subject Site	**Summary of Information Contained in Database**	**Ramboll's Comments**
Trade Zone Blvd - Pick Your Part (Formerly adjoining to the north)	The property is listed in the Cleanup Program Sites – Spills, Leaks, Investigations, and Cleanups (CPS-SLIC) and CERS databases in association with soil and groundwater contamination due to historic steam cleaning activities for auto dismantling conducted since at least 1965. The matter was granted regulatory closure from SCCDEH on April 20, 2012 pursuant to site use and management restrictions intended to address residual impacts. The property has since been redeveloped with residential condominiums.	Because the matter has been granted regulatory closure by the state agency and the property redeveloped, it is reasonable to assume that the matter was appropriately evaluated in accordance with regulations in place at the time, and that remaining contamination, if any, is localized and unlikely to migrate at significant levels onto the subject site. Additionally, this site is located in the presumed down-gradient to cross-gradient direction from the site. Thus, this closed off-site listing does not appear to represent a significant concern to the subject site.
Micrel Inc (Adjoining to the south)	The former occupant, Micrel, is listed on the EnviroStor Permitted Facilities Listing (HWP) and the EnviroStor database as an inactive tiered permit site and as a Protective Filer related to past hazardous waste treatment activities. A closure letter available on EnviroStor indicates that Micrel's fixed treatment unit was granted closure on August 1, 2018. The letter also notes that subsequent soil sampling reports identified arsenic contamination above background levels. Soil was excavated, profiled as non-hazardous concrete debris, and disposed of at Clean Harbors Buttonwillow, LLC in Buttonwillow, California.	Based on Ramboll's review of records provided by the Client, facility decommissioning activities identified impacts to soil by arsenic that were excavated to commercial/industrial standards. Further discussion of potential impacts from this property is presented in Section 3.7.3.

Table 3.4: Contamination-Related Database Listings for Adjoining Properties [1]

Listing Name or Address and Location Relative to the Subject Site	Summary of Information Contained in Database	Ramboll's Comments
Stack Infrastructure Expansion (Adjoining to the east)	The property is listed with open status on GeoTracker as of August 24, 2020 related to a Remedial Action Agreement with SCCDEH in association with verification monitoring due to tetrachloroethene (PCE) discovered at a concentration of 480 micrograms per cubic meter (g/m^3) in one soil sample in April 2019. This concentration exceeds the San Francisco Regional Water Quality Control Board (SFRWQCB) Human Health Risk (Commercial) Environmental Screening Level (ESL) for a commercial land use scenario of 67 g/m^3. Additional soil sampling detected PCE concentrations over the ESL at a sampling location south of the proposed building footprint. No other volatile organic compounds (VOCs) were reported over laboratory detection limits, except for 1,1-dichloroethene at 3.5 $\mu g/m^3$ (under its ESL of 2,400 $\mu g/m^3$). Based on the findings of the 2019 soil investigations, SCCDEH did not require vapor mitigation for the planned building.	The most recent soil and groundwater sampling completed in April 2019 by Cornerstone Earth Group (Cornerstone) reported did not identify VOCs in excess of commercial ESLs in soil and groundwater samples taken between the source area on the adjacent site and the subject site. Similarly, the most recent soil vapor sampling completed in July 2020 by Cornerstone did not identify VOCs (including PCE) at concentrations above commercial ESLs in soil vapor samples taken between the source area on the adjacent site and the subject site. Contamination appears to be limited to soil and soil vapor on the property, with no VOC impacts to groundwater. Thus, although investigations are ongoing, this listing is unlikely to represent a significant concern to the subject site.

Notes:

[1] Ramboll's analysis of adjoining sites was based on observations made during the site reconnaissance and location information for off-site listings as presented in the database report. Also, for purposes of this analysis, Ramboll considers as "adjoining" properties that are adjacent, even if separated by a road or other physical barrier. Ramboll has not included a discussion of compliance-related databases in this table, as Ramboll considers it unlikely that off-site properties listed on compliance-related databases without indication of a release or chemical mishandling represent a potential risk for contamination to the subject site.

3.4.3 Database Review for Other Surrounding Properties

There are several listings in the environmental database report for non-adjoining off-site facilities within applicable ASTM search radii; however, Ramboll has not identified any properties that are likely to represent a potential contamination concern to the site.[3]

The database report indicates that poor or inadequate address information was available for several sites located in the vicinity of the subject site; therefore, these sites could not be readily mapped by the third-party provider. Because the location of these sites with respect to the subject site could not

[3] In its evaluation, Ramboll considered only non-adjoining sites listed on databases indicative of contamination, with open status, located within one-quarter mile potentially upgradient of the site to represent a potential risk for contamination to the site (as the issuance of regulatory closure suggests that impacts to the subject site from the noted off-site property are unlikely).

be evaluated, Ramboll is limited in its ability to express an opinion regarding the potential for impact to the subject site from these sites. It was beyond the scope of this review to accurately locate each of the unmapped sites identified in the database report; however, Ramboll reviewed the list of unmapped sites and verified that none appeared to be adjacent to the subject site.

3.5 Materials Storage

3.5.1 Underground Storage Tanks and Other Subgrade Structures

According to facility personnel, there are no current or former underground storage tanks (USTs) at the site, nor was evidence of such (e.g., vent pipes, fill ports, or dispensing equipment) observed by Ramboll during the site visit or in the review of records pertaining to the site. According to the environmental database report and California databases, the site is not listed on the UST database.

Although not considered to be a UST, a janitorial mop-sink is located in each of the janitor closets near employee restrooms for collection of floor wash water. Ramboll was not able to observe the integrity of each of the sinks at the site during the site visit; however, sinks that were able to be observed by Ramboll appeared to be in good condition and did not contain oils or lubricants. Additionally, a storm drain covered by mesh to catch leaves and refuse is located under each of the two loading docks on the site. Facility personnel noted that vehicle maintenance and washing were not performed at the site. The storm drains collect rainwater and appeared to be in good condition with no indication of spills or leaks extending into the drains.

3.5.2 Aboveground Storage Tanks

A 125-gallon double-walled diesel fuel tank is located inside the emergency generator enclosure on a concrete pad. Facility personnel reported that there are no current or former underground transfer lines used to convey the materials from the tank. Facility personnel knew of no leaks or spills relating to the AST, and Ramboll did not observe evidence of staining or past releases at the time of the site visit. Also, compressed air is stored in two 100-gallon ASTs located south of the main building in the emergency generator enclosure; these tanks are not viewed as a potential sources of environmental contamination given that they hold air.

3.5.3 Drum and Other Storage Areas

Chemical storage at the site is limited to proprietary glue (stored quantities under 20 gallons in a heating unit on the shop floor), isopropyl alcohol (stored in one-gallon containers in the chemical storage room), small quantities of lubricating oils (stored in a flammable material storage cabinet in the chemical storage room), and janitorial and maintenance chemicals (stored in janitorial closets near the employee restrooms).

Wastes are collected in a compactor (cardboard) and dumpsters (recycling and general trash), which are positioned on pavement south of the building. Shipping foam is collected on the loading dock for recycling by a third party. Isopropyl alcohol-contaminated wipes are collected in labeled hazardous waste containers for disposal. Empty isopropyl alcohol containers are allowed to air-dry on a laboratory hood in the chemical storage area prior to being discarded in the general recycling dumpster.[4] Electronic waste and other universal wastes (e.g., used batteries, bulbs, ballasts) are separated into labeled universal waste bins before being picked up as needed by a vendor.

[4] This practice or air drying the containers is not considered to represent a contamination concern to the site, but may pose a regulatory compliance concern if the containers are non-empty prior to drying.

No evidence of release was observed in these areas. Chemicals are not stored in exterior areas of the site.

3.6 Polychlorinated Biphenyls

Facility personnel knew of no on-site equipment that is known to contain PCBs. There are currently two pad-mounted transformers on the property; the units are owned by the utility. The units are not labeled as to their PCB content. Because the units were likely installed at the time of the site development in 1996, after the 1979 federal ban on the manufacture of PCBs, it is unlikely that the units contain PCBs.

Ramboll observed no indication of leaks or releases from electrical equipment during the site visit.

3.7 Soil and Groundwater Conditions (Findings, Opinions, and Conclusions)

Information on the soil and groundwater conditions at the site, as well as Ramboll's findings, opinions, and conclusions regarding any such conditions are presented in Sections 3.7.1 to 3.7.3 below. The findings of this assessment are classified based on the definitions in the ASTM Standard. A list of key definitions presented in the ASTM Standard is provided in Chapter 4 at the end of this report.

3.7.1 Prior Environmental Activities

Based on a review of historical site documents and interviews with facility personnel, prior environmental assessment activities have been conducted at the site, as summarized below. Pertinent historical and site-related information contained in the prior reports has been incorporated into other sections of this report.

- **1996 Phase I Environmental Site Assessment.** A Phase I ESA was conducted at the site by WHF in 1996, in association with a post-construction audit. The 1996 Phase I report did not identify any RECs or other contamination concerns with respect to soil and groundwater conditions.
- **2006 Phase I Environmental Site Assessment.** A Phase I ESA was conducted at the site by Clayton in 2006, in association with a real estate transaction. The 2006 Phase I report did not identify any RECs or other contamination concerns with respect to soil and groundwater conditions.

3.7.2 Known Site Conditions

Facility personnel knew of no soil or groundwater contamination at the site. Ramboll did not observe visual evidence of significant contamination (e.g., extensive staining on unpaved areas, spills or releases, or stressed vegetation). According to the database report and as detailed in Section 3.4, the facility is not listed on environmental databases that are indicative of a contamination concern. The site is currently not the subject of regulatory scrutiny or enforcement actions related to soil or groundwater conditions. Ramboll's interviews with local regulatory personnel did not indicate any adverse conditions associated with the site. The third-party environmental lien search did not identify any environmental liens or AULs associated with the site. Based on the factors noted, there is no known contamination present at the site and little impetus to trigger regulatory scrutiny.

3.7.3 Potential Site Conditions

Ramboll observed the facility to have adequate housekeeping and chemical storage practices, and Ramboll did not observe any current or former features or structures of potential environmental

concern at the site (e.g., evidence of current or former USTs, dry wells, septic systems). Facility personnel knew of no current or former use of chlorinated solvents. The facility's operations are not chemically intensive, and the history of the facility's operations does not indicate a soil or groundwater concern.

Based on current information and conditions at the facility, Ramboll identified the following findings relating to potential site conditions:

- **Potential for Migration of Contamination from Off-Site Property.** Based on documentation provided by the Client, the south adjacent property (i.e., 1849 Fortune Drive) was used for the fabrication of semiconductor microchips from the early 1980s to 2016, which involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning. These activities included the use of solvents, gases, acids, and other chemicals. The facility underwent decommissioning and closure activities between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-site disposal of arsenic-impacted soils from this area to commercial/industrial cleanup standards or background levels). The facility closure activities did not involve the collection of soil gas or groundwater samples or the collection of soil samples in areas of the site other than in the vicinity of the former acid neutralization system. Given that this property is located in a presumed upgradient direction as compared to the subject site, that no groundwater sampling is known to have been conducted, and that past industrial operations dating back to the early 1980s were reasonably chemically intensive, Ramboll cannot rule out the possibility of contaminant migration onto the subject site from this off-site source. However, Ramboll notes that no groundwater contamination has been identified to date, the adjoining facility was decommissioned to the satisfaction of regulatory authorities in 2019, this facility is not under regulatory scrutiny related to contamination matters, and there is no apparent impetus to trigger regulatory scrutiny at present. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product to the subject site related to this matter, it is not considered a REC. Further, if contamination associated with off-site properties is found to have migrated onto the subject site, it is expected that any remedial activities would be the responsibility of the entities named in the listing or other designated responsible party and not Olympus. As such, this finding is considered unlikely significant from a business risk perspective.

- **Past Use of Site for Residential Purposes and Agricultural Orchards.** The site was previously used for agricultural purposes, including for fruit orchards, from at least 1939 until the 1980s. During this time period, a few residences and associated outbuildings were present on the site to the west of the road that bisected the site. The residences and outbuildings may have used aboveground or underground fuel oil tanks for heating purposes and for farm vehicle fueling. Ramboll was not provided with any specific information regarding historical agricultural chemical use, but past orchard operations may have involved the application of arsenical and lead-based pesticides commonly used on orchards in the first half of the 20th century, or other organic pesticides commonly used on orchards thereafter. Facility personnel reported no knowledge of past subsurface testing for any pesticides. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product related to this matter, it is not considered a REC; however, absent further information, the potential presence of these compounds in the site

subsurface cannot be ruled out. Ramboll notes that this matter is unlikely to result in regulatory scrutiny, assuming no changes to site use. Ramboll further notes that the use of such substances in this region (which is and has been historically widely used for fruit production) would have been fairly widespread and ubiquitous.

- **Limited Exterior Pavement Staining.** Ramboll observed areas of exterior pavement in the parking areas around the site building where oil stains were apparent. The stains were limited in areal extent, the underlying pavement appeared to be intact, and no stains appeared to reach storm water drains. As such, Ramboll considers this matter to represent a *de minimis* condition.

3.8 Analysis of Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. As such, this section provides a discussion of significant data gaps, if any, that were identified as part of this assessment.

Limiting conditions and deviations from the ASTM Standard for the assessment are discussed below.

- Facility personnel did not have current contact information for representatives of former site owners/occupants. Ramboll made reasonable attempts to obtain such information but it was not otherwise readily available. Thus, Ramboll was unable to interview former owners/occupants about historical operations and site conditions.
- Given the large volume (i.e., hundreds of pages) of documents provided to Ramboll by SJFD, Ramboll reviewed only the documentation post-dating the prior 2006 Phase I report (which also conducted a review of Fire Department files and summarized the results).
- During the site visit, Ramboll did not observe the roof of the building due to access and safety constraints.
- Historical information, such as aerial photographs, was not readily available to characterize the property from the present back to the property's obvious first developed use or 1940, whichever is earlier. The earliest readily available historical source that would indicate specific site uses is an aerial photograph, dated 1939, which shows that the property was already developed for agricultural uses. ASTM defines agricultural site use as a "developed" site use.

None of the exceptions, deletions, deviations, or site reconnaissance limitations noted above are considered to represent significant data gaps.

4. ASTM DEFINITIONS

The following definitions are presented in the ASTM Standard:

RECs - Recognized Environmental Conditions:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

CRECs - Controlled Recognized Environmental Conditions:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

HRECs - Historical Recognized Environmental Conditions:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

***De minimis* Conditions:**

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Data Gap / Significant Data Gap:

A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap is significant if other information and/or professional experience raises concerns involving the data gap.

Please note that the term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

APPENDIX B
ENVIRONMENTAL DATABASE REPORT

NOTES ON ENVIRONMENTAL DATABASE REPORT

The third-party provider conducted its searches for the standard environmental record sources and the minimum search distances, as specified by the ASTM Standard. The ASTM Standard uses the terminology "approximate minimum search distance" to refer to the radii searched in the environmental database report.

Because the environmental databases themselves are sometimes not updated by the specific regulatory agencies for periods of up to one year or more (depending on the database and the state), the database search conducted herein will not necessarily list any facility or site for which an environmental investigation/listing has been initiated subsequent to the last update.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 7

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 23 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 2 CA RESPONSE sites within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 40 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 31 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 9 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 44 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
HANDCRAFT TILE	***1696 SOUTH MAIN STRE***	***WNW 1/4 - 1/2 (0.425 mi.)***	***259***	***1681***

CA Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the CA Cortese list, as provided by EDR, and dated 06/22/2020 has revealed that there are 21 CA Cortese sites within approximately 0.5 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 102 CA CUPA Listings sites within approximately 0.25 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OLYMPUS AMERICA (Continued) **S103645077**

City,State,Zip: SAN JOSE, CA 95131
Site ID: 139940
CERS ID: 10350208
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 139940
Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 11/18/2016. Observed lead-free solder used in test line, however could not fully ascertain how it is being managed. Make a hazardous waste determination on any lead-free solder waste, and if determined to be hazardous, manage as a fully-regulated hazardous waste or as a scrap metal. Submit documentation to support your determination.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 139940
Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 11/18/2016. Hazardous materials inventory lists aromatic isocyanate as being stored in warehouse when in actuality it is stored in chemical room. Polysiloxane is listed as being handled in warehouse, however per facility staff, this chemical may have been replaced by the truefoam product observed on this inspection. Revise hazardous materials inventory and resubmit within 30 days.
Violation Division: Santa Clara County Environmental Health

Violation Source: CERS

Site ID: 139940
Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/18/2016. Observed 10-15 cardboard boxes containing 1 gallon containers of various hazardous wastes in the warehouse without the required markings. Affix hazardous waste labels to all hazardous waste containers.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 11/18/2016. A detergent waste is generated when cleaning parts off-site at trade shows across the United States. Waste detergent is then shipped to this facility to be managed as a hazardous waste. Facility does not have a TSDF permit from DTSC and therefore is not allowed to accept hazardous waste generated off-site. Immediately cease this practice and ensure that hazardous waste is managed properly at the point of generation.
Violation Division: Santa Clara County Environmental Health

Facility Status:	**Completed - Case Closed**
Status Date:	04/20/2012
Global Id:	T10000002508
Lead Agency:	SANTA CLARA COUNTY LOP
Lead Agency Case Number:	06S1E17N01s
Latitude:	37.403914672
Longitude:	-121.89382553
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	9
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil, Under Investigation
Potential Contaminants of Concern:	Acetone, Xylene, Lead, Nickel, MTBE / TBA / Other Fuel Oxygenates, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The site has been occupied by auto dismantlers since possibly 1965. Soil sampling was conducted prior to Pick Your Part leasing the property and again when their lease ended. They have proposed to do surface excavation in areas. No investigation has been conducted to determine if groundwater has been impacted.

Environmental Interest/Information System:
UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: PLASMA RUGGEDIZED SOLUTIONS
Violation Date: 08-15-2019
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 09/14/2019. Observed an accumulation of two-part exoxys, one part epoxys, and conformal coatings that were marked as "expired products" inside hazardous materials storage shed.Review of hazard descriptions indicate that these products meet hazardous waste criteria for ignitability. Per production engineer, items that are marked past listed expiration date cannot be used in coating process unless permission is granted by the customer. Non-usable items will either be mixed, left open under hood, or placed in oven until fully cured and disposed in trash. Per CCR 66260.10, "treatment" is defined as "any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery or reduction in volume. Facility must obtain a [Truncated]

Violation Date: 01-22-2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 03/25/2016. _____ HMBP has not been annually certified.

_____

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 57875
Site Name: PLASMA RUGGEDIZED SOLUTIONS
Violation Date: 08-15-2019
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 09/14/2019. Records demonstrating employees have been provided with Hazardous Materials emergency response/safety training was not available for review at time of inspection. A training template was provided at time of inspection.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-22-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous waste inspection. Facility encompasses 2284 Ringwood Ave, San Jose Suites A-C. Facility performs masking, unmasking, coating, and cleaning of electronic components. Performed a facility walk-through with Marlene Scoppettone (Quality Supervisor) and Mike Forney (Chief Technology Officer) and observed the following hazardous waste: -Solvent waste (combination of toulene/acetone/mek dependent upon need): 4 x 55 gallon drums in hazardous waste storage room in Suite A. Solvent waste consists of the following waste streams: 1. Solvent-contaminated debris: 1 x 5 gallon container in masking/unmasking room located in Suite A 2. Spray booth filters generated from 2 x spray booths located in Plasma/Conformal coating room in Suite A 3. Waste solvent from 1 x paint can cleaner located in Plasma/Conformal coating room in Suite A (containers used in this process are "California" empty) 4. Waste detergent from 1 x Trident defluxing system [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-15-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility performs masking, encapsulation and conformal coating of electrical components. Facility routinely generates solvent-borne related paint waste from cleaning of spray equipment. Notes: - EPA ID CAR000070714 (ACTIVE) - Facility performs cleaning of coated components using a 75% IPA/25% DI water solution. Spent solution is placed into a distillation unit which recycles and separates "dirty" DI Water from clean IPA. IPA is recycled and reused in process while the "dirty" DI water is drained in sanitary sewer. - Facility has 2 spray booths in which conformal coating activities take place. Booth filters are replaced daily to avoid contamination of non-compatible products. Review of SDS sheets indicate that all coating applied do not contain heavy metals as clear coating are only applied in this area. - Observed 1 CNC machine used for manufacturing of aluminum parts. Facility acquired machine approximately one year ago and has not needed coolant replacement [Truncated]

Eval Date:	05-08-2015
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous waste inspection. Site was formerly Cubic Machining. Optima Precision began operating at this location in December 2014. Facility is a CNC machine shop that works primarily with aluminum. Facility contains 4 CNC machines utilizing a closed-loop grease cooling system and Hangsterfer's S-506 oil. The following hazardous waste was observed on-site: -(Non-RCRA) oily water: 1 x 55 gallon container NOTES: -Facility intends to downgrade 55 gallon drum within 30 days. Upon change, facility will not require a hazardous materials business plan permit. -Facility has not disposed of hazardous waste yet, and therefore no disposal receipts were reviewed. -Facility corrected the following violation on-site during

CUBIC MACHINING INC (Continued) **S121738668**

the time of the inspection: G020 - No hazardous waste markings on a hazardous waste container -Facility has a temporary California EPA ID number (CAC002791784) but requires a permanent ID number. An ID number application was provided to [Truncated]

Violation Date: 07-22-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/28/2015.
Observed 1 x fire extinguisher last maintained in March 2014. Annually maintain all emergency response equipment.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 355542
Site Name: V & H PRECISION MACHINE
Violation Date: 07-22-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 07/28/2015.
No HMBP has been submitted to the California Environmental Reporting System (CERS). An invitation will be issued to vhprecision@gmail.com to create an account on CERS. Within 30 days, complete and submit the following (sections): -Facility information/ownership page -Hazardous materials inventory/site map -Emergency response plan/training plan NOTES: If you would like assistance with completing and submitting your HMBP, contact SCC HMCD Hazardous Materials Technicians Michelle Santos at (408)918-1981 or Jean Nguyen at (408)918-1955. Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/28/2015.
Observed 3 x approximately 1 qt or smaller drip collection containers located beneath 3 x leaking CNC machines. Establish a procedure for handling and management of these containers and the liquid contents within to minimize the occurrence of releases.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-17-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility operates 3 x CNC machines to manufacture aluminum, plastic, and stainless parts. Observed the following hazardous waste in northeast corner of shop floor: -Waste oily water: 2 x 5 gallon containers NOTES: -CAL000361731 is active -Scrap metal is recycled -Consolidated manifest was reviewed (most recent was 11/14/16) -Based upon this inspection the facility's permit will be revised to a PE2201 (waste oil only) -vhpprecision@gmail.com
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-22-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Conducted a facility walk-through with Mr. Linh Nguyen. Facility operates 3 x CNC machines and works primarily with plastic, aluminum, and steel. Observed the following hazardous waste: -7 x 5 gallon buckets of waste coolant/oil mixture Approximately once per year, coolant in CNC machines is changed-out and disposed of as "non-RCRA waste liquid used oily water". The following violation was corrected on-site at time of inspection: G020 (hazardous waste markings) for 7 x 5 gallon buckets of waste coolant/oil mixture G023 (open hazardous waste containers) for 7 x 5 gallon buckets of waste coolant/oil mixture NOTES: -EPA ID number: CAL000361731 is active -Consolidated manifests were reviewed and observed as complete. -Scrap metal is recycled. -Absorbent kit was observed on-site. -Emergency posting is displayed in front office.

Violations:
Site ID: 359732
Site Name: HOF MACHINING INC
Violation Date: 09-18-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 11/02/2015.

No HMBP has been submitted to the California Environmental Reporting System (CERS). An invitation will be issued to hofmachining@yahoo.com to create an account on CERS. Within 30 days, complete and submit the following (sections): -Facility information/ownership page -Hazardous materials inventory/site map -Emergency response plan/training plan NOTES: -A site map and emergency response/training plan template will emailed to hofmachining@yahoo.com -If you would like assistance with completing and submitting your HMBP, contact SCC HMCD Hazardous Materials Technicians Michelle Santos at (408)918-1981 or Jean Nguyen at (408)918-1955. -CERS website: http://cers.calepa.ca.gov

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-18-2015
Violations Found: Yes

VAN ROOY PRECISION (Continued) **S106093992**

Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Performed a facility walk-through with Mr. Kooplicat, and observed the following hazardous materials at or above HMBP reporting thresholds: -Waste oily water: 2 x 55 gallon drums -Coolant: 2 x 55 gallon drums & app. 50 gallons in each CNC machine NOTES: -CERS ID: 10588984
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-18-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Performed a facility walk-through with Mr. Kooplicat, and observed the following hazardous waste: -Waste oily water: 2 x 55 gallon drums Hazardous waste is picked-up approximately every 4 months (with an annual change-out of all coolant annually). Facility contains 4 x CNC machines and 2 x lades with aluminum, plastic, and steel as the primary materials handled. Floor is mopped regularly and oily water managed as hazardous waste. The following violations were corrected on-site at time of inspection: -G211 (emergency posting) -G020 (hazardous waste markings) for 1 x incomplete hazardous waste label on 55 gallon drum of waste oily water & for missing labels on hazardous waste accumulation containers located beneath 4 x CNC machines NOTES: -EPA ID: CAL000366171 is active -Fire extinguishers were observed as annually maintained -Spill control equipment was available on shop floor -Scrap metal is recycled
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility handles the following hazardous materials above hazardous materials business plan (HMBP) reporting thresholds: -Waste oily water: 2 x 55 gallon drums in shop -Coolant/oil: Approximately 50 gallons in each CNC machine NOTES: -CERS ID: 10588985 -A HMBP was submitted on 8/16/18 and was reviewed by our agency
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a machine shop that operates 4 x CNC machines and 2 x lathes to manufacture aluminum, plastic, and steel parts. Observed the following hazardous waste at time of inspection: -Waste oily water: 2 x 55 gallon drums in shop NOTES: -CAL000366171 is active -Fire extinguishers were observed as maintained -Spill control was available

VAN ROOY PRECISION (Continued) **S106093992**

-Scrap metal is recycled -Consolidated manifests were reviewed (annual coolant change-out and pick-up of waste oily water occurred on 5/25/18) -Shop floor was free of spills -Saju@hofmachining.com

List of Process Unit Information:
Process Unit Group: CONTAIN1

Process Unit Group: TANKSTR1

Process Description: S01-CONTAINER
Legal/Operating Status: NEVER REGULATED AS A TSD - PROTECTIVE FILER
Unit of Measure Description: G-GALLONS
Capacity Type Description: D-Designed
Number of Units Within Process Unit Group: 1
Process Capacity: 200
Process Status Effective Date: 1995-01-01 00:00:00.0

Process Description: S01-CONTAINER
Legal/Operating Status: INTERIM STATUS - OPERATING, ACTIVELY MANAGING RCRA-REGULATED
Unit of Measure Description: G-GALLONS
Capacity Type Description: D-Designed
Number of Units Within Process Unit Group: 1
Process Capacity: 200
Process Status Effective Date: 1982-02-11 00:00:00.0

Process Description: S01-CONTAINER
Legal/Operating Status: INTERIM STATUS - PROTECTIVE FILER
Unit of Measure Description: G-GALLONS
Capacity Type Description: D-Designed
Number of Units Within Process Unit Group: 1
Process Capacity: 200
Process Status Effective Date: 1983-01-12 00:00:00.0

Process Description: S02-TANK STORAGE
Legal/Operating Status: NEVER REGULATED AS A TSD - PROTECTIVE FILER
Unit of Measure Description: G-GALLONS
Capacity Type Description: D-Designed
Number of Units Within Process Unit Group: 1
Process Capacity: 6000
Process Status Effective Date: 1995-01-01 00:00:00.0

Process Description: S02-TANK STORAGE
Legal/Operating Status: INTERIM STATUS - OPERATING, ACTIVELY MANAGING RCRA-REGULATED
Unit of Measure Description: G-GALLONS
Capacity Type Description: D-Designed
Number of Units Within Process Unit Group: 1
Process Capacity: 6000
Process Status Effective Date: 1982-02-11 00:00:00.0

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 04-13-2016
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi
Violation Notes: Returned to compliance on 04/22/2016. Facility has 1 used antifreeze and 1 used oil tank that has not been assessed. Perform assessment per 66265.192(h) or complete an application to apply for a tank assessment exemption (provided with report).

SPEEDEE OIL CHANGE & TUNE UP (Continued) **S103667699**

	15, Section(s) 66265.16
Violation Description:	Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 04/22/2016. No training records could be provided at time of inspection that satisfy conditions below.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	04-13-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility is a large quantity generator of hazardous waste. Used antifreeze is picked up for disposal approximately every 2 months. Tank has approximately 150 gal capacity. used oil is picked up for disposal approximately every 2-3 weeks. Tank has approximately 700 gal capacity. Used filters are picked up for disposal approximately every 6-9 months. Note1: Overfill prevention is provided by a visual check that manager states is performed daily. Gauge was not functioning properly at time of inspection. Note 2: Gasoline from fuel filters is consolidated into a gas can for reuse in vehicles. Note 3: The following minor violations were corrected at time of inspection: 1x5

Eval Notes:	On site with Hazardous Materials Specialist II, Robin Ward, of HMCD. Inspection commenced on 05/28/2019 and concluded today. Facility is an automotive lube shop routinely generating the following hazardous waste streams: Used Oil Used Coolant Paper oil filters/oily debris Drained metal-encased used oil filters Notes: - State ID CAL000231881 (Active) - Facility is a non-RCRA large quantity generator and currently has a 1000 gallon used oil tank and 250-gallon used coolant

SPEEDEE OIL CHANGE & TUNE UP (Continued) **S103667699**

tank. - Facility operates as a Used Oil Collection Center. Used oil collected from the public is commingled with used oil generated at facility. - Oily mop water is placed inside 1000 gallon used oil tank. Per Mr. Cunanan, facility is allowed to commingle mop water with used oil as long as the total volume of water does not exceed 25%. - Shop rags are laundered weekly through Mission. - Contingency plans are available for review. - Spill response equipment readily available. - Fire [Truncated]

CERS Description:	Chemical Storage Facilities

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-06-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility handles the following hazardous materials at reportable thresholds: -Propane: Approximately 10 x 8-10 gallon cylinders NOTES: -CERS ID: 10739467 -A HMBP was submitted on 8/7/17 and was reviewed as complete
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-06-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. Facility is a transportation company that periodically generates hazardous waste in the form of goods damaged in-transport. At time of inspection there was no hazardous waste on-site as a pick-up had occurred approximately 3 weeks prior. NOTES: -CAL000424821 is ACTIVE -Fire extinguishers are active -Spill control was available -Emergency posting was observed -Training is provided by corporate and disseminated to staff as needed -Inspections are conducted at least weekly -Hazardous waste manifests were reviewed -All vehicles are maintained by a mobile mechanic (CnS) who handles all hazardous waste
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW

Facility Status:	**Completed - Case Closed**
Status Date:	07/01/2014
Global Id:	T10000004653
Lead Agency:	SANTA CLARA COUNTY LOP
Lead Agency Case Number:	06S1E17N02s
Latitude:	37.404732847
Longitude:	-121.89356804
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Trichloroethylene (TCE), Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Total Petroleum Hydrocarbons (TPH)
Site History:	The site is comprised of 4 adjacent parcels. Two of the parcels were previously investigated and remediated (Pick Your Part) and closed to an industrial standard. The parcels are being redeveloped residentially. 3 of the parcels were historically used for auto dismantling. Proposed removal of undocumented fill material offsite and placement of NOA containing (<1%) under hardscape/foundations; excavation of other contaminated soil. Groundwater was pumped from open excavation, treated and used for dust suppression.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 12-18-2015
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post, next to the telephone, Emergency Information (SQG) containing the location of emergency equipment, contact names and numbers.
Violation Notes: Returned to compliance on 01/06/2016. No emergency response posting was observed in the facility.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 362738
Site Name: TTE PRODUCTS INC
Violation Date: 12-18-2015
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 01/05/2016. Observed 2 x 55 gallon poly drums of Oily water that have been accumulated on-site for beyond the accumulation time limit. Within 30 days, arrange for the oily water to be disposed of and provide a copy of the consolidated manifest (disposal receipt) to our office.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-18-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility does precision machining primarily on aluminum (periodic work is done with stainless steel and plastic). Performed a facility walk-through with Mr. Onodera and observed the following hazardous waste: -Oily water: 2 x 55 gallon poly drums -Oily Debris: 1 x 5 gallon bucket The following violations were corrected on-site at the time of the inspection: -G020 (hazardous waste markings) for 2 x 55 gallon poly drums of oily water & 1 x 5 gallon bucket of oily debris The most recent pick-up of the oily water occurred on 4/21/15 per consolidated manifest review. NOTES: -CAL000403407 is active. -Fire extinguishers were observed as maintained. -Absorbent was noted. -Turnings and grindings are managed as scrap metal. -Contact email: ttepro@sbcglobal.net -Per this

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-27-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-though performed with owner, Frank Pennell. Facility provides the following services: metal engraving, screen printing, photoetching, and electrical discharge machining (EDM). Waste streams generated include but are not limited to: - Nickel containing waste liquids (photo etching solution) - Silver containing waste liquids (fixer/developer) - Used oils (way lube/hydraulic/and cutting fluids) - Spent oil filters (paper) Notes: - Per owner, facility does not typically generate waste inks. Any left over inks are stored and

SINE-TIFIC SOLUTIONS INC (Continued) **S109431665**

reused. Owner states any unusable/off spec inks are to be managed as hazardous waste. - Screen washing is performed using water and ProChem ES-900 Emulsion Remover (corrosive). Per owner, ES-900 is diluted (200:1) with water prior to use on silk screens. - All screen printing and machining equipment (such as EDM ad sheer cutter) is maintained by facility. Facility will generate used oil during routine maintenance, but no [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-27-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection was performed with owner, Frank Pennell. Facility stores/handles the following hazardous materials above HMBP repotable quantities: - Nickel acetate waste from metal photo processing (55-gallon poly drum) - ProChem CAL-SOL Solvent (55-gallon steel drum) HMBP submitted through FrontCounter 03/02/2018 (Accepted) Owner ID: OW0158849
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-16-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility does screenprinting, engraving, photosentive, and EDM work. Performed a facility walk-through with Mr. Pennell and observed the following hazardous waste: -Nickel-containing aqueous waste: 1 x 55 gallon drum -Silver-containing waste (fixer/developer): 3 x 15 gallon poly drums Nickel-containing waste is generated from use of a unit that produces images on metal. Per Mr. Pennell, the composition of the resulting aqueous waste is 99% water/1% nickel. Silver-containing waste is generated through photo developing. This waste is managed by a silver recycler and picked-up every year (last pick-up was on 5/1/15). Observed 1 x automated engraver. Per Mr. Pennell, the coolant in this unit is changed-out approximately every 6 months and equates to approximately 3 gallons of hazardous waste. Mr. Pennell stated that in the past, the coolant has been dropped-off at Jiffy Lube. *RECOMMENDATION: Maintain a log documenting [Truncated]

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."
Violation Notes: ALTHOUGH THE SPCC PLAN DATED NOVEMBER 2010 DOES NOT HAVE A STATEMENT OF APPROVAL FROM MANAGEMENT. THIS IS A REPEAT VIOLATION FROM THE LAST PREVIOUS INSPECTION CONDUCTED ON JANUARY 8, 2015.
Violation Division: Santa Clara County Environmental Health

Violation Description:	Failure to obtain facility management approval to fully implement the SPCC Plan.
Violation Notes:	The current SPCC plan dated Novemember 2010 does not have a statement

MMC TECHNOLOGY INC (Continued) **S113002988**

of approval from management.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description: Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes: THE FACILITY ANNUAL TANK STATEMENT OR ANNUAL CERTIFICATION OF THE HAZARDOUS MATERIALS BUSINESS PLAN HAS NOT BEEN COMPLETED IN THE LAST 12 MONTHS. THE LAST SUBMITTAL SUBMITTED ELECTRONICALLY IN THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM WAS FEBRUARY 28, 2017. THIS WAS A REPEAT VIOLATION FORM THE JANUARY 8, 2015 NOTICE OF INSPECTION.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facilityG s discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.
Violation Notes: WHEN THE TWO 4,200 GALLON EMERGENCY DIESEL GENERATORS WERE ADDED TO THE FACILITY. THE FACILITY FAILED TO AMEND/UPDATE ITS SPCC PLAN AS REQUIRED WITHIN 6 MONTHS.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 01-08-2015
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to have an adequate facility diagram, or no facility diagram included within the SPCC plan.
Violation Notes: The SPCC plan diagram does not note the contents of all oil tanks (diesel).
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the

MMC TECHNOLOGY INC (Continued) **S113002988**

business plan is complete and accurate on or before the annual due date.

Violation Notes: IN REVIEWING THE HAZARDOUS MATERIALS BUSINESS PLAN DATED FEBRUARY 28, 2017 IT WAS DETERMINED THE FACILITY FAILED TO ANNUALLY REVIEW THE HAZARDOUS MATERIALS BUSINESS PLAN.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: THE FACILITY IS CONDUCTING WEEKLY INSPECTIONS OF ALL TEN EMERGENCY DIESEL GENERATORS, HOWEVER THE FREQUENCY OF THESE INSPECTIONS WERE NOT DOCUMENTED IN THE SPCC PLAN AND THESE WERE OPERATION AND MAINTENANCE INSPECTIONS NOT SPCC INSPECTIONS. ADD ADDITIONAL LANGUAGE THAT THE FACILITY IS CARRYING OUT SPCC INSPECTIONS CHECKING FOR LEAKS, SPILLS, EMERGENCY SPILL EQUIPMENT, THAT THE SECONDARY CONTAINMENT FREE OF LIQUIDS. MAINTAIN THESE INSPECTION RECORDS FOR THREE YEARS.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 432098
Site Name: Equinix - SV13
Violation Date: 09-12-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."
Violation Notes: The cross reference provided with the plan does not direct the reader to the correct sections to find information. Example" reference alls out security as being addressed in section 5.3 but that section discusses oil filled electrical equipment. Additional crossed cross references included section 3.32 (112.7(d)), section 5.41 (112.7(f)(1)), section 5.4.3 (112.7(f)(2)), and section 3.3.1 (112.8(b)(1))

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility has notified of hazardous waste activities on CERS. Maintaining ID number CAL000431629, active as of inspection. No shipment of waste from site except as noted below. Site is expected to generate coolant from emergency generator radiator service and episodic cleaning of cooling towers. Generator crankcase service provided by Peterson, site has receipts demonstrating the removal of contractor generated oil and filters from routine service. Would recommend utilizing satellite accumulation/point of generation accumulation for onsite storage. Antifreeze is not eligible for offsite transfer by service contractor like oil unless the contractor takes the waste directly to a permitted facility (Household hazardous waste or other desitnation/disposal facility)
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-12-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: CERS 10093255 annual submittal 6/1/17 and 1/30/18 reviewed map and emergency plan/training plan - using template for EP/TP NOTE: HMBP

EQUINIX - SV13 (Continued) **S109283168**

reports generator belly tank holding 2000 gallons of diesel fuel. Tank is marked as having 3000 gallons capacity, and fill level visual indicator notes that tank is full. STRONGLY RECOMMEND changing your volume from 2000 to 3000 in next annual submittal for this tank (or maintaining documentation demonstrating how the tank is maintained at the 2000 gallon level). Site is currently permitted for storage of 4-6 chemicals. ONly have 2 reportable chemicals onsite at time of inspection, with potential 3rd (extra cylinders of R22- not noted onsite as of inspection). Permit will be adjusted.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-12-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility subject to SPCC and APSA by storage of petroleum (diesel) in more than 1320 gallons. Regulated units include 8000 gallon AST and a 2600 gallon generator belly tank. Site additionally has PGE owned oil filled electrical equipment (transformers) and oil filled operational equipment (generator crankcases -110 gal each). -- Have included transformers in plan for spill response only. Plan dated January 2018. PE stamped. Copy available on site and on site copy is signed by management. AST and belly tanks are double walled UL listed with interstitial monitoring to Veeder Root monitoring panel. Overfill prevention by mechanical device at the 8000 gal AST (confirmed installation) with electronic monitoring in generator belly tank. Areas are clean, free of spills or staining except as noted above. All devices that require containment are fitted with sufficiently sized containment Spill kit located outside, nearest storm drain was full but did not contain a spill [Truncated]

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 391923
Site Name: EAGLE TECH INC
Violation Date: 11-06-2014
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 12/05/2014. While annual training is provided to employees, facility has not been provided training that meets the criteria specified below. REPEAT VIOLATION FROM 2011 INSPECTION

Violation Date: 11-06-2014
Citation: 22 CCR 15 66265.14 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.14
Violation Description: Failure to provide either a posted sign stating "Danger Hazardous Waste Area - Keep Out" or to provide one of the following means of security to the active hazardous waste portion of the facility: 1) A 24-hour surveillance system (e.g., television monitoring or surveillance by guards or facility personnel) which continuously monitors and controls entry; or 2) A) An artificial or natural barrier (e.g., a fence in good repair or a fence combined with a cliff), which completely surrounds area; and B) A means to control entry, at all times, through the gates or other entrances (e.g., an attendant, television monitors, locked entrance, or controlled roadway access to the facility).
Violation Notes: Returned to compliance on 12/05/2014. Facility had a rear roll-up door open with no entry control in place or 24 hour surveillance. Facility

EAGLE TECH CIRCUITS (Continued) **1000349687**

also failed to post hazard awareness signs as specified below.

	Chapter 45, Section(s) 67450.3(c)(2)
Violation Description:	Failure to submit to the CUPA and the Department an amended notification at least 30 days after a change has occurred.
Violation Notes:	Returned to compliance on 12/05/2014. Facility failed to submit an accurate Tiered Permitting Unit page. Under "Residual Management" facility needs to include management of the filter cake Additionally under the "Waste and Treatment Process Combinations", Section 2 needs to also state "yes" for "precipitation or crystallization" Section 6 was checked as "drying to remove water". Instead, section 4 should be checked under "Physical process which change only the physical properties of waste such as griding, shredding, crushing, or compacting".

EAGLE TECH CIRCUITS (Continued) **1000349687**

Violation Description:	Failure to maintain the following general tank operating requirements: a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.
Violation Notes:	Returned to compliance on 12/05/2014. Tank in the laboratory has a pump which transfers contents to the treatment system but pump was non functional at time of inspection and liquid levels were near the top of the tank.

Eval Notes:	System is single unit which combines a batch treatment tank for concentrates prior to mixing with untreated, commingled more dilute wastes in flow through system. Main flow through system consists of pH adjust, coagulation and flocculation and pressing to remove water. System is fed by equalization tank located in vault into which all wastes flow prior to treatment. Incidental pH adjustment and possibly nuetralization take place in this tank. Inputs include acid rinses, caustic rinses, metal (tin, copper, nickel) plating rinses, second stage cyanide rinse, residual liquid post silver removal, screen rinse, floor rinse, solder mask rinse (as major sources) Prior to addition to flow through system, more concentrated acid and base wastes are nuetralized or pH adjusted in a batch treatment tank. Once treatment occurs, the contents of the tank are emptied to the EQ tank. Also prior to treatment in the flow through system, containers (from 1 to 55 gallons in size) that once [Truncated]

ELITE METAL FABRICATION INC (Continued) **S103643773**

Site ID: 114286
CERS ID: 10121662
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 114286
Site Name: ELITE METAL FABRICATION INC
Violation Date: 03-23-2016
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 05/06/2016.
Per the hazardous waste tracking system CAL000351573 is inactive. DTSC form 1358 was provided to Mr. Rojas.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 114286
Site Name: ELITE METAL FABRICATION INC
Violation Date: 03-23-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/06/2016.
Observed 6 x 5 gallon containers of used oil without the required markings. A sample hazardous waste label was provided to Mr. Rojas.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 05-06-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to verify that violations from 3/23/16 hazardous waste inspection have been corrected. Hazardous waste labels were observed on containers of used oil, and additional assistance was provided to fill-out and submit DTSC 1358 to reactivate California EPA ID number. No further action is required at this time.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-09-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a Hazardous Waste Generator permit investigation

ELITE METAL FABRICATION INC (Continued) **S103643773**

due to unpaid permit fees in the amount of $193.75. Confirmed with Rogelio Rojas that the invoice was getting sent to the correct address, but it was not received due to changes in personnel. Payment was collected at this time in the amount of $167.00 (Check #3092). A one-time penalty fee waiver was issued for $26.75. Upon processing of the payment, the Hazardous Waste Generator permit will be issued and mailed to the facility.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-23-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility fabricates sheet metal. Performed a walk-through and observed the following hazardous waste: -Used oil: Approximately 20 gallons in 6 x 5 gallon containers Small quantities of used oil are generated from maintenance of 2 x MC machines used for cutting sheet metal. Disposal options for used oil were discussed with Mr. Rojas. NOTES: -CAL000351573 is inactive -Fire extinguishers were observed as maintained -Spill control is available -A copy of the County of Santa Clara Hazardous Waste Recycling & Disposal for Small Businesses brochure was provided to Mr. Rojas -Facility email: elitemetalfab_roge@sbcglobal.net
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: OVERFILL INSPECTION WAS CONDUCTED DECEMBER 12, 2018. OVERFILL PREVENTION EQUIPMENT WAS REQUIRED TO BE INSPECTED AT LEAST ONCE BEFORE OCTOBER 13, 2018 AND 36 MONTHS THEREAFTER. ****THE NEXT OVERFILL INSPECTION IS DUE BEFORE OCTOBER 13, 2021 NOT DECEMBER 14, 2021.

Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 06/24/2019. BASED ON THE TYPE OF VIOLATIONS NOTED, EMPLOYEES ARE NOT THOROUGHLY FAMILIAR WITH HAZARDOUS WASTE HANDLING.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: LAST CERS SUMBITTAL DATED MAY 28, 2019. THE FOLLOWING CHEMICAL IS SUBJECT TO HMBP REPORTING THRESHOLD: -DIESEL, 700 GALLONS
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 12-13-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to witness testing of overfill prevention equipment on YRC's (property owner) underground storage tank when a Caterpillar mobile generator was observed. These mobile generators have attached fuel tanks that typically hold approximately 100 gallons of Diesel fuel thereby making it subject to hazardous materials business plan (HMBP) requirements. NOTES: -Facility had already submitted a HMBP to CERS in October, however only below-HMBP quantity chemicals were disclosed. -A BP01 (1-3 reportable chemicals) permit will be issued to this business.

Eval Date: 08-09-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a distribution center for Amazon. Hazardous waste is generated in the form of non-saleable (damaged) merchandise. Hazardous waste storage area is in northwestern corner of warehouse. Potential hazardous waste is staged in the following pre-sort bins: -Other (flammable solids) -Aerosols/Paints -Cleaners -Pesticides/Herbicides -Cosmetics/Perfumes -Medicines/Supplements -Batteries -Oil/Lubricants -Electronics At end of each shift items are moved from pre-sort bins to hazardous waste containers. At time of inspection the following hazardous waste containers were observed: -Waste pesticides: 1 x 5 gallon container -Waste corrosive liquids: 1 x 5 gallon container -Non-RCRA hazardous waste liquids (soaps/latex paint): 1 x 5 gallon container Currently a written log is being maintained to track merchandise that is managed as hazardous waste. NOTES: -CAL000413025 is ACTIVE -Fire [Truncated]

Violations:

Site ID:	85431
Site Name:	WESTCOAST PRECISION INC
Violation Date:	01-10-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 02/07/2019. Facility must make a proper waste determination for scotch brite pads used for deburring in detail area. Pads may meet hazardous waste criteria for California regulated metals which include but are not limited to brass, copper, and chromium. Additionally, metals particles from deburring activities may be <100 microns in size, which would meet hazardous waste criteria and must be managed as such.

Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 11/09/2015. -Observed 2 x secondary containment pallets containing free-flowing quantities of used oil. Remove and containerize used oil to minimize possibility of a fire or unplanned release. -Observed free-flowing quantities of used oil underneath and to the side of machine #17. Containerize to

WEST COAST PRECISION INC (Continued) **S108486554**

minimize risk of a fire or unplanned release.

Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	85431
Site Name:	WESTCOAST PRECISION INC
Violation Date:	01-10-2019
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 02/07/2019. Observed the following open hazardous waste containers at time of inspection: - 2 x 5-gallon buckets (one in horizontal machining area and hazardous waste storage area) - 2 x 55-gallon oily water/coolant drums with no tops/lids - 6 x 55-gallon oily water/coolant drums with missing or unsecured drum locking rings.

Eval General Type:	Other/Unknown
Eval Date:	04-26-2016
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to conduct a follow-up hazardous waste inspection to hazardous waste inspection conducted on 3/4/16. The solder sponge cleaning process was examined in more detail. Per Mr. Hong, solder sponges are washed-off in a sink with water in stencil cleaning room. Lead-containing and lead-free solder residue accumulates in a mesh stopper over drain, and is collected and placed into 1 x 5 gallon bucket of waste solder located next to sink. NOTES: -Observed waste solder containers set-up with hazardous waste labels for soldering stations.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	04-26-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous waste treatment inspection. Facility perform cleaning of stencils in stencil cleaning room. According to Mr. Hong, stencils are first cleaned with wipes. Next, stencils are placed in 1 x ultrasonic cleaning unit containing Aquanox A8830 to remove any lead-containing and lead-free solder residue. Approximately 6-7 stencils are cleaned per day, and cleaning solution is deemed spent by personnel after approximately 6 weeks. The spent Aquanox A8830 is then pumped into an evaporator located next to ultrasonic cleaning unit. Once spent solution has evaporated, a trough is used to remove solder-containing sentiment from bottom of evaporator and is placed into 1 x 5 gallon container of waste lead-containing solder.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	CE
Eval Source:	CERS

Eval General Type:	Other/Unknown
Eval Date:	10-11-2016
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to conduct a follow-up hazardous waste inspection regarding uncorrected violations observed on 3/4/16 and 4/26/16 hazardous materials compliance inspections. Regarding violation G011 observed on 3/4/16 inspection and violation G011 observed on 4/26/16 inspection, washing of lead and lead-free containing solder sponges is no longer performed at sink in stencil cleaning room. A sign has been affixed to wall next to sink prohibiting this practice, and training has been provided to staff. THIS VIOLATION IS OBSERVED AS CORRECTED. Regarding violation G010 observed on 3/4/16 inspection and violation G010 observed on 4/26/16 inspection, Mr. Hong was witnessed taking a representative sample of spent cleaning solution from stencil cleaning unit/evaporator in stencil cleaning room. This sample will be submitted to a state-certified laboratory for a CAM-17 analysis. PROVIDE OUR AGENCY WITH ANALYTICAL RESULTS AS SOON AS THEY ARE AVAILABLE. Regarding violation G220 [Truncated]

	12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Returned to compliance on 01/25/2017. California EPA ID (CAL000368019) number assigned to this facility is inactive. Facility has been provided with DTSC form 1358.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	99506
Site Name:	BOJO INC
Violation Date:	12-22-2016
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 01/25/2017. Facility has not annually certified their HMBP since 2013. Log-in to your California Environmental Reporting System website account, update your HMBP, and resubmit it. If you require assistance please contact Michelle Santos at michelle.santos@cep.sccgov.org or Myra Recihardt at myra.reichardt@cep.sccgov.org
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	99506
Site Name:	BOJO INC
Violation Date:	12-22-2016
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 01/07/2017. Facility uses a bath of Printex D-Solv to remove ink from equipment. A review of the Safety Data Sheet shows that product contains 1 or more chemicals (N-Methyl-Pyrrolidone) at percentages that contain potential toxicity properties. Currently, spent solvent is being disposed into the sanitary sewer. Cease this practice until a hazardous waste determination can be made. If found to be hazardous, manage accordingly.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-22-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility manufactures plastic parts. Observed the following hazardous materials at or above HMBP-reporting thresholds: -Hydraulic oil: 1 x 55 gallon drum and an undetermined amount in machines on shop floor NOTES: -CERS ID: 10457950 -Facility contact

BOJO INC (Continued) **S113083408**

email: mjohnson@bojoinc.com
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility utilizes inks in process. Inks are cleaned from equipment in a small bath containing "Printex" brand "D-Solv". Although product container advertises itself as "biodegradable" a review of the Safety Data Sheet showed it contains constituents that may meet hazardous waste criteria for toxicity. According to Mr. Johnson spent bath solution is currently disposed of into the sanitary sewer. NOTES: -California EPA ID (CAL000368019) number assigned to this facility is inactive.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 08/07/2018. Observed the following containers of hazardous waste stored beyond the 9 month* allowable limit. 1x55 gal drum of lab debris consisting of solder and solvent contaminated items - accumulation start date of 1-12-16. *All hazardous waste shipped in last 4 years has been received by a facility over 200 miles from generator location to either Avalon, TX or Fernley, NV.

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last electronically submitted a hazardous materials business plan on 11-29-16 (Facility information and Plans) and 11-24-16 (hazardous materials inventory). No hazardous materials observed at time of inspection to meet or exceed state reporting thresholds. Observed 3x55 gal drums of waste (1 empty, 1 nearly empty) on-site demonstrating a possibility to accumulate more than 55 gallons or 500 lbs of a hazardous material. Liquid Nitrogen (128 gal) previously reported on 11-24-16 no longer on-site. NOTE: Determine if you will ever reach or exceed state reporting thresholds (eg 55 gal liquid, 200 cuft gas, 500 lbs solid) again in the future. If not, remove extra 55 gal drums and do not accumulate or have capacity to accumulate 55 gallons or more of liquid. Per uniform hazardous waste manifest review, last time waste on-site exceeded threshold was on 4-8-13 at 600 lbs of lab debris.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 03-01-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspection is a follow up to the routine inspection dated 11/30/2017. All violations observed during that inspection were not corrected.
Eval Division: Milpitas City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility machines parts for wide range of industries. Material is cleaned using petroleum distillates or acetone baths, or via ultrasonic cleaning which may use solvent or water. Deburring occurs via a tumbler and soapy water waste is collected with the solvent waste. Certain inorganic metal bearing wastes are not permitted to be mixed with solvents unless greater than 1% Total Organic Carbon (TOC). It is likely that the soapy water contains sufficient TOC to allow it to be consolidated with the solvent waste (regardless of presence of certain metals). The following minor violations were corrected at time of inspection: 3x55 gal containers of used oil - incomplete marking EPA ID # CAL000326807 has been inactive since 6-30-2008.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Annual Facility Review --
Eval Division: Milpitas City Fire Department

Violation Date:	03-29-2016
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Facility is currently disposing of spent paint filters in the municipal trash. Manage as hazardous waste or perform testing. Testing required includes cam 17 metals TTLC and potentially an STLC (if TTLC is greater than or equal to 10 times the STLC regulatory limit). If waste meets CA toxicity, determine if waste is a federal RCRA hazardous waste by performing the TCLP or manage as RCRA hazardous waste. Also, facility shipped "Dirt contaminated with motor oil" to Crosby and Overton in Long Beach, CA even though Crosby and Overton indicated that lead and chromium is high (per TTLC). Receiving facility indicated they would receive the waste and perform the required STLC once waste is received. In the future, for a proper waste determination and manifesting, testing must be done prior to shipping this hazardous waste to determine if it is a California hazardous waste and if so, if it is a RCRA regulated hazardous waste (per Federal TCLP testing).

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Violations:
Site ID: 38195
Site Name: INNOVATIVE CIRCUITS ENGR INC
Violation Date: 05-21-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: 30-gallon drum holding spent board cleaning solution (10% sulfuric acid) has exceeded accumulation time limit of 1 year. Hazardous waste label lists an accumulation start date of March 2016 and was confirmed through review of hazardous waste manifests.

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 08/10/2016.

Per the hazardous waste tracking system, CAL000274969 is inactive. DTSC form 1358 was provided to Mr. Poe.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 38195
Site Name: INNOVATIVE CIRCUITS ENGR INC
Violation Date: 05-21-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: The following reportable hazardous materials were observed on site but have not been disclosed in HMBP chemical inventory: - Oxygen (249 cuft cylinder) - CF4 (287 cuft cylinder)
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 38195
Site Name: INNOVATIVE CIRCUITS ENGR INC
Violation Date: 04-26-2016
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 05/24/2016.

Observed a large sink in wave soldering area. According to Mr. Poe, printed circuit boards are scrubbed with a brush and cleaning solution, and then sprayed-off with water with all wastewater leads to the sanitary sewer. In left and right corners of sink, solder debris was observed. Immediately cease this process until a hazardous waste determination can be made on this wastewater.

Violation Date: 04-26-2016
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..
Violation Notes: Returned to compliance on 05/24/2016.
Lead-free solder debris was scattered on the floor surrounding the wave soldering machine. Revise process to minimize the possibility of spills. Containerize all solder debris found on floor.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-26-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed the following hazardous materials at or above HMBP reporting thresholds: -Liquid Nitrogen: 2 x Dewars NOTES: -CERS ID: 10349959 -Per this inspection, facility's HMBP permit will change from a BP02 (4-6 reportable hazardous materials) to a BP01 (1-3 reportable hazardous materials)
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-21-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Site walk though performed with QA Manager Steven Poe. Inspection commenced on 5/20/2019 and concluded today. Facility performs analytical testing and failure analysis for electrical components along with printed circuit board assembly. Observed the following hazardous materials stored above HMBP reportable quantities: - Liquid Nitrogen (52-gallon dewer) - Compressed oxygen (249 cuft cylinder) - Compressed CF4 (287 cuft cylinder) Notes: - CERS ID 10349959 - HMBP submitted through CERS on 10/18/18. (Accepted) - Training performed annually through combination of safety meetings and outside consultant. - Property is owned by facility.
Eval Division: Santa Clara County Environmental Health

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: A ABOVEGROUND PETROLEUM STORAGE ACT INSPECTION WAS CONDUCTED WITH MR. RAY CILONI-MANAGER OF FACILITIES ENGINEERING. A FACILITY WALK THROUGH WAS CONDUCTED. EIGHT 5,000 GALLON EMERGENCY DIESEL GENERATORS WERE INSPECTED. A SPILL PREVENTION, CONTROL AND COUNTERMEASURES PLAN DATED MARCH 2018 WAS REVIEWED AND FOUND SATISFACTORY. THE SPCC PLAN WAS SIGNED BY A PROFESSIONAL ENGINEER AND THE SPCC PLAN WAS APPROVED BY COMPANY MANAGEMENT. THE FACILITY HAS ADEQUATE SITE SECURITY AND LIGHTING. THE SITE FACILITY MAP SHOWING ALL PETROLEUM LOCATIONS WAS CURRENT. THE SPCC MANAGER IS MR. RAY CILONI-MANAGER OF FACILITIES ENGINEERING AND HAS BEEN DESIGNATED IN WRITING IN THE SPCC PLAN. THE FACILITY HAS A GENERATOR CONTRACTOR PERFORMING MAINTENANCE AND INSPECTIONS QUARTERLY ON ITS EMERGENCY GENERATORS AND THESE INSPECTIONS ARE DOCUMENTED. FACILITY PERSONNEL PERFORM MONTHLY INSPECTIONS ON THE EMERGENCY GENERATORS AND THESE INSPECTIONS ARE ALSO DOCUMENTED.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: A SMALL QUANTITY HAZARDOUS WASTE GENERATOR INSPECTION WAS CONDUCTED WITH MR. RAY CILONI-MANAGER OF FACILITIES ENGINEERING. IT WAS DETERMINED THAT AFTER REVIEWING DOCUMENTATION THAT THE FACILITY IS A HAZARDOUS WASTE GENERATOR FOR USED OIL AND WASTE ANTIFREEZE. THE PROCESS THAT GENERATES THESE WASTES ARE DURING ROUTINE EMERGENCY GENERATOR MAINTENANCE. ITS WAS DETERMINED DURING THE HAZARDOUS WASTE GENERATOR INSPECTION THAT THE BACK OF THE FACILITY NEEDS A GENERAL HOUSEKEEPING DUE TO THE SEVERAL 5 GALLON USED OIL CONTAINERS THAT WERE DISCOVERED. DUE TO THE NUMBER OF VIOLATIONS OBSERVED HAZARDOUS WASTE TRAINING FOR FACILITY PERSONNEL IS NEEDED TO BE THROUGHLY FAMILIAR

VERIO HOSTING EXCHANGE (Continued) **S105940320**

WITH PROPER HAZARDOUS WASTE MANAGEMENT AND EMERGENCY PROCEDURES.
CORRECT ALL HAZARDOUS WASTE VIOLATIONS WITHIN 30 DAYS.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

IMAGE SERVICES (Continued) **1000233402**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training

PURE WAFER INC (Continued) **S121469641**

records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 03/07/2018. Facility provides training in HazCom, emergency procedures, and safe handling of chemicals however no training procedures have been finalized regarding hazardous waste management. Within 30 days provide hazardous waste management training to all appropriate personnel. Provide a copy of training documentation to our agency to correct the violation.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-20-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: A CALIFORNIA ACCIDENTAL RELEASE PROGRAM ONE COMPLIANCE INSPECTION WAS CONDUCTED WITH MR ROBERT CORNELL- PURE WAFER CORPORATE QUALITY/EHS MANAGER, AFRIM KRYEZIU- PURE WAFER OPERATIONS MANAGER, KENNETH LOWERY- PURE WAFER SITE OPERATIONS MANAGER AND ROBIN WARD- HMCD HAZARDOUS MATERIALS SPECIALIST II. THE CALARP REGULATED CHEMICAL WAS HYDROFLUORIC ACID (HF). THE FOLLOWING AREAS WERE INSPECTED WHERE HF WAS STORED: ROOM 122 (STRIP AND ETCH ROOM) 375 LBS HF ROOM 124 (PRODUCTION CHEMICAL STORAGE) 690 LBS HF ROOM 126 (MEGASONIC CLEAN ROOM) 8 LBS HF ROOM 128 (CLEAN ROOM) 24 LBS HF ROOM 170 (MAIN CHEMICAL STORAGE) 1,342 HF (STORED IN 1 GALLON PLASTIC BOTTLES) ROOM 172 (HAZARDOUS WASTE STORAGE ROOM) 253 LBS HF POLISH ROOM 19 LBS HF THE OFF SITE CONSEQUENCE ANALYSIS WAS VERIFIED USING RMP*COMP. THE FACILITY IS STILL A PROGRAM 1 CALARP FACILITY. A RISK MANAGEMENT PLAN DATED JUNE 12, 2019 WAS REVIEWED AT THE TIME OF THE INSPECTION. THE NEXT FIVE YEAR RISK MANAGEMENT [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: CalARP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 2/7/18 and concludes today with issuance of the Official Notice of Inspection. Facility resurfaces and polishes

PURE WAFER INC (Continued) **S121469641**

wafers. Performed a walk-through with Mr. Rob Cornell and Mr. Terry Gunn (facility Manager), and observed the following hazardous waste: -Waste hydrofluoric acid -Waste sulfuric acid/copper sulfate -Spent activated carbon media -Spent resin -Waste potassium hydroxide -Waste oily water -Used oil filters -Small quantities of universal waste (batteries) -Off-spec chemicals (as generated during clean-ups/audits) According to facility personnel, chemistry utilized in etching baths does not meet the hazardous waste criteria for corrosivity. After use in baths chemistry is plumbed to the AWN where it is adjusted to POTW-acceptable pH levels and then is discharged to the sanitary sewer. Due to the usage of hydrofluoric acid on-site, a hazardous waste follow-up inspection will be performed within 30 days to examine this process more [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: HWLQG
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-07-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Per manifest data, facility has gone in and out of large quantity generation(LQG) status depending on the month. Facility subjects itself to full RCRA LQG standards including submitting a biennial report. Facility receives used wafers and reclaims them per customer request. Reclamation and reconditioning involves a process that uses multiples acids and sometimes caustic liquids. *NOTE* Facility ships copper contaminated media on a uniform hazardous waste manifest and uses the following shipping name: "Non RCRA hazardous waste liquid". In the additional information (box 14), the waste is described a "spent cation media SCH". I recommend that the facility include information in the shipping name identifying it as copper contaminated media so there is no doubt as to what the waste is.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to witness the site's hazardous waste determination sampling regarding the wafer cleaning process that utilizes Hydrofluoric Acid, 49% (HF). Present during the sampling event were Rob Cornell and Terry Gunn from Pure wafer as well as Ray Maiden and Albert Wolff from this office. The sampling event was to mimic real world conditions to determine if waste HF concentration was at or above the regulatory threshold of 180 mg/l. Facility Plumbing: The facility utilizes aboveground piping and lift-stations to drain all fixed chemical baths. The lift-stations are monitored by floats, which activate lift-pumps to transport effluent to the site's acid-waste neutralization (AWN) that discharges to the sanitary sewer (POTW). For today's sampling event took place in Room #122 (Strip & Etch) and all upstream influent sources were isolated and the lift-station was empty. In addition, the automatic lift-pumps were turned off to facilitate a representative sample of HF [Truncated]

Eval Notes: Facility walkthrough with Steven Frank, Consulting Director, EH&S, Terry Gunn, Operations Manager and Afrim Kryeziu Director of Manufacturing/CA Operations Wafer Reclaim Services. Ruben Williams, HMCD was also present. Facility is a wafer reconditioning business. Part of the process uses hydrofluoric acid (HF) in greater than 1% concentration over the threshold quantities. Following the facility walkthrough, 4 covered processes were identified: Room 122: Strip and Etch- 5x 7 gallon sinks of HF at 49% and 1x 55 gallon spent HF at ~12%, Room 124: Production Storage Room- 61x 1 gallon HF at 49% storage in cabinets, Room 170: Main Chemical Storage- 24x 1 gallon HF

PURE WAFER INC (Continued) **S121469641**

at 49% storage in cabinets, Room 172: Waste Storage Room- 3x 55 gallons HF at ~12%. Facility also uses HF solutions in other processes that do not meet CalARP criteria either due to concentration or quantity. Pending the results of the offsite consequence analysis (OCA), the facility is tentatively [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-09-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Inspection began on 2/7/18 and concludes today with issuance of the Official Notice of Inspection. Facility resurfaces and polishes wafers. Performed a walk-through with Mr. Rob Cornell and Mr. Terry Gunn (facility Manager), and observed the following hazardous waste: -Waste hydrofluoric acid -Waste sulfuric acid/copper sulfate -Spent activated carbon media -Spent resin -Waste potassium hydroxide -Waste oily water -Used oil filters -Small quantities of universal waste (batteries) -Off-spec chemicals (as generated during clean-ups/audits) According to facility personnel, chemistry utilized in etching baths does not meet the hazardous waste criteria for corrosivity. After use in baths chemistry is plumbed to the AWN where it is adjusted to POTW-acceptable pH levels and then is discharged to the sanitary sewer. Due to the usage of hydrofluoric acid on-site, a hazardous waste follow-up inspection will be performed within 30 days to examine this process more [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-07-2014
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Per manifest data, facility has gone in and out of large quantity generation(LQG) status depending on the month. Facility subjects itself to full RCRA LQG standards including submitting a biennial report. Facility receives used wafers and reclaims them per customer request. Reclamation and reconditioning involves a process that uses multiples acids and sometimes caustic liquids. *NOTE* Facility ships copper contaminated media on a uniform hazardous waste manifest and uses the following shipping name: "Non RCRA hazardous waste liquid". In the additional information (box 14), the waste is described a "spent cation media SCH". I recommend that the facility include information in the shipping name identifying it as copper contaminated media so there is no doubt as to what the waste is.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility handles the following hazardous materials at HMBP-reporting thresholds: -Oxygen: Approximately 4,140 cu ft -Sulfuric Acid 96%: Approximately 1692 pounds -Sulfuric Acid (bath solution): Approximately 736 pounds -Hydrofluoric Acid 49%: Approximately 2623 pounds -Spent carbon: Approximately 600 pounds -Sodium Hydroxide: Approximately 400 gallons -Nitric Acid 69.5%: Approximately 154 pounds -Hydrogen Peroxide 30%: Approximately 160 gallons -Potassium Hydroxide 45%: Approximately 160 gallons -Spent Cation resin: Approximately 81 gallons -Waste Activated Charcoal Carbon Filter Media: Approximately 600 pounds -Waste oily water: 55 gallons -Propane: Approximately 60 gallons NOTES: -CERS ID: 10116682 -A HMBP was submitted on 5/22/17 -A HMBP training log is maintained electronically and was reviewed
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-09-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walkthrough with Steven Frank, Consulting Director, EH&S, Terry Gunn, Operations Manager and Afrim Kryeziu Director of Manufacturing/CA Operations Wafer Reclaim Services. Ruben Williams, HMCD was also present. Facility is a wafer reconditioning business.

PURE WAFER INC (Continued) **S121469641**

Part of the process uses hydrofluoric acid (HF) in greater than 1% concentration over the threshold quantities. Following the facility walkthrough, 4 covered processes were identified: Room 122: Strip and Etch- 5x 7 gallon sinks of HF at 49% and 1x 55 gallon spent HF at ~12%, Room 124: Production Storage Room- 61x 1 gallon HF at 49% storage in cabinets, Room 170: Main Chemical Storage- 24x 1 gallon HF at 49% storage in cabinets, Room 172: Waste Storage Room- 3x 55 gallons HF at ~12%. Facility also uses HF solutions in other processes that do not meet CalARP criteria either due to concentration or quantity. Pending the results of the offsite consequence analysis (OCA), the facility is tentatively [Truncated]

AIR EMISSIONS CLASSIFICATION UNKNOWN

PURE WAFER - SAN JOSE (Continued) **1000179817**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
OSHA ESTABLISHMENT
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
