FLEXTRONICS (Continued) **1004676327**

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: The Site consists of a 1.26-acre parcel located at 355 Sango Court, Milpitas, Santa Clara County, California. The Site is currently developed with an approximately 15,000-square foot single story light-industrial building. Current and former property tenants have conducted similar truck and/or other vehicle service and repair activities at the facility. Hazardous materials and wastes documented as used/generated by the current and many of the previous tenants included a variety of vehicle repair-related materials. In addition to the typical vehicle maintenance and repair materials utilized by most of the property tenants, a caustic soda dip tank and a methylene chloride dip tank were utilized outside the building in a steam rack area by two former tenants between approximately 1997 and 2000. Prior to installation of the existing clarifier, a previous clarifier was present in a similar location. The former clarifier was removed in 1997 under regulatory agency oversight. Verification sampling conducted following clarifier removal documented the presence of significant concentrations of petroleum hydrocarbons in soil. Approximately 15 cubic yards of soil were overexcavated from the clarifier pit. The Regional Water Quality Control Board (RWQCB) issued case closure for the clarifier removal in March 1997. In the closure letter, the RWQCB stipulated that they must be notified if plans were made for a change in land use or if excavation or significant disturbance in the former clarifier area was being considered.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 04/03/1990
Comments: Completed Site Screening. Groundwater monitoring was conducted by the Responsible Party's consultant. Contaminantas detected include trichloroethene (TCE) at concentrations of 4.2 ppb and 43 ppb and cis-1,2-dichlororthene (DCE) at 1.4 ppb. The actual source of contamination has not been identified and the lateral extent of groundwater contamination has not been delineated at the site. Recommend medium priority Preliminary Endangerment Assessment.

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE

VIASYSTEMS TECHNOLOGIES CORP LLC DBA TTM TECHMOLOGIES INC (Continued) **1000227684**

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/24/1990
Comments: SITE SCREENING DONE SITE CONSISTS OF INDUSTRIAL BUILDING AND OUTSIDE STORAGE AREAS CONSISTING OF A SECURITY STORAGE LOCKER WHERE CHEMICAL DRUMS WITH DIFFERENT TYPES OF ACIDS ARE STORED. ON 6-87, 2 GROUNDWATER SAMPLES WERE COLLECTED FROM THE WELLS AND SOIL SAMPLES WERE COLLECTED FROM AROUND THE WELLS. TCE (320 PPB) & DCE (9 PPB) WERE DETECTED FROM THE WATER SAMPLES. SOIL SAMPLES SHOWED LEVELS OF PRIORITY METALS WHICH WERE ALL BELOW STATE ACTION LEVELS. PA REQUIRED MEDIUM.

TSD EPA ID:	NED981723513
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons:	0.792
Year:	2013
Gepaid:	CAT080031511
TSD EPA ID:	CAD059494310
CA Waste Code:	741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.68805
Year:	2013
Gepaid:	CAT080031511
TSD EPA ID:	CAD008488025
CA Waste Code:	792 - Liquids with pH <= 2 with metals
Disposal Method:	H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons:	136.6926
Year:	2013
Gepaid:	CAT080031511
TSD EPA ID:	CAD008488025
CA Waste Code:	132 - Aqueous solution with metals (< restricted levels and (Alkaline solution (pH >= 12.5) with metals))
Disposal Method:	H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons:	41.51235
Year:	2013
Gepaid:	CAT080031511
TSD EPA ID:	AZD980735500
CA Waste Code:	171 - Metal sludge (Alkaline solution (pH >= 12.5) with metals)
Disposal Method:	H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons:	107.0356
Year:	2013
Gepaid:	CAT080031511
TSD EPA ID:	NVT330010000
CA Waste Code:	181 - Other inorganic solid waste

VIASYSTEMS TECHNOLOGIES CORP LLC DBA TTM TECHMOLOGIES INC (Continued) **1000227684**

Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 8.428

Year: 2013
Gepaid: CAT080031511
TSD EPA ID: CAD982052797
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.7225

Year: 2013
Gepaid: CAT080031511
TSD EPA ID: CAD980887418
CA Waste Code: 791 - Liquids with pH <= 2
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.834

Year: 2013
Gepaid: CAT080031511
TSD EPA ID: NVT330010000
CA Waste Code: 352 - Other organic solids
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.6

Year: 2012
Gepaid: CAT080031511
TSD EPA ID: CAD008488025
CA Waste Code: 792 - Liquids with pH <= 2 with metals
Disposal Method: H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons: 167.8842

Case Type:	Cleanup Program Site
Case Worker:	KAW
Local Agency:	Not reported
RB Case Number:	43S0267
File Location:	Not reported
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Dichloroethene (DCE), Trichloroethylene (TCE)
Site History:	Several businesses have operated in this facility since it was completed in May 1977. A circuit board manufacturer and a plating business once operated on the site, the current operator, Viasystems Technologies Corp, LLC, is a circuit board manufacturer. Past soil and groundwater investigations indicate the presence of cis-1,2 - dichloroethene and trichloroethylene within the two mediums. Groundwater monitoring wells were installed, there is no indication of any remedial action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 02/21/2014
Comments: On January 23, 2014, DTSC conducted a PEA scoping meeting via phone conference with the District and their consultants. On February 21, 2014, DTSC conducted a site visit of the McCandless property with Cary Matsuoka and their consultant, Alan Klein (Padre Associates). Mr. Matsuoka mentioned that the McCandless property is locked up in litigation between the City of Milpitas and the State of California as a contested asset in the closure of redevelopment agencies and the District is already looking for an alternate site (Centre Pointe Drive). DTSC also conducted a site walkthrough of the alternate site (Centre Pointe Drive) located a block away from the McCandless property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 01/08/2014
Comments: On January 8, 2014, DTSC mailed the Fully executed EOA to the District.

Completed Document Type: Correspondence
Completed Date: 06/30/2014
Comments: On June 27, 2014, DTSC received the MCCandless Scoping Document from the District's consultant via email.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/18/2015
Comments: On May 19, 2015, DTSC forwarded the fully executed VCA to the District.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MCCANDLESS PROPOSED K-6 SCHOOL SITE (Continued) **S115779964**

Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 10/15/2014
Comments: On October 15, 2014, DTSC observed the implementation of the DTSC-approved PEA Workplan. During the site visit, changes on the PEA workplan were made (such as collection of soil-gas at 15' or 10' or 5' bgs; soil samples for 3 depths (surface, fill material [sub surface 2-3' bgs], and native [4-5' bgs] will all be analyzed; the fill material area was adjusted based on the changes observed [note: the fill material were distributed to the rest of the site. If fill material samples came back with high concentrations, the other soil samples will be re-analyzed for the same constituents]; and, no surface samples for VOCs). These changes will be documented in the PEA Report as a variance.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/25/2016
Comments: On August 25, 2016, DTSC was notified via email that Cary Matsuoka is no longer with the District. Joe Flatley is the new point of contact.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Environmental Impact Report
Completed Date: 04/21/2016
Comments: On April 21, 2016, DTSC signed the NOD for the cleanup project. PM forwarded a copy of the signed NOD to OPEA for filing.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 04/21/2016
Comments: On April 21, 2016, DTSC approved the revised RAW and included the response to public comments as an attachment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: School Cleanup Agreement
Completed Date: 08/23/2016
Comments: Fully executed SCA, dated 8/23/16, emailed/mailed on 8/24/16.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 09/28/2017
Comments: On September 28, 2017, DTSC received a letter from the City of Milpitas requesting to exclude the City Park (portion of the City Park not designated for joint use)from the long term operations and maintenance requirements due to NOA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/20/2018
Comments: On July 20, 2018, DTSC issued the Authorization to Occupy School letter to the District.

Completed Document Type: Correspondence
Completed Date: 07/20/2018
Comments: On July 20, 2018, DTSC issued the Authorization to Occupy School letter to the District.

Completed Area Name: PROJECT WIDE

MCCANDLESS PROPOSED K-6 SCHOOL SITE (Continued) **S115779964**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Tech Memo
Completed Date: 01/06/2015
Comments: On January 6, 2015, DTSC received two hard copies of the draft PEA Report which has the information provided in the PEA Tech Memo. No letter is needed from DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/28/2015
Comments: On May 28, 2015, DTSC approved the PEA Report with a further action determination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 04/22/2016
Comments: On April 21, DTSC approved the revised RAW for approval.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 05/21/2015
Comments: On May 21, 2015, Padre (Alan Klein) provided additional information regarding the depth where NOA is an issue at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 08/25/2015
Comments: On August 25, 2015, DTSC approved and concurred with the reconfiguration and removal of VOCs in soil gas as COC for the site. The District still need to submit a formal request to amend the VCA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 02/10/2016
Comments: On November 6, 2015, Tammy Pickens provided the final Community Profile.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 03/17/2016
Comments: On March 8, 2016, DTSC project manager received the final factsheet.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 03/08/2016
Comments: The public comment period is from March 18 to April 18, 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice

MCCANDLESS PROPOSED K-6 SCHOOL SITE (Continued) **S115779964**

Completed Date: 04/22/2016
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/06/2016
Comments: On May 26, 2016, DTSC concurred with the conclusion and recommendation presented in the Borrow Source Material Evaluation tech memo.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.15 Request
Completed Date: 08/25/2016
Comments: On August 25, 2016, DTSC forwarded the signed SFPD 4.15 to CDE.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 05/08/2018
Comments: On May 8, 2018, DTSC approved the Soil Remediation Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/17/2016
Comments: On May 17, 2016, DTSC conducted a site visit to observe the implementation of the RAW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/21/2016
Comments: On July 21, 2016, DTSC observed the bioremediation cell activities (soil tilling, mixing, watering, etc.).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 09/15/2016
Comments: On September 15, 2016, DTSC conducted a site visit to observe the confirmation sampling activities at the Site.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

ADLAR TURN-KEY MFG., CORP (Continued) **1000154493**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 12-02-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter

ADLAR TURN-KEY MFG., CORP (Continued) **1000154493**

	6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Quantities of Tri-mix gas (argon/carbon dioxide/helium) observed on site were at 100% or more (1524 cf) than previously reported (630 cf). Additionally, facility has failed to disclose reportable quantities (~1500 cf) of R-22 gas collected from evacuation of refrigeration systems.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	152975
Site Name:	SHEET METAL WORKERS LOCAL 104
Violation Date:	12-02-2019
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Training documentation to verify staff that staff been provided with annual hazardous materials emergency response and safety training was not available for review.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-02-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility is a welding training center storing the following hazardous materials above reportable quantities: Acetylene (380 cubic feet) Oxygen (337 cubic feet) Argon/Carbon Dioxide mixture (1,477 cubic feet) Tri-mix gas Argon/Carbon Dioxide/Helium (1,524 cubic feet) R-22 refrigerant (~1,500 cubic feet) Hazardous Materials Business Plan (HMBP) was submitted through CERS (ID# 10350091) on 11/22/19 and accepted. Property is owned by Sheet Metal Workers Local #104. Based on observations, permit category will be increase to BP02 (4-6 Reportable Chemicals)
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-03-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility is a sheet metal training facility. Performed a

ADLAR TURN-KEY MFG., CORP (Continued) **1000154493**

walk-through and observed the following hazardous materials at or above HMBP-reporting thresholds: -Argon/Carbon Dioxide/Helium: 6 x app. 210 cu ft cylinders in rear outdoor tank farm -Acetylene: 1 x app. 200 cu. ft cylinders in rear outdoor tank farm -Oxygen: 1 x 281 cu ft cylinder in welding lab -Argon/Carbon Dioxide: 1 x app. 380 cu ft cylinder, 6 x app. 380 cu ft cylinders in rear outdoor tank farm NOTES: -HMBP submitted to FrontCounter was reviewed as complete -No hazardous waste was observed as being generated on-site -Facility email: migueli@smw104jatc.org

Violation Description: Failure to submit a copy of the spill containment test results on the G Spill Container Testing Report FormG to the UPA within 30 days after the test.
Violation Notes: Spill Container Testing Report Form documenting installation testing in late 2018 has not been submitted to HMCD.

STARLITE SHELL #182 (Continued) **S101594462**

Violation Division:	Santa Clara County Environmental Health
Violation Program:	UST
Violation Source:	CERS
Site ID:	156915
Site Name:	Starlite Shell #182
Violation Date:	09-19-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	The Hazardous Waste label on the drum containing used dispenser hoses and filters has an accumulation start date of 6/15/2018. Ensure that all hazardous wastes are shipped within 180 days of their accumulation start date.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	156915
Site Name:	Starlite Shell #182
Violation Date:	09-19-2019
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	The drum containing used dispenser hoses and filters is an open top drum which has the lid sitting on top unsecured. Secure the lid with a locking ring to prevent the escape of flammable or toxic vapors when waste is not being added or removed from the drum.

Citation: HSC 6.7 25290.1(c),25290.2(c),25291(a)(2),2529.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c),25290.2(c),25291(a)(2),2529.1(e)
Violation Description: Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes: Wayne dispensers are are not equipped with proper secondary containment since S. Bravo Systems' installation instructions for offset electrical penetrations were not followed by the installation contractor. Rather than smoothly sloped concrete sealed around the conduits and at the lower edges of the dispenser frames, the spaces where the electrical conduits surface next to the under dispenser containment sumps are filled with rough concrete lower than the dispenser frame tops. Have a qualified UST Service Technician retrofit the concrete work as soon as possible in accordance with the dispenser frame manufacturer's written installation instructions. Bravo deflector plate kits for Wayne dispensers also need to be installed as they were omitted. Obtain a UST Minor Retrofit permit from HMCD prior to having this work done.

Eval Notes:	Hazardous Materials Business Plan (HMBP) was electronically submitted via the California Environmental Reporting System (CERS) website on 1/2/2019. The information has been reviewed and is Accepted. At the time of this inspection, the facility had the following hazardous materials on-site in HMBP-reportable quantities: Regular Unleaded Gasoline, Premium Unleaded Gasoline and Diesel. Propane is handled in small cylinders that qualify for exemption pursuant to the HSC - 25507(b)(5). There is no compressed or cryogenic Carbon Dioxide onsite. In the car wash, Ryko White Foam Detergent is handled in 55 gallon drums. Other car wash chemicals are handled in 15 gallon drums. Review of the Safety Data Sheets indicate that car wash chemicals other than Clean Cut 360 Presoak are hazardous solely as irritants. The quantity for each type observed on-site is well below the 550 gallon reporting threshold specified in HSC - 25507(a)(4)(A). HMBP employee training records were reviewed [Truncated]

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Aptos Corporation was a tenant and operated at the site from 1994 to 2004. The company provided wafer bumping and plating services to the semiconductor industry and used the Site for office and warehousing purposes. Aptos Corporation operated an acid neutralization tank under permit by rule to treat wastewater from its plating operations. The acid neutralization tank was closed and the closure and post-closure reports were submitted to the Milpitas Fire Department. Aptos Corporation ceased its operations on the site around 2004 to 2005. The site is on one of four parcels that is part of the Centre Pointe Business Park site, where the Regional Water Quality Control Board (RWQCB) has been overseeing investigations since 2007. Groundwater contamination under a portion of the Centre Pointe Business Park site has been attributed to an off-site source. Residential development is planned by the current owner of the Centre Pointe Business Park site and RWQCB indicated in a June 2015 letter to the current owner that it intends to oversee the development and implementation of vapor intrusion mitigation measures.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to

APTOS CORP (Continued) **1000886265**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of

THAT CORPORATION (Continued) **1000225605**

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status: Completed - Case Closed

U-HAUL (Continued) **1000159992**

Status Date:	10/16/2017
Case Worker:	AC
RB Case Number:	04-057
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	06S1E18Q05f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The site was formerly a Texaco service station before being purchased by Amerco/U-Haul in 1977. At the time of purchase, there were four underground storage tanks including two 10,000-gallon underground gasoline fuel tanks, on 10,000 gallon underground diesel fuel tank, and a 250 gallon underground waste oil tank. Wallacc-Kuhl & Associates, Inc. (WKA) stated in a report dated April 7, 1992, that two of the gasoline fuel tanks were removed on August 6, 1986. Over a period of 10 years (1985-1995), several different consulting firms performed various groundwater monitoring and remediation programs on the site. In 1985, Terratech, Inc. of San Francisco, California installed two groundwater monitoring wells (MW-1 and MW-2) in the area of the former underground fuel storage tanks and the former underground waste oil tank, respectively. There is an active water supply well located on this property.

Evaluation Action Summary:

Evaluation Date:	1996-10-29 00:00:00.0
Evaluation Responsible Agency:	State

DOUDELL TRUCKING CO (Continued) **1000186095**

Found Violation:	No
Evaluation Type Description:	COMPLIANCE EVALUATION INSPECTION ON-SITE
Evaluation Responsible Person Identifier:	R9
Evaluation Responsible Sub-Organization:	Not reported
Actual Return to Compliance Date:	Not reported
Scheduled Compliance Date:	Not reported
Date of Request:	Not reported
Date Response Received:	Not reported
Request Agency:	Not reported
Former Citation:	Not reported

HAZNET:

Name:	DOUDELL TRUCKING CO
Address:	555 E CAPITOL AVE
Address 2:	Not reported
City,State,Zip:	MILPITAS, CA 950350000
Contact:	AL KUNDE
Telephone:	4082637300
Mailing Name:	Not reported
Mailing Address:	PO BOX 5879
Year:	2012
Gepaid:	CAD981685944
TSD EPA ID:	CAD980887418
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.417
Year:	2012
Gepaid:	CAD981685944
TSD EPA ID:	CAD008302903
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.45
Year:	2011
Gepaid:	CAD981685944
TSD EPA ID:	CAD980884183
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.45
Year:	2008
Gepaid:	CAD981685944
TSD EPA ID:	CAD088838222
CA Waste Code:	135 - Unspecified aqueous solution
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.21
Year:	2007
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743

DOUDELL TRUCKING CO (Continued) **1000186095**

CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	1.428
Year:	2007
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.231
Year:	2007
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	-
Tons:	0.231
Year:	2007
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743
CA Waste Code:	-
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	Not reported
Year:	2006
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	R01 - Recycler
Tons:	0.693
Year:	2005
Gepaid:	CAD981685944
TSD EPA ID:	CAL000161743
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	R01 - Recycler
Tons:	0.693

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address:	2104 N. CAPITOL AVE.
City,State,Zip:	SAN JOSE, CA 95132
Lead Agency:	SANTA CLARA COUNTY LOP
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608500169
Global Id:	T0608500169
Latitude:	37.407221406
Longitude:	-121.8877852
Status:	Completed - Case Closed

ARCO #2089 (Continued) **U001603085**

Status Date:	09/18/2014
Case Worker:	Not reported
RB Case Number:	03-026
Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	06S1E17L03f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	9/87 - high vapor readings in tank monitoring wells and fp detected. Subsequent subsurface investigation (3 borings) found no soil contamination and low groundwater contamination. 11/89 USTs replaced. Groundwater and fp were encountered in the tank pit at 12.5 ft bgs. 2/90 - drilled 3 borings and 4 mws onsite. Found high concentrations in wells MW1 and MW4. 1/91 - 4 mws installed. Periodic groundwater monitoring began 2/91. 11/91 - Aquifer testing conducted. 6/92 - installed air sparge wells, vapor extraction wells, and 1 extraction well. Vapor extraction test concluded would be feasible at this site. 10/92 - customer hit impact valve and released product to the surface. Approximately 3,000 gals of water was removed from the stormdrains. 8/93 - dual completion air sparge/vapor extraction wells installed. 8/00 piping replaced. 6/01 - well MW7 destroyed due to expansion of Light Rail Line. 4/22/09 - requested CAP to reduce source remaining at the site. And revise site conceptual model - majority of wells are submerged. DPE test conducted followed by suflate injection. Confirmation soil sampling conducted in May 2013.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	06S1E18Q01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History:	1988 - a waste oil UST was removed following product being found in a nearby Pacific Bell utility vault. Soil concentration collected around the waste oil tank was 13 ppm TPHd. Monitoring wells (MW1 through MW3) were installed with total depths ranging from 27.5-28 feet below the ground surface (ft bgs). When wells were developed no free product or sheen was found. Between January and May 1989, 4 additional monitoring wells were installed on an adjacent property. Samples collected indicated 20 ppm TPHg in soil samples and 800 ppb TPHg in groundwater samples. In 1990, monitoring detected HVOC's. The maximum concentrations detected in groundwater collected was 1,100 ppb TPHg, 680 ppb TPHd, 180 ppb Benzene, 74 ppb Toluene, 24 ppb Ethylbenzene, 58 ppb Xylenes. During this year, MW3 and MW4 were destroyed due to commercial development of the adjacent lot. MW1 and MW2 remained; however, grading and landscaping inadvertently covered them. In November, 15 soil borings were drilled (B1 to B15) and 5 were converted to monitoring wells AW1 to AW5 with depths of 30-34 ft bgs. In 1992 a groundwater extraction system was installed, but only appears to have operated for a few months. No other information was available. In October 1995, 15 soil samples were collected from the

MOBIL (BP 11227) (Continued) **U001601481**

base of the removed product line, each approximately 3 feet bgs. Up to 14,000 ppm TPHg and 27 ppm Benzene were detected. In November 2003, the Santa Clara Valley Water District closed the investigation at this site. In September, 2007, 7 soil borings (B1 through B7) were advanced onsite as part of a due diligence assessment. TPHd and TPHg were reported at maximum concentrations of 130 ppm and 250 ppm, respectively in boring B4 at a depth of 17 ft bgs. TPHg, Benzene and TPHd were detected in groundwater at maximum concentrations of 22,000 ppb, 1100 ppb and 1,000,000 ppb, respectively. On December 26, 2007, the fuel leak investigation case was re-opened. All USTs, fuel dispensers,and product lines were removed. The site is now a vacant, unpaved lot. In August, 2008, soil excavation was conducted. Confirmation soil samples were collected on the sidewalls and bottom of the excavation. TPHg and TPHd were reported at maximum concentrations of 440 ppm and 12 ppm, respectively. Additional excavation was conducted in October in this area. Excavtion on the eastern portion of the site was conducted in December 2008 and February 2009. Other areas reported to have TPHg in soil above 320 ppm (site specific threshold level calculated by RBCA process) were excavated in March 2009. Approximately 2,854 tons of soil were removed from the site between August 2008 and March 2009. A soil gas survey was conducted in May 2009. Maximum concentrations were reported of 17,000,000 micrograms per cubic meter (ug/m3) TPHg, 3,300 ug/m3 Benzene, 100,000 ug/m3 Ethylbenzene, 390,000 ug/m3 Xylenes, 23,000 ug/m3 MtBE, and 270 ug/m3 Ethanol, which are above residential ESLs. Also at this time, borings were advanced across the site for collection of soil and grab groundwater samples. Maximum concentrations were reported in grab groundwater samples of 1,100,000 ppb TPHg, 200,000 ppb TPHd, 2,100 ppb Benzene, 9,400 ppb Ethylbenzene, 9,000 ppb Xylenes, 12 ppb Toluene, 100 ppb MtBE, 3,200 ppb TBA9.2 ppb DiPE, and 7.4 ppb TOG. In December 2012, additional soil was excavated from the site. This activity was followed by confirmation groundwater and soil vapor sampling.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/24/2017. the following containers did not have the properties of the waste marked on their labels: 3x55 gallon electroless nickel, 1x55 gold alonide, 2x55 mixed acids (HF, HCl, H2SO4, HNO3), 1x5 gal silver strip (E-9), 1x5 nickel strip (E-9), 1x5 copper sulfate (E-9). 1x cubic yard box sludge marked only with contents and start date. 5 gal container at bottom of "empty container" area unmarked. 1x1 gal unlabeled waste in strip storage area. 2X5 gallon containers of brite dip sludge (in filter bags) and 1 hopper of F006 sludge were unlabeled. Plating floor is cleaned only once every month per Mr. Lozano. Liquid was noted on the floor during the inspection. Floor must be "cleaned" daily in accordance with DTSC's wet floor guidance or the containment area is considered a storage area (tank) and subject to labeling and tank assessment. PLEASE REVISE YOUR PRACTICES TO ENSURE PLATING FLOOR IS DRY/CLEAN AT LEAST DAILY.

Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	SITE MAP AND CHEMICAL LOCATION DO NOT MATCH.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	128020
Site Name:	KION Tech Company
Violation Date:	02-19-2014
Citation:	22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Description:	Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally

KION TECHNOLOGY INC (Continued) **1000685946**

accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Violation Notes: Returned to compliance on 04/09/2014.

Eval Type:	Routine done by local agency
Eval Notes:	Cyanide treatment unit unit consists of two 80 gallon nalgene tanks and one holding/transfer sump tank. cyanide rinses and equipment rinses are currently batched treatment in two stages using hypochlorite. Prior to transfer to settling tank to commingle with other wastes, ORP is measured to ensure breakdown of cyanide. Waste min processes include exended length use of primary static rinse and 2 stage spray rinsing of all cyanide plated parts. Splash boards noted between rinses to direct rinsate to tank, not containment. Site has indicated in its notification that it is treats cyanide wastes greater than 5000 mg/l under "permissible dilution" allowances. This is not a practice of the facility per personnel. SUGGEST MODIFYING NOTIFICATION TO REFLECT THIS. Operating logs are kept noting volumes of waste to be discharged with final (pre-discharge) concentrations of nickel, copper, cyanide, and pH Phase I filed 9/22/08 Reviewed CERS submitted information (2/15/17) [Truncated]

Eval Notes:	Facility is metal finishing job shop that primarily nickel plates aluminum parts. Also does copper, silver plating as well as limited alodining. Associated processes include mask/demask, de greasing/parts cleaning and acid/caustic based cleaning and surface prep. Facility utilizes onsite batch treatment of most dilute wastes (rinses). Wastes are send directly from spent rinse baths to treatment without interim management or holding, and as such are exempt from counting under federal rule (40 CFR 261.5(c)(5)). Process generates sludge which carries F006 waste code. Routinely generates and treats onsite 300 gal per day batches of dilute metal bearing (mostly Ni, Cu), cyanide, and acid/caustic rinses and wastes. Last documented hazardous waste training provided 6/2016. This is more than one year ago, please arrange for training as soon as possible. Reviewed manifests 2014-2017, contingency plan, trailing plan and records, waste determination/documentation for cyanide [Truncated]

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	To date, the entire investigation and soil removal has been conducted by the owner, the responsible party. DHS will be issuing an order or entering into an enforceable agreement with the RP. DHS has budgeted $220,000 for oversight of the RP's cleanup actions. DHS will recover 100 percent of its direct costs plus staff costs and overhead related to the project. The RP will continue to fund remedial investigation and cleanup actions.
Site Description:	This site is the location of an ongoing tile manufacturer. It is located in an industrial area of the City of Milpitas.
Hazardous Waste Desc:	Approximately 600 cubic yards of lead-contaminated soil remains onsite. Ground water contamination has not been confirmed by samples taken and analyzed to date.
Threat To Public Health & Env:	The Primary threats to the public health and environment are surface water migration and subsequent direct contact. The site is fenced, and access is limited to workers only. Lead absorption by both man and animals could occur through direct contactwith the contaminated soils. Lead contaminated soil may migrate offsite with draining storm water.
Site Activity Status:	Site soil sampling and removal has been conducted several times. This iterative approach is ongoing. Approximately 600 cubic yards of contaminated soil remain onsite. Ground water samplings show metals in normal concentrations. The RP is studying the feasibility of capping the site for commercial use.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Background Info:	Only sulfuric acid solution, used to recharge the batteries, was on-site after May 1981. The property was sold in 1983 and leased back to Exide until 1986. Sales and service operations (batteries and battery packs containing five gallons of sulfuric acid) moved to 3740 Depot Road, Hayward, California in January 1986. There was a surface impoundment pond that was closed in 1981 under oversight by Regional Water Quality Control Board (RWQCB). Waste settling ponds from the southeast corner of the seven and half acre site were excavated and filled with clean fill. This was originally under Interim Status but changed to generator only, after manufacturing ceased in 1981. The building was demolished in 1995 and new buildings were built on site. Currently on site is Central Storage, a self- storage unit business, which also sells packing supplies. The site is concreted with restricted access and landscaping on the street side along the building. The site is zoned as M2, heavy industrial, by the City of Milpitas. The site is bounded by Montague Expressway to the north, railroad tracks to the west and industrial properties to the east and south. There is residential property located to the southeast approximately one-quarter mile from the site on Gladding Court and Watson Court. The Globe Union Battery Plant occupied the site from 1956 to 1966. ESB, Incorporated (became Exide Corporation in 1983) operated a manufacturing facility of lead acid batteries from 1966 to 1981. All lead-acid battery manufacturing ceased by May 1981 and the facility was used for formulation, recharging and repairing batteries (primarily for forklift batteries and large power batteries) until it was closed.
Comments Date:	06011986
Comments:	The closure in 1986 was under a DHS approved closure plan, which
Comments Date:	06011986
Comments:	included contaminated soil removal (for lead) and groundwater
Comments Date:	06011986
Comments:	testing. The cleanup level was set at less than (<) 1000 parts
Comments Date:	06011986
Comments:	per million (ppm) of lead at a minimum depth of one foot below
Comments Date:	06011986
Comments:	ground level. Most of the area was excavated to the depth of
Comments Date:	06011986
Comments:	four to five feet in the Acid Farm Area. In the confirmation
Comments Date:	06011986
Comments:	samples taken at the bottom of the excavations, the lead ranged
Comments Date:	06011986
Comments:	up to 480 ppm with the average 37.2 ppm. The area was then
Comments Date:	06011986

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 04/12/2018
Comments: DTSC requested files from Santa Clara County's Department of Environmental Health (DEH) to perform a Site Screening. The PDF file received from DEH included documentation that showed 1503 Gladding Court was a portion of the building located at 720 Montague Expressway, closure plans, waste manifests, hazardous waste generator permit applications, and other records used to identify the operations conducted at 1503 Gladding Court.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/21/2009
Comments: A Closure Plan for the waste water treatment system at BJS Electronics was submitted to Santa Clara County's Department of Environmental Health on December 21, 2009, which contained a Tank Assessment and Removal Report as well as a closure application for above-ground hazardous materials storage facilities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 02/05/2007
Comments: Ceres Associates sent a February 5, 2007 letter to Far East National Bank with the conclusion of their third party review of a Phase I Environmental Site Assessment report prepared by ERAS and Phase II Subsurface Investigation report prepared by Tetra Tech. Ceres Associates concurred with Tetra Tech's recommendations that no further investigation was needed at the site and the wastewater treatment system should be closed in accordance with applicable regulatory guidelines. The executive summary from Tetra Tech's report and the majority of the ERAS Phase I Environmental Site Assessment are attached to the copy of the letter that DTSC obtained from the

INTEGRATED PACKAGING ASSEMBLY CORP. (Continued) **S108209513**

County of Santa Clara Department of Environmental Health's records.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 01/29/2007
Comments: A Phase I Environmental Site Assessment was prepared for 720 Montague Expressway by ERAS Environmental. The report concludes that there is no evidence of contamination to soil or groundwater at the property from historical uses.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/14/2004
Comments: Vertex Engineering Services, Inc. prepared a Phase II Subsurface Investigation for 720 Montague Expressway. Only the executive summary is available, which recommends no further investigation at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/21/2018
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective action. Integrated Packaging Assembly Corp. (IPAC) operated at the Site from 1997 until 2004, manufacturing semiconductors and used lead finishing and electroplating in their manufacturing processes. The facility was located in a portion of the building located at 720 Montague Expressway. Phase I and Phase II investigations were conducted at the Site after IPAC ceased operations, and no evidence of historical activities at the Site contributing to contamination of soil or groundwater was found. There were no documented chemical releases at the Site. Closure of the permit by rule units at the Site were done under the oversight of the Santa Clara County Department of Environmental Health. DTSC concluded that no further action is required at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/27/2011
Comments: The County of Santa Clara's Department of Environmental Health issued a letter to BJS Electronics, formerly Integrated Packaging Assembly Corp, stating that they received and reviewed the post closure report and that the permit by rule units were considered closed and no longer subject to operating standards.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

CORDOVA PRINTED CIRCUITS (Continued) **1000985019**

generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Source:	CERS
Site ID:	390568
Site Name:	CORDOVA CIRCUITS INC
Violation Date:	03-14-2018
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 04/17/2018. Observed significant amounts of

CORDOVA PRINTED CIRCUITS (Continued) **1000985019**

drag-out and crystallized solids around many of the plating baths. Ensure drag-out is not going directly on the floor or secondary containment and perform routine cleaning of any spilled solutions. Also observed significant solid build up in fume hoods above the plating baths. Clean these more frequently to avoid storing hazardous waste in an unpermitted location. REPEAT VIOLATION FROM 2015 INSPECTION. Additionally, observed cyanide bath and rinse on-site in corner of plating area that hasn't been used for over 3 years with no future plans to use this material. Continued presence on-site may result in unintended consequences including accidental mixing with near by acid waste streams. Ensure a licensed contractor removes this waste for proper disposal.

Violation Date: 04-07-2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 05/13/2015. While facility has hazardous waste training records, it fails to include accurate job description and responsibilities regarding hazardous waste management. Most staff have inaccurate job titles and job descriptions.

Violation Date:	03-14-2018
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 04/17/2018. Facility generates two waste oxidizers consisting of nitric acid or micro etch (Potassium peroxymonosulfate). 1x55 gal drum of waste micro etch that was undergoing gravity separation of metals was tested using a potassium starch iodide test strip and yielded a positive test result. Determine if these etchants/strippers are RCRA regulated oxidizers per 261.21/66261.21. If they are determined to be RCRA regulatd oxidizers at point of generation, they are prohibited from being treated under the Permit-by-rule permit. No RCRA regulated oxidizers are allowed to be treated under any tiered permit. If they are determined to be non RCRA regulated oxidizers, provide reasoning.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-07-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Note1: Per manifests and data from state tracking website, facility generates between 3,500 and 4,000 lbs/month of RCRA waste. Most of this waste is from D004, arsenic bearing waste. Per owner, no arsenic is used in his process and safety data sheets from products used do not disclose presence of arsenic. Speak to waste haulers and determine whether or not D004 should apply to the waste. Note2: A new gold line has been created approximately 2 years ago. Containerized drag-out (gold and cyanide) from this line has not yet been disposed of. Note 3: Broken grate flooring was observed during the tour which may present a significant safety hazard for the workers and anybody walking in this area. Ensure floor is replaced and manage old flooring as hazardous waste. Note 4: Waste treatment system has various support components that are significantly degraded including the steps and hand rail leading up to the treatment system. Ensure this is addressed immediately.

CPS-SLIC:
Name: NORTH AMERICAN TRANSFORMER
Address: 1200 PIPER DR
City,State,Zip: MILPITAS, CA 95035
Region: STATE
Facility Status: **Open - Remediation**
Status Date: 03/27/2014

NORTH AMERICAN TRANSFORMER (Continued) **S100186281**

Global Id:	SL18208588
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.414601706
Longitude:	-121.89217934
Case Type:	Cleanup Program Site
Case Worker:	CH
Local Agency:	Not reported
RB Case Number:	SL18208588
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	Site is a former transformer factory with volatile organic compounds (VOC) and polychlorinated biphenyl (PCB) impacts. Site has been remediated but a deed restriction requires installation of vapor barriers under new structures. Site is being redeveloped into housing. Not reported

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site ID:	392761
Site Name:	FLEX INTERCONNECT TECHNOLOGIES INC
Violation Date:	11-12-2014
Citation:	22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description:	Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.
Violation Notes:	Returned to compliance on 12/16/2014. Waste Analysis plan was provided at time of inspection but found to be incomplete. Plan states a composite samples is taken and analyzed for the metals and pH. Facility personnel confirmed that this is not being done. Facility is unsure as to why certain metals are stated in manifests, profiles and LDRs to be in the treated waste (eg. lead). Facility generates waste microetch (Sodium monopersulfate) with sulfuric acid in a 55 gal drum which is then emptied into the treatment system. Facility is unsure as to the oxidizing potential of this waste and whether or not it is a regulated oxidizer as defined in 261.21(a)(4).

Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.
Violation Notes: Returned to compliance on 03/19/2018. Plan states a composite samples is taken and analyzed for the metals and pH. Facility personnel confirmed that this is not being done. Address what types of wastes are going to the treatment system (eg pH ranges, types of metals, oxidizers etc) Facility generates waste microetch (Sodium monopersulfate) with sulfuric acid in a 55 gal drum which is then emptied into the treatment system. Facility is unsure as to the oxidizing potential of this waste and whether or not it is a regulated oxidizer as defined in 261.21(a)(4). Starch iodide test strip test was positive. REPEAT VIOLATION FROM INSPECTION ON 11-12-2014.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Last PBR renewal notification was submitted on 2-15-17 and Santa Clara County Department of Environmental Health granted treatment authorization on 3-27-17. Facility performs batch treatment of plating bath rinses and drag out. pH is raised for flocculation and adjusted back down when needed. Primary holding tank is single walled and has a relief pipe near the top of the tank so waste could flow to a second holding tank prior to treatment in tank 3. After treatment in tank 3, waste water is tested for levels of copper using hach kit and pH is strip tested. If copper is below regulated hazardous waste levels and under POTW discharge limits, and pH within ok parameters, it is released to the final discharge and to the POTW. TREATMENT SYSTEM VULNERABILITIES: Since all treatment is performed in batches, system has limited vulnerabilities such as: *Operator error - pH strip test performed inaccurately or results misread AND probe in final effluent tank malfunctions [Truncated]

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

JONES-985 MONTAGUE (Continued) **S100281115**

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern: Not reported
Site History: JCI Jones operated a chemical packaging and distribution facility at the Milpitas location from the early 1960s through 1999. Historically, the facility received bulk chemicals, including chlorine gas, sulfur dioxide, anhydrous ammonia, various acids and bases, and volatile organic compounds (VOCs) by rail or tank truck and repackaged these chemicals into cylinders or drums. On July 2, 1982, a partially filled aboveground storage tank containing an estimated 2,000 to 4,000 gallons of chlorinated solvent exploded, releasing its contents to the land surface and to the adjacent Berryessa Creek via a storm drain. Initial cleanup of the spill involved pumping and disposing of liquid from the storm drain and creek and excavating approximately 280 cubic yards of sediment from the creek bed. Since that time, JCI Jones has been engaged in an ongoing groundwater investigation, cleanup, and monitoring program under the oversight of the RWQCB. Soil vapor sampling occurred in 2009 and 2014 indicating that there is TCE and PCE vapor present above residential and commercial ESLs (Off-Site Soil-Vapor Investigation Report, Arcadis, 2014).

Comments:	PCE and gasoline spills in June '84 and December '85 recently triggered countyt involvement. Preliminary assessment of 1987 recommended DTSC (then DHS) and city of San Jose review permit to upgrade spill containment. But also says No Further Action (NFA). No

SHELL OIL PROD US EQUILON SAN (Continued) **U001603051**

further action per EPA preliminary assessment for the site only determined that the hazard ranking score (HRS) would not admit it into National Priority List (NPL). DTSC's recommendation on re-evaluation of the site reflects the departments own criteria. Recommendation is County Lead. Limited DTSC involvement anticipated.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Other Chlorinated Hydrocarbons, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The Equilon site (formerly Shell Oil) is an operating petroleum product distribution terminal, which is used to store gasoline, diesel fuel, and fuel additives. The 9.6-acre site is located on the northeast side of Coyote Creek in a commercial area of San Jose. The site began operation in the mid 1960 s, as it was constructed from 1964 to 1965. The site includes four (4) aboveground fuel tanks, three (3) aboveground fuel additive tanks, a (1) below-grade 4,000-gallon transmix tank, a four-lane fuel loading rack, three (3) aboveground wastewater tanks, and several buildings. The plant stores and distributes three (3) grades of gasoline from the truck loading rack.

Title:	13267 Requirement for Technical Reports/Information for Shell San Jose Terminal
Description:	13267 letter requires 5 report submittals aimed at achieving and demonstrating full delineation of TPH, BTEX, and MTBE impacts to groundwater, source identification and evaluation, and a comprehensive remedial action plan for all impacts. The letter also requires a report documenting storm water sampling to better evaluate storm water discharge threats and BMP appropriateness. Submittal due dates range from January 15, 2007 through August 15, 2007.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/05/1995
Comments: No further action (NFA). In January 1990, an underground storage tank was removed as part of remedial activities. Soils contaminated with TPH (620 ppm), benzene (0.61 ppm), toluene (0.45 ppm), ethylbenzene (1.5 ppm), xylene (25 ppm), and total DDT (8.98 ppm avg.) were excavated and disposed in June 1991 and August 1991 as part of ust removal activities under direct supervision by the Santa Clara Valley Water District. A Preliminary Endangerment Assessment (PEA) was conducted to address potential threat to human health and the environment with a target cleanup level for total DDT of less than 0.9 ppm. Based on our review of submitted information, no significant threat to human health exists at present and no further action is necessary.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/05/1995
Comments: No further action (NFA). In January 1990, an underground storage tank was removed as part of remedial activities. Soils contaminated with TPH (620 ppm), benzene (0.61 ppm), toluene (0.45 ppm), ethylbenzene (1.5 ppm), xylene (25 ppm), and total DDT (8.98 ppm avg.) were excavated and disposed in June 1991 and August 1991 as part of ust removal activities under direct supervision by the Santa Clara Valley Water District. A Preliminary Endangerment Assessment (PEA) was conducted to address potential threat to human health and the environment with a target cleanup level for total DDT of less than 0.9 ppm. Based on our review of submitted information, no significant threat to human health exists at present and no further action is necessary.

Completed Document Type: Voluntary Cleanup Consultation
Completed Date: 05/10/2001
Comments: Completed VCA Consultation. DTSC provided consultation on soil removal activities overseen by the Milpitas Fire Department (MFD). Approximately 28 tons of contaminated soils with elevated levels of metals were excavated and disposed offsite. Groundwater underlying the site is contaminated from an upgradient source currently under the oversight of the SF Regional Water Quality Control Board. The Santa Clara County Department of Environmental Health provided direct oversight on the closure of the site's wastewater treatment facility. No further action was recommended by DTSC.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/12/2020
Date Data Arrived at EDR: 05/12/2020
Date Made Active in Reports: 07/27/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Northeast Map:	5640636 CALAVERAS RESERVOIR, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

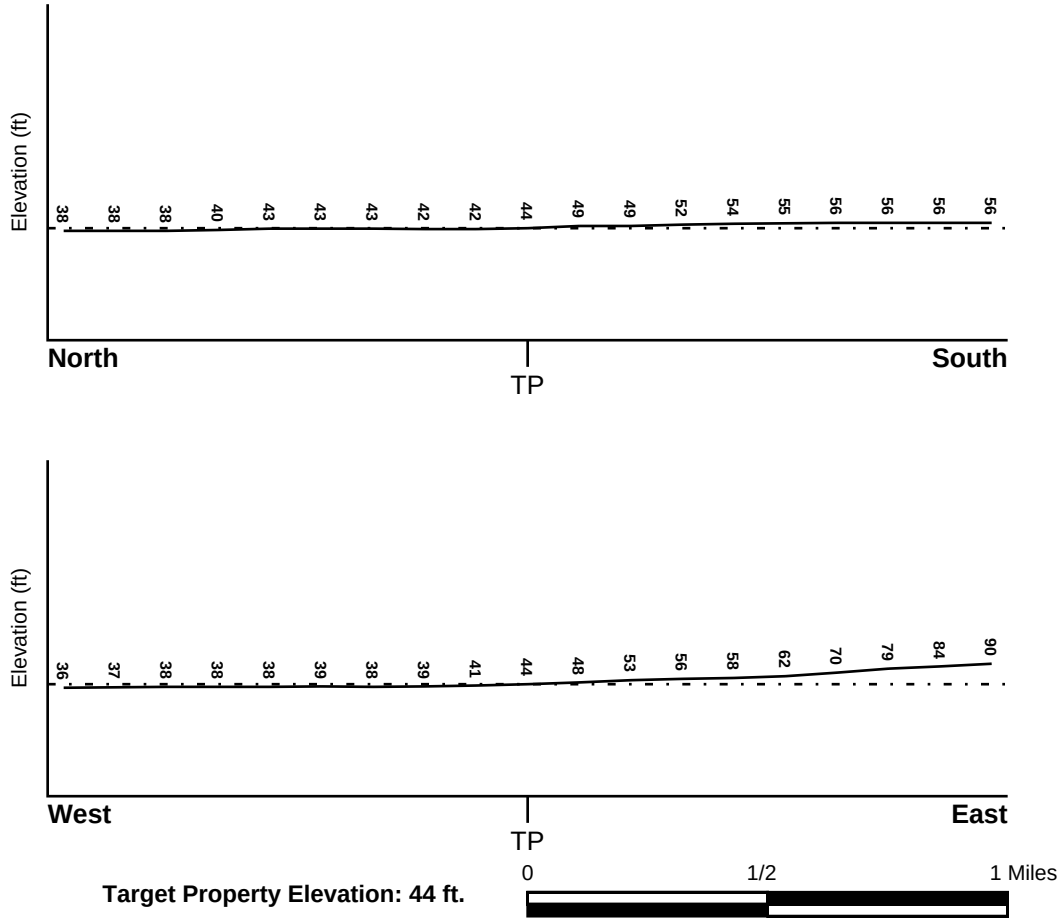
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 44 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0069H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0066J	FEMA FIRM Flood data

06085C0068J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MILPITAS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNE
Site Name:	North American Transformer
Site EPA ID Number:	CAD044867604
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	4 feet to 16 feet.
Hydraulic Connection:	An aquitard that separates the upper and lower aquifers at the site is absent within one mile of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	CLEAR LAKE
Soil Surface Texture:	clay
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	13 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.20 Min: 0.06	Max: 8.40 Min: 6.10
2	13 inches	60 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.20 Min: 0.06	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
clay loam
loam
silt loam

Surficial Soil Types: silty clay loam
clay loam
loam
silt loam

Shallow Soil Types: clay
gravelly - sandy clay loam
clay loam
stratified

Deeper Soil Types: clay loam
stratified
silty clay loam
sandy clay loam
silty clay
loam
weathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

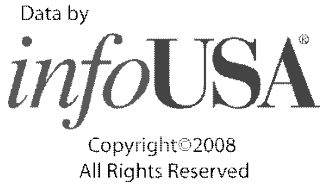
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

ENVIRONMENT & HEALTH

WENDY A SEIDER

Principal

Wendy Seider has more than 19 years of consulting experience, primarily focused on environmental due diligence and compliance assessment and assistance. She has conducted and managed thousands of environmental assessments and due diligence reviews in a variety of industrial and commercial sectors. These reviews have assessed on- and off-site environmental liabilities that may be associated with either past or current operations. Wendy also has extensive experience in performing comprehensive environmental compliance auditing, with a particular focus on facilities in California and other western states. In addition, she routinely supports clients in a wide array of compliance assistance tasks, including the development of required plans and procedures, preparation of regulatory submittals, implementation of compliance programs and development and evaluation of internal company standards.

EDUCATION

1996-2000
BS, Environmental Engineering
Harvard University, Cambridge, MA, United States

COURSES/CERTIFICATIONS

Nevada Certified Environmental Manager, 2011-present
California Qualified Industrial Stormwater Practitioner, 2018-present

EXPERIENCE HIGHLIGHTS

- Conducted and managed due diligence environmental assessments of more than 1,000 industrial, manufacturing, and commercial facilities throughout the United States and Canada to assess any on- or off-site environmental liabilities that may be associated with either past or current operations conducted at each site. Inspected sites and interviewed personnel to evaluate facility compliance with federal and state regulatory requirements regarding air, water, and soil pollution, hazardous materials and waste management, and occupational safety and health. Sites visited have included: technology companies, semiconductor fabrication, power plants, waste-to-energy facilities, oil and gas exploration and production related facilities, metal foundries, fiberglass manufacturers, chemical plants, cement plants, steel mills, waste processing facilities, printers, a sugar refinery, metalworking facilities, pharmaceutical and food manufacturers, recreational facilities, maintenance shops, and numerous other operations.
- Either as part of environmental due diligence assessments or as separate dedicated efforts, performed numerous product compliance reviews of a wide variety of product types, such as electronics, pesticides, cosmetics, body and hair care products,

spray foam insulation, building materials, coatings, furniture, and artificial sweeteners. Evaluated U.S. obligations (e.g., TSCA, FIFRA, GHS, FTC Green Guides, CPSC rules, VOC content limits), more stringent California requirements (e.g., Proposition 65, California Safer Cosmetics Products, VOC content limits for consumer products), and international requirements (e.g., REACH, RoHS, WEEE, Packaging Waste). Prepared standalone or integrated due diligence reports of findings.

- Participated in a nationwide compliance auditing program for a major snack food manufacturer. Completed numerous comprehensive compliance audits in California and elsewhere that covered compliance with regulatory requirements and conformance with more stringent internal standards. Topics covered (among others) included air emissions, waste management, hazardous materials, storage tanks, wastewater, and storm water. Ranked facilities using an internal scoring system.
- Assisted a multi-national semiconductor company in developing environmental, health, and safety standards and in preparing self-audit checklists for conformance with standards and compliance with regulatory obligations. Checklists were developed for numerous facilities in the United States and Asia and were used to perform detailed third-party compliance audits at select facilities.
- For over twelve years, have managed on-site full-time environmental staff for a pharmaceutical research and development facility. Oversaw staff day-to-day activities and longer term projects, addressed compliance problems as they arose, participated in agency inspections and meetings with contractors related to environmental matters, and provided periodic updates to regional environmental, health, and safety officer. Associated with the project, performed detailed compliance audits at the facility focusing on hazardous and biomedical waste management, hazardous material management, wastewater and storm water discharges, and air permit compliance.
- Managed the performance of comprehensive compliance audits of 50 vehicle oil change facilities located throughout California. Prepared a detailed audit protocol, inspected sites, interviewed facility personnel, and performed a detailed evaluation of the facilities' compliance with federal, state, and local regulatory requirements primarily related to waste management, chemical storage and usage, wastewater discharges, air emissions, and health and safety.
- Performed a high-level audit of environmental programs in place at a nationwide telecommunications company with regards to waste management, underground storage tanks, and employee training programs. The company maintained thousands of remote locations that were coordinated through a central command. Audit was performed to comply with a Consent Judgment issued by the California Department of Toxic Substances Control.
- Performed comprehensive compliance audits focused on management of hazardous waste and hazardous materials at two large campuses operated by a pharmaceutical manufacturer. Following completion of the audits and preparation of summary reports, provided consulting services to assist the facilities in attaining and maintaining compliance.
- Prepared site-specific regulatory compliance guides and detailed waste management guides for a transportation company operating at a number of facilities throughout Southern California.
- Assisted a chemical manufacturing facility in identifying potentially hazardous waste streams and characterizing these streams based on California-specific hazardous waste and extremely hazardous waste criteria.
- Prepared or managed preparation of numerous Storm Water Pollution Prevention Plans (SWPPPs), with a focus on the California general industrial storm water permit. In addition, assisted facilities in SWPPP implementation (e.g., preparation of annual reports, annual training) and managed preparation of numerous Level 1 Exceedance Response Action (ERA) reports required under the California general industrial storm water permit for facilities with storm water containing constituents in excess of Numeric Action Levels (NALs).
- For a large technology company with numerous data centers, provide ongoing support for regulatory compliance matters. For example, oversaw preparation and frequent updates to Spill Prevention, Control, and Countermeasure (SPCC) plans, Hazardous Materials Business Plans (HMBPs), and local fire department hazardous material permits.

Appendix D: Environmental Lien Search

Appendix E: Qualifications of Environmental Professionals

1. SUMMARY OF CONCLUSIONS

1.1 Introduction

The Environment & Health group of Ramboll US Consulting, Inc. (Ramboll)[1] was retained by SI SVYL1, LLC, a Delaware limited liability company (Stack) to conduct a Phase I Environmental Site Assessment (ESA) of the vacant industrial property at 1849 Fortune Drive in San Jose, California (the "site" or the "facility").

The objective of the Phase I ESA, which was conducted in conformance with the scope and limitations of ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* E1527-13 (the "ASTM Standard"), was to identify Recognized Environmental Conditions (RECs), as defined in the ASTM Standard.

To help evaluate the business risk of the identified environmental findings, Ramboll considered various factors, exercised its judgment, and categorized these findings, based on a significance threshold of $50,000, as follows:

> *Significant* – Confirmed or otherwise demonstrated impairment of environmental media that typically would require expenditures in excess of the significance threshold.
>
> *Potentially Significant* – Potential impairment of environmental media that has not been confirmed or otherwise demonstrated through appropriate collection of data or technical analysis. Expenditures in excess of the significance threshold could be required if potential impairment were to be confirmed.
>
> *Unlikely Significant* – Issues that are not expected to result in expenditures in excess of the significance threshold.

Table 1.1 presents an overview of Ramboll's key findings and the business risk that these findings represent, and additional discussion of the individual findings is presented in Section 1.2 below. The findings and conclusions of Ramboll's Phase I ESA are presented in Section 3.7 of this report.

Table 1.1: Overview of Ramboll's Key Findings

Finding (and ASTM Characterization [1], where applicable)		Business Risk
Phase I Environmental Site Assessment		
Past Industrial Operations at the Site	REC	Potentially Significant

Notes:

[1] See Chapter 4 for definitions from the ASTM Standard.

1.2 Summary of Phase I ESA

Ramboll's Phase I ESA covered a vacant industrial property located at 1849 Fortune Drive in San Jose, Santa Clara County, California (the "site" or the "facility"). The approximately 3.7-acre site is

[1] Ramboll was previously known as Ramboll Environ US Corporation and ENVIRON International Corporation.

improved with an approximately 57,000-square-foot building. An equipment pad to the west of the building houses electrical panels, water chillers, tanks, and trenches.

The site was used as farmland from as early as 1939 until the existing building was constructed in 1981 for use by SEEQ Technology Incorporated (SEEQ) for fabrication of semiconductor microchips. SEEQ operated at the site until 1995, when Micrel Semiconductor Inc. (Micrel) acquired the property and continued semiconductor microchip manufacturing operations. Micrel was acquired by Microchip Technologies in 2015. In 2016, manufacturing operations ceased, and certain facility decommissioning activities were undertaken. HC 1849 Fortune LLC acquired the site in 2017 under an agreement to complete remaining facility decommissioning activities. Facility decommissioning activities were completed in 2019, and the site has remained vacant since that time.

Recognized Environmental Conditions

Ramboll performed a Phase I ESA of the site at 1849 Fortune Drive in San Jose, California in conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 3.8 of this report. This assessment has revealed the following REC in connection with the site:

- **Past Industrial Operations at the Site.** The site was formerly used for the fabrication of semiconductor microchips by SEEQ from the early 1980s to 1995 and by Micrel (later acquired by Microchip Technologies) from 1995 until 2016. These past operations involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning, which included the use of solvents, gases, acids, and other chemicals. Of note, these past operations involved the use of an acid waste neutralization system (which appears to have been comprised of epoxy-coated subgrade trenches containing piping, and a sump as well as aboveground process tanks),[2] generation of hazardous wastes, and use of two vapor degreasers containing halogenated solvent presumed to be trichlorotrifluoroethane (Freon 113 or Blaco Tron TMS+) based on information in a 2017 Phase I report (a 1992 regulatory inspection noted a solvent leak that was reportedly contained and cleaned up, but no details were available). As detailed in Section 3.7.1, the facility underwent decommissioning and closure activities between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-site disposal of arsenic-impacted soils from this area to commercial/ industrial cleanup standards or background levels). The facility closure activities did not involve the collection of soil gas or groundwater samples or the collection of soil samples in areas of the site other than in the vicinity of the former acid neutralization system. Due to the extended past industrial use (including prior use of vapor degreasers with halogenated solvents) and the limited nature of past subsurface investigation activities, Ramboll considers the past industrial operations at the site to represent a REC.

A discussion of one Historical REC and one *de minimis* condition identified during this review is presented in Section 3.7 of this report.

[2] The site is listed on environmental databases related to a subgrade 375-gallon acid waste sump and a 350-gallon waste underground storage tank (UST). The 2017 Phase I report suggests that one or both of these features may have been part of the former acid neutralization system.

2. INTRODUCTION

2.1 Scope of Work

Ramboll conducted a Phase I ESA of the vacant industrial property at 1849 Fortune Drive in San Jose, California. The environmental review relied on the references noted below and included the following tasks:

- A visit to the site by Emily Cox of Ramboll on September 22, 2020 to observe the exterior and interior features of the site and to identify the uses and conditions specified in Sections 9.4.1 through 9.4.4.7 of the ASTM Standard. In addition, Ramboll observed the adjoining properties from the site or adjacent public thoroughfares. Photographs taken during the site visit are presented in Appendix A.
- A review of information contained in federal and state environmental databases, as obtained from the sources noted below:
  - A radius report prepared by Environmental Data Resources, LLC (EDR, see Appendix B), which presents the results of searches of federal and state databases for the subject site, as well as properties near the subject site. The radius searched for each database, as well as the databases themselves, were selected in accordance with the ASTM Standard.
  - The U.S. Environmental Protection Agency's (USEPA's) Envirofacts database, which provides site information contained in multiple USEPA regulatory databases.
  - The USEPA's Enforcement and Compliance History Online (ECHO) database, which provides information on sites' enforcement and compliance history.
  - The California GeoTracker and EnviroStor databases, which contain contamination-related information from the State Water Resources Control Board (SWRCB) and Department of Toxic Substances Control (DTSC), respectively.
  - The California Hazardous Waste Tracking System (HWTS), which provides information from waste manifests submitted to the DTSC, and the Stormwater Multiple Application and Report Tracking System (SMARTS), which provides information on stormwater permits, violations, and monitoring reports.
  - The California Environmental Protection Agency (CalEPA) Regulated Sites Portal, which provides compliance-related information for facilities throughout the state.
  - The California Geologic Energy Management Division (CalGEM) Wellfinder tool, which contains information on oil and gas, dry, injection, and extraction wells.
- A review of standard historical sources and local agency inquiries, as defined in the ASTM Standard. The following resources were reviewed:
  - Readily available historical sources (as identified in Section 3.2 of this report and included as Appendix C) to develop a history of the previous uses of the site and surrounding area.
  - Local building permit information from the San Jose Department of Planning, Building, and Code Enforcement, as obtained from EDR.
  - Historical and site-specific information obtained from the following local agencies: the County of Santa Clara Office of the Assessor, San Jose Fire Department (SJFD), and Santa Clara County Department of Environmental Health (SCCDEH). Ramboll also attempted to obtain

information from the Santa Clara County Fire Department, but personnel from this agency reported having no information pertaining to the site.

- A review of documents provided to Ramboll by facility personnel, including environmental permits, waste manifests/off-site waste disposal information, facility decommissioning documents, closure permits, correspondence with regulatory agencies, facility-prepared plans and procedures, site maps, and chemical use information. In addition, Ramboll was provided with the following previous environmental reports:
  - *Phase I Environmental Site Assessment, Microchip Fab Plant*, prepared by Partner Engineering and Science, Inc (Partner), dated April 2017 (the "2017 Phase I Report");
  - *Micrel LLC Partial Facility Closure Report,* prepared by Microchip Technology Inc, dated May 2017 (the "2017 Partial Facility Closure Report");
  - *Soil Sampling Activities, Former Micrel Manufacturing Facility,* prepared by Geosyntec Consultants (Geosyntec), dated October 2018 (the "2018 Soil Sampling Report");
  - *Facility Closure Report, Former Micrel Manufacturing Facility,* prepared by Geosyntec, dated August 31, 2018 (the "2018 Facility Closure Report");
  - *Final Facility Closure Report, Former Micrel Manufacturing Facility,* prepared by Geosyntec, dated December 10, 2018 (the "2018 Final Facility Closure Report"); and
  - *Arsenic Soil Removal Completion Report, Former Micrel Manufacturing Facility,* prepared by Geosyntec, dated January 2019 (the "2019 Soil Removal Report").
- A review of physical setting sources, as defined in the ASTM Standard, including:
  - The current USGS 7.5-minute topographic map that shows the area on which the site is located.
  - Geologic, hydrogeologic, or hydrologic sources as provided in the EDR report and the previously-listed prior environmental reports.
- A search for environmental liens or other activity and use limitations (AULs), provided by the third-party database provider (as shown in Appendix D). Ramboll ordered the lien search using the parcel number identified by the local tax assessor's office and other online resources as being associated with the main portion of the site.

2.2 Reliance and General Limitations

This report has been prepared for the exclusive use of Stack and may not be relied upon by any other person or entity without Ramboll's prior express written permission.

This report is considered current only for a period of 180 days from the site inspection. The conclusions presented in this report represent Ramboll's best professional judgment based upon the information available and conditions existing as of the date of the review. In performing its assignment, Ramboll must rely upon publicly available information, information provided by the client and information provided by third parties. Accordingly, the conclusions in this report are valid only to the extent that the information provided to Ramboll was accurate and complete. This review is not intended as legal advice, nor is it an exhaustive review of site conditions or facility compliance. Ramboll makes no representations or warranties, express or implied, about the conditions of the site.

Ramboll's scope of work for this assignment did not include collecting samples of any environmental media. As such, this review cannot rule out the existence of latent conditions, and is intended, consistent with normal standards of practice and care, to assist the client in identifying the risks of such conditions.

The scope of work for this assessment did not include an asbestos survey or inspection. According to federal OSHA regulations (29 CFR §1910.1001) and the Model Accreditation Plan (MAP; 40 CFR Part 763, Subpart E, Appendix C), the inspection, testing, evaluation, and/or sampling of suspect asbestos-containing materials must be conducted by an accredited inspector; these activities were not performed as part of this environmental review. Comments in this report regarding the condition of building materials at the site, including presumed or suspect ACM, represent only Ramboll's observations at the time of the site visit and are not intended to be consistent with definitions regarding ACM condition in the Asbestos Hazard Emergency Response Act (AHERA) or in other federal or state asbestos regulations or industry standards.

Other issues considered outside the scope of the ASTM Standard and this review include regulatory compliance, asbestos-containing materials, off-site waste management facilities, radon, lead-based paint, lead in drinking water, wetlands, polychlorinated biphenyls (PCBs) in building materials, cultural and historic resources, ecological resources, endangered species, fire safety, and high voltage power lines.

3. PHASE I ENVIRONMENTAL SITE ASSESSMENT

3.1 Site Setting

The approximately 3.7-acre site is located approximately 4.5 miles north of downtown San Jose (Figure 1). The site is developed with an approximately 57,000-square-foot building, which is located in the eastern portion of the property (Figure 2). The building is majority single-story with a mezzanine in the eastern portion. The building was vacant at the time of Ramboll's visit. Other features on the site include an equipment pad to the west of the site building containing a number of unused air compressors, water chillers, water tanks, pits, trenches, and electrical panels. At least one transformer and a loading dock are present on the western portion of the site. Two unused acid fume water scrubbers and a diesel-powered generator were observed in a fenced area to the north of the building.

The primary site access is from Fortune Drive at the southern site boundary. An asphalt-paved parking lot is located south of the main building, and a paved driveway along the west side of the building leads to an additional parking area on the north side of the building. The area west of the paved driveway is overgrown with grass and other vegetation. Vines extend along exterior building walls, and additional vegetation is present in the trench to the west of the building. A concrete containment area to the west of the site building as filled with about one foot of water and some aquatic vegetation growth. Table 3.1 provides an overview of physical setting and utility information for the site.

Table 3.1: Physical Setting and Utility Information

Conditions	Source	Description
Topography and Local Land Use		
Elevation (above mean sea level)	USGS topographic map; Google Earth	Ranges from approximately 44 feet near the southwestern corner to 45 feet near the northern property boundary.
Topographic Gradient	USGS topographic map; Visual observations	Relatively flat, with a gentle downward slope to the southwest. Regional topography slopes gently downward to the northwest.

Table 3.1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Local Land Use	Visual observations	The facility is located in a mixed industrial and commercial land use area. North: Olympus America (optical products repair), beyond which is Trade Zone Boulevard. A residential neighborhood is located further north. West: Several commercial buildings with tenants including several machine shops and commercial printers, beyond which is Ringwood Avenue. South: Fortune Drive, beyond which is a commercial building with tenants including data centers and a cell phone store. Several other commercial buildings are located further south. East: Offices for Microchip Technology, beyond which are several other commercial buildings including data centers and machine shops. Ramboll did not observe any conditions on adjacent properties that represent a potential contamination concern to the subject site.
Nearest Residence	Visual observations	Approximately 530 feet north of the site.
Hydrology		
Storm Water Runoff	Visual observations	Percolates into the ground surface at unpaved areas or enters catch basins that discharge to the municipal storm sewer system.
Nearest Surface Water Body to the Site	USGS topographic map; Visual observations	Penitencia Creek located 0.3 miles northwest. The tributary ultimately discharges to Coyote Creek, a northerly-flowing creek located 1.1 miles east.
Flood Plain	FEMA*	The site is located within a 100-year flood zone.
Wetlands	NWI*	No on-site federally designated wetlands.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	USGS topographic map; Geotracker	Based on the topographic gradient and the northerly flow direction of Coyote Creek, shallow groundwater likely flows to the northwest. Environmental documents posted to Geotracker for a property approximately 0.35 miles north-northeast of the subject site confirmed that groundwater flows to the northwest.
Depth to Groundwater	2018 Soil Sampling Report	According to the 2018 Soil Sampling Report, a soil boring advanced under the site building encountered groundwater at approximately 25 feet below ground surface (bgs).
On-site Wells	CalGEM Well Finder; Visual observations	No production, monitoring, or oil/gas wells.

Table 3.1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Nearest Groundwater Supply Wells	Database report	No federally registered wells are present within one mile of the site. One private or municipal well that may be used for water supply was identified between one-half mile and one mile west-northwest of the site.
Geologic Conditions	2019 Soil Sampling report	Based on 2018 soil sampling, the site is underlain by a combination of lean clay, clayey sand, and silt to a depth of 25 feet bgs (the boring termination depth).
Site Utility Information		
Heating and Cooling Equipment	2018 Final Facility Closure Report; Closure documentation provided by facility personnel	Natural gas-fired heating units supply building heat. The building is cooled with rooftop air conditioning units. According to a Demolition Contract provided by facility personnel, Rutan Environmental Service, Inc. was contracted to remove all heating, ventilation, and air conditioning ducting on July 19, 2018.
Natural Gas Service	2018 Final Facility Closure Report	The site is provided with natural gas service.
Use of Fuel Oil for Building Heat	N/A	Information not readily available.
Foam-based Fire Suppression System	Documentation from facility personnel; Visual observations	According to documentation from a Fire Prevention Inspection conducted in March 2019, there was formerly an overhead fire sprinkler system within the building that was demolished in 2019. Ramboll did not identify evidence of a foam-based fire suppression system.
Water Supply	2018 Final Facility Closure Report	The facility receives drinking water from the San Jose water system. The domestic water connection to the facility's deionized water/industrial water system was isolated during decommissioning activities in 2018 by closing the supply valve.
Sanitary Sewer	2018 Final Facility Closure Report	The facility discharges wastewater to the municipal sanitary sewer system.
Septic Systems	2017 Phase I Report; Visual observations	No identified current or former septic systems.

Table 3.1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Notes: FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey; NWI = National Wetlands Inventory * Source was provided in the environmental database report. During the site visit, Ramboll walked or drove by the borders of the properties that are adjacent to the subject site. Ramboll did not enter the neighboring properties.		

3.2 Historical Uses of the Site and Adjacent Sites

3.2.1 Past Uses of the Site

The site was used as farmland from as early as 1939 until the existing building was constructed in 1981 for use by SEEQ for fabrication of semiconductor microchips. SEEQ operated at the site until 1995, when Micrel acquired the property and continued semiconductor microchip manufacturing operations. Micrel was acquired by Microchip Technologies in 2015. In 2016, manufacturing operations ceased, and certain facility decommissioning activities were undertaken. HC 1849 Fortune Drive LLC acquired the site in 2017 under an agreement to complete remaining facility decommissioning activities. Facility decommissioning activities were completed in 2019, and the site has remained vacant since that time.

A summary of Ramboll's key observations from the available historical sources is presented in Table 3.2.

Table 3.2: Summary of Key Observations from Historical Sources for the Subject Site	
Historical Source	**Key Observations Regarding Site History**
Aerial Photographs (1939, 1940, 1948, 1950, 1956, 1963, 1968, 1974, 1979, 1982, 1993, 1998, 2006, 2009, 2012, and 2016) Satellite Imagery[1] (1999 to 2019)	The site appears as farmland, including orchards, with an apparent residence in the eastern portion on all photographs until 1982. The 1982 and subsequent photographs show the site in its present configuration, with one building present. No concerns are noted.
Topographic Maps (1889 to 2012)	No development is depicted at the site on any of the maps. No concerns are noted.

Table 3.2: Summary of Key Observations from Historical Sources for the Subject Site	
Historical Source	**Key Observations Regarding Site History**
City Directory Abstracts (1922, 1925, 1926, 1930, 1931, 1935, 1936, 1940, 1942, 1945, 1946, 1950, 1955, 1957, 1960, 1962, 1963, 1964, 1965, 1966, 1968, 1970, 1974, 1975, 1978, 1980, 1982, 1985, 1986, 1991, 1994, 1996, 1999, 2000, 2001, 2004, 2006 2009, 2014, and 2017)	The address was not listed on any directories until 1985. The occupants of the site are listed as: SEEQ Technology Incorporated (1980-1991) and Micrel Semiconductor Inc/Micrel Inc (1994-2017).
Lien Search Report	The lien search report indicates that HC 1849 Fortune LLC acquired the site in 2017 from Micrel LLC. No liens or AULs are associated with the site.
2017 Phase I ESA Report	According to the 2017 Phase I Report by Partner, Microchip Technologies acquired the site in 2015 from Micrel Semiconductor Inc. Micrel Semiconductor Inc. acquired the site in 1995 from SEEQ. Based on records reviewed by Partner from the San Jose Fire Department and an August 1991 Hazardous Materials Management Plan (HMMP) for SEEQ, Partner noted past storage of isopropyl alcohol, acetone, and trichlorotrifluoroethane (Freon 113 or Blaco Tron TMS+) in quantities of up to 35 gallons in a Vapor Degreaser Room. Partner presumed the Freon 113 to be the solvent used in the vapor degreaser at the time of a liquid solvent leak noted during a Bay Area Air Quality Management District (BAAQMD) inspection in 1992. Documentation from a San Jose Fire Department inspection on May 9, 1992 indicates that the leak was reportedly within secondary containment and was cleaned up. No additional information was available. According to the Phase I report, hazardous materials used and stored throughout the site in association with the fabrication of semiconductor microchips since 1982 included hydrofluoric acid (HF), mixed solvent waste, and debris contaminated with arsenic. Documentation from the Santa Clara County Consumer and Environmental Health Agency (CEHA) reviewed by Partner included a 2012 Assessment Report on the Waste HF system by Chow Engineering. The report noted the piping to the HF tank was in "very poor condition;" a 2001 inspection indicated no secondary containment was present to capture potential releases; and a San Jose Fire Department Record of Inspection from October 29, 1992 noted liquid spillage under sinks and waste piping and indicated waste piping needed leaks repaired.
2018 Final Facility Closure Report	Primary gases used on the site by Micrel included helium, oxygen, sulfur hexafluoride, Freon, chlorine, arsine, and hydrogen bromide. Photoresist coating (solvent) was used in the photolithography area in the southern center of the building. During decommissioning activities, two diesel-powered generators were emptied and left in place, four acid fume water scrubbers were power washed, and two acid fume water scrubbers were removed.

Table 3.2: Summary of Key Observations from Historical Sources for the Subject Site

Historical Source	Key Observations Regarding Site History
Santa Clara County Tax Assessor Website	Tax assessor records indicate that the deed for the site was last transferred on May 12, 2017. The Assessor's Parcel Number (APN) is 236-48-308.
San Jose Fire Department	Fire department records include inspections related to facility closure and routine fire prevention activities. Documentation from an inspection on April 25, 2017 notes that all hazardous materials had been removed excluding tanks and inert gas containers. Also included was a Hazardous Material Tank Removal Plan from April 20, 2018 that detailed the demolition and disposal of a hydrofluoric acid waste tank and a calcium hydroxide reagent tank. Removal of these tanks is further discussed in Sections 3.5.2 and 3.7.1. Also included were closure plans for a 450-gallon diesel tank, 300-gallon diesel tank, 55-gallon diesel tank, and 165-gallon diesel tank associated with the emergency generators on-site. The reports note that the generator tanks were closed and left in place on the generator frame after remaining diesel fuel was removed.
Santa Clara County Department of Environmental Health	Santa Clara County Department of Environmental Health files included various compliance documents, past filings, and inspection reports related to Micrel's former operations, including Hazardous Materials Business Plans (HMBPs), the California Accidental Release Program (CalARP) Program (Micrel de-registered in April 2017), hazardous waste generation, and a Permit by Rule (PBR) for the acid waste neutralization system. Documentation from an inspection on May 2, 2018 notes that the neutralization system had been removed, and the tank pad, piping trenches, and area under the lift stations were inspected. Visual degradation was noted and marked to be sampled by a contractor. Soil samples from the trenches were planned to be analyzed at a minimum for pH, fluoride, arsenic, and copper.
City of San Jose Building Department	According to building permits provided by EDR, one of the mechanical chillers was installed in 2004. A 157-horsepower emergency generator was also installed in 2004.

Notes:

[1] In addition to aerial photographs provided by the third-party provider, Ramboll viewed historical satellite imagery provided via Google Earth. Printed copies were not obtained, and imagery dates were not independently verified.

The third-party provider reported that Sanborn fire insurance map coverage is not available for the site.

3.2.2 Past Uses of Adjacent Sites

The properties adjacent to the site were used for agricultural purposes, including orchards, from at least 1939 to 1968, with industrial development present starting in the 1970s. Notable operations on surrounding properties include grinding operations (adjacent to the west in the 1986 city directory), automobile repair (adjacent to the west in the 1991 city directory), machining shops (adjacent to the west in the 2017 city directory and database report in 2018), and laboratory operations (adjacent to the north in the 1999-2017 city directories). Database listings for adjacent sites are further discussed in Section 3.4.2.

3.3 Current Use of Site

The site is currently vacant except a security guard positioned in the driveway to the west of the site building.

3.4 Database Review for the Site and Surrounding Properties

3.4.1 Database Review for the Site

Ramboll reviewed the results of the state and federal environmental database searches performed by a third-party database provider (see Appendix B) and also reviewed information available in the California databases. The site is listed on several environmental databases related to site conditions, as discussed in Table 3.3.

Table 3.3: Summary of Environmental Database Listings for the Site

Summary of Information Contained in Database	Ramboll's Comments
The former site occupants, SEEQ and Micrel,[3] are each listed on the Historical Underground Storage Tank (Hist UST) database associated with one 375-gallon sump containing waste and one 350-gallon UST containing waste comprising hydrofluoric acid, nitric acid, and ammonium fluoride. The sump/tank are listed as having been installed in 1982 and registered in 1988.	This listing may be related to the acid waste neutralization system, as discussed further in Sections 3.5.1 and 3.7.3.
The former site occupant, Micrel, is listed on the EnviroStor Permitted Facilities Listing (HWP) and the EnviroStor database as an inactive tiered permit site and as a Protective Filer. A closure letter available on EnviroStor indicates that Micrel's fixed treatment unit was granted closure on August 1, 2018. The letter also notes that subsequent soil sampling reports identified arsenic contamination above background levels. Soil was excavated, profiled as non-hazardous concrete debris, and disposed of at Clean Harbors Buttonwillow, LLC in Buttonwillow, California.	Ramboll reviewed records from facility personnel and local agencies related to facility closure. This matter is further discussed in Section 3.7.1.
The former site occupants, Micrel and SEEQ, are listed in the Resource Conservation and Recovery Act (RCRA) database as an Large Quantity Generator (LQG) of hazardous waste.[4] Hazardous wastes reported included ignitable waste, corrosive waste, xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, methanol, and hydrofluoric acid.	The listing is for a former site occupant and does not suggest a contamination concern to the site.

Notes:

Former site occupants (Micrel, SEEQ, Hackman Capital Partners, and HC 1849 Fortune, LLC) are also listed on the following databases related to regulatory compliance: California Environmental Reporting System (CERS), HWTS, California National Pollutant Discharge Elimination System (CA NPDES), California Waste Discharge System (WDS), CA Integrated Water Quality System (CIWQS), ECHO, California Hazardous Waste Manifests database (HAZNET), RCRA Non Generator/No Longer Regulated (NonGen/NLR), California Emission Inventory data (EMI), Certified Unified Program Agency (CUPA), San Jose HAZMAT, and Facility Index System/Facility Registration System (FINDS). Listings on these databases, by themselves, are not necessarily indicative of contamination.

[3] The narrative of the listing under the name "Micrel" suggests that the UST operator was SEEQ.

[4] The database report also identifies this former site occupant on the RCRA Treatment, Storage, and Disposal Facility (TSDF) database, but the listing appears to relate to its status as an LQG and not to permitted treatment, storage, or disposal activities.

3.4.2 Database Review for Adjoining Properties

According to the environmental database search report, none of the adjoining properties[5] are listed on databases indicative of a known contamination concern.[6] Some of the adjoining properties are listed on compliance-related databases (e.g., RCRA NonGen / NLR, CERS Hazardous Waste [HAZ WASTE], CA EMI, CA HAZNET, CA CERS, CA HWTS) that identify past industrial uses (e.g., machining, grinding, laboratory operations), as previously described in Sections 3.2.2, but these listings by themselves do not indicate a contamination concern.

3.4.3 Database Review for Other Surrounding Properties

There are several listings in the environmental database report for non-adjoining off-site facilities within applicable ASTM search radii; however, Ramboll has not identified any properties that are likely to represent a potential contamination concern to the site.[7]

3.5 Materials Storage

3.5.1 Underground Storage Tanks and Other Subgrade Structures

The prior occupants, SEEQ and Micrel, are each listed on the historical UST database for operation of one 375-gallon sump and one 350-gallon tank that each contained "waste" with hydrofluoric acid, nitric acid, and ammonium fluoride. The databases indicate that the tank and sump were installed in 1982 and registered in 1988. The 2017 Phase I ESA Report opines that the historical UST listings may have referred to the former underground wastewater sump associated with the former acid waste neutralization system (previously located west of the southwest portion of the building). In support of this opinion, the 2017 Phase I Report noted that records reviewed from the San Jose Fire Department and the Santa Clara County Department of Environmental Health did not identify any current or former regulated USTs on-site, including within HMBPs that would have been required to denote regulated USTs that were present.

Although not considered a UST, Ramboll observed a trench approximately 2 feet wide and 4 feet deep that extended from the central portion of the site building out to the exterior area to the west of the site building. Another trench approximately one foot wide and four feet deep and covered with a metal grate was present in the outdoor equipment area to the west of the site building. According to documentation from the Santa Clara County Department of Environmental Health and the 2017 Phase I ESA Report, these trenches formerly conveyed piping for acidic wastewater. A discussion of

---

[5] Ramboll's analysis of adjoining sites was based on observations made during the site reconnaissance and location information for off-site listings as presented in the database report. Also, for purposes of this analysis, Ramboll considers as "adjoining" properties that are adjacent, even if separated by a road or other physical barrier. Ramboll has not included a discussion of compliance-related databases in this table, as Ramboll considers it unlikely that off-site properties listed on compliance-related databases without indication of a release or chemical mishandling represent a potential risk for contamination to the subject site.

[6] Verizon Business dba MCI WorldCom or Equinix (adjoining to the south) is listed on the aboveground storage tank (AST) database for operation of at least one 10,000-gallon petroleum tank. Database listings for this property indicated that evidence of a leak was observed during a regulatory inspection at the north end of a 3,000-gallon diesel belly tank that resulted in staining to the concrete pad; given that this does not appear to have resulted in an environmental release (e.g., a release to unpaved ground or storm water), it is not considered to represent a contamination concern to the subject property.

[7] In its evaluation, Ramboll considered only non-adjoining sites listed on databases indicative of contamination, with open status, located within one-quarter mile potentially upgradient of the site to represent a potential risk for contamination to the site (as the issuance of regulatory closure suggests that impacts to the subject site from the noted off-site property are unlikely).

investigation and remediation activities associated with the closure of this system is presented in Section 3.7.1.

3.5.2 Aboveground Storage Tanks

Ramboll observed one tank during site reconnaissance in the southwestern portion of the equipment area to the west of the site building, which was labeled "RO Water (City Water)." No leaks or staining were observed in the vicinity of the tank, and it is not considered to represent a contamination concern given that it appears to have stored municipal water.

According to facility closure documents, a bulk liquid nitrogen tank was formerly present on the equipment pad to the west of the site building. It was removed from the site as a part of decommissioning activities between 2016 and 2018.

According to documentation provided by the Santa Clara County Department of Environmental Health, a 3,000-gallon tank containing calcium hydroxide and a 2,500-gallon tank containing waste hydrofluoric acid were previously maintained at the site associated with the acid waste neutralization process. The tanks were removed in 2018 in association with the facility closure. A partial report by Chow Engineering, dated July 20, 2012 and provided in the Santa Clara County Department of Environmental Health files, also notes that 1,700- and 1,798-gallon tanks were used for storage of wastewater in the acid waste neutralization process and that a horizontal 2,000-gallon tank was used for storage of waste hydrofluoric acid. All tanks associated with the acid waste neutralization system were removed as part of the facility decommissioning process. Based on a letter from the County of Santa Clara Department of Environmental Health dated February 5, 2019, the Hazardous Materials Compliance Division considered the treatment operation to be closed as of August 1, 2018 after receipt of the post closure report and results of soil sampling for arsenic. The closure of the acid waste neutralization system is further discussed in Section 3.7.1.

3.5.3 Drum and Other Storage Areas

Ramboll observed an open bunged container of polishing slurry (Nalco 235) and an unlabeled, empty 55-gallon drum in the equipment area west of the site building. Another open-topped 55-gallon drum that appeared partially-full of a black sludge was present under the awning on the loading dock in the southwestern corner of the site building. At least five other 55-gallon drums were present to the west of the driveway in the western portion of the site. One was labeled as previously containing Hypersperse MDC150 (Reverse Osmosis Antiscalant), and another was labelled "Sodium Bisulfate;" the remaining drums did not have obvious labels, and Ramboll could not determine if the drums were partially full or empty. Ramboll did not observe evidence of spills or uncontrolled releases from these storage areas.

According to the 2017 Phase I Report, solvent drums were formerly stored in the exterior equipment area to the west of the site building during Micrel's occupancy. A photoresist remover (solvent) was formerly piped from a 55-gallon drum in this equipment area to various equipment throughout the plant, and waste solvent was piped through aboveground piping back to a waste 55-gallon drum stored in the same area. The historical use of solvent is discussed further in Section 3.7.3.

3.6 Polychlorinated Biphenyls

Ramboll observed three inactive pad-mounted transformers on the western portion of the property; the units are owned by the property owner. The units are not labeled as to their PCB content.

Because the units were likely installed at the time of the site development in 1981, after the 1979 federal ban on the manufacture of PCBs, it is unlikely that the units contain PCBs.

According to the 2017 Phase I Report, there were four active pad-mounted transformers and two inactive pad-mounted transformers on-site at that time. The transformers were owned by the property owner and did not contain PCBs. Ramboll has no further information about prior electrical equipment that may have been removed from the facility.

Ramboll observed no indication of leaks or releases from electrical equipment during the site visit.

3.7 Soil and Groundwater Conditions (Findings, Opinions, and Conclusions)

Information on the soil and groundwater conditions at the site, as well as Ramboll's findings, opinions, and conclusions regarding any such conditions are presented in Sections 3.7.1 to 3.7.3 below. The findings of this assessment are classified based on the definitions in the ASTM Standard. A list of key definitions presented in the ASTM Standard is provided in Chapter 4 at the end of this report.

3.7.1 Prior Environmental Activities

Based on a review of historical site documents and interviews with facility personnel, prior environmental assessment and decommissioning activities have been conducted at the site, as summarized below. Pertinent historical and site-related information contained in the prior reports has been incorporated into other sections of this report.

- **2017 Phase I Environmental Site Assessment.** A Phase I ESA was conducted at the site by Partner in 2017, in association with due diligence activities. The 2017 Phase I Report identified the presence of two RECs, namely the past storage of solvents (i.e., isopropyl alcohol, acetone, and trichlorotrifluoroethane) in a "Vapor Degreaser Room" (with a liquid solvent leak noted during a 1992 regulatory inspection, which was reportedly contained within the building; see discussion in Table 3.2) and the extensive use, conveyance, and storage of hazardous materials (e.g., hydrofluoric acid, other solvents, materials containing arsenic) throughout the site including piping through trenches and subsurface piping in poor condition with observed spillage. These site conditions are discussed further in Section 3.7.2.
- **2016 – 2018 Facility Decommissioning Activities.** According to several reports provided by facility personnel, facility closure activities were undertaken on behalf of Microchip beginning in 2016. The closure was managed by Geosyntec under regulatory oversight by the San Jose Fire Department. In March 2017, Microchip sold the equipment and property to HC Equip Acquisition II, LLC, and the buyer agreed to take over decommissioning activities. Decommissioning conducted in 2016 to 2018 included emptying, decontamination, removal, and disposal of the acid waste neutralization system (overseen by the Santa Clara County Department of Environmental Health); demolition and disposal of an aboveground 2,500-gallon hydrofluoric acid waste tank and two 3,000-gallon calcium hydroxide tanks; and removal of all piping and equipment located in the building trenches. The 2018 Final Facility Closure Report indicates that at the time of closure in 2018, the trench system was damaged and breached in some locations, so cleaning was limited to wiping the trench with detergent and clean water. In addition, two diesel-powered generators were emptied and left in place, and four acid fume water scrubbers were power washed and tested for pH and fluorides (the two older scrubbers were removed, and the newer scrubbers were left in place for re-use if necessary). Roof-mounted building equipment was not removed.

Confirmatory soil samples were collected below the waste trench system, storage vaults, and storage rooms and analyzed for pH, fluoride, arsenic, copper, semi-volatile organic compounds (SVOCs), and isopropyl alcohol (IPA). Copper and fluoride were detected at maximum concentrations of 44.7 milligrams per kilogram (mg/kg) and 2,040 mg/kg, respectively, which are below USEPA Regional Screening Levels (RSLs) for Industrial Sites (47,000 mg/kg each for copper and fluoride) used for comparison in the 2018 Final Closure Report. Ramboll also determined the maximum concentrations of copper in soil[8] to be below the current SFBRWQCB Tier 1 Environmental Screening Level (ESL) (180 mg/kg). One soil sample taken beneath the waste solvent sump was analyzed for IPA, which was not detected in the sample above laboratory detection limits. Soil pH was measured between 4.75 and 9.38 in all 20 soil samples, which is within the nonhazardous waste criteria of 2 to 12.5. Fifteen soil samples were analyzed for SVOCs (i.e., phenol, phenanthrene, fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(a)pyrene, indeno(1,2,3-c,d)pyrene, and benzyl alcohol). Eleven of those samples had no detectable SVOCs. The remainder contained concentrations of SVOCs below USEPA RSLs for Industrial Sites from 2018. Ramboll also compared the maximum concentrations to the current SFBRWQCB Direct Exposure Human Health Risk Levels for a Construction Worker in any Land Use at Any Depth Soil Exposure ESLs (current applicable ESLs), when applicable,[9] and found all SVOC detections to be under the current applicable ESLs. The only constituent of concern detected above the USEPA industrial screening level and the SFBRWQCB ESL was arsenic. The highest concentrations of arsenic were detected in two samples from the same location (S1) underneath the trench at 14.1 mg/kg one foot below the bottom of the trench (six feet bgs) and 37.3 mg/kg two feet below the bottom of the trench (seven feet bgs). According to the documentation provided to Ramboll, the arsenic impacts to soil was delineated to the federal RSL (but not necessarily to the current applicable SFBRWQCB ESL) were planned for excavation in December 2018, as discussed further in the next bullet. Because the SVOCs detections were below the federal RSLs, where established, they were not further delineated or planned for excavation (except where they overlapped with the arsenic exceedances of the federal RSL).

Final surface testing was completed by MJO Earthscience Services Inc (MJOES). Wipe samples were tested for fluoride, arsenic, IPA, SVOCs, and pH. Based on the results of testing, MJOES concluded that decontamination of the facility had been completed, with no recommendations for further decontamination. Following a final inspection on August 7, 2018, the San Jose Fire Department approved of facility closure in a report updated on December 10, 2018, contingent on receipt of an addendum describing soil sampling and remediation in the area of arsenic impacts.

- **2018 – 2019 Subsurface Investigation and Subsequent Soil Remediation.** Pursuant to the 2018 Final Facility Closure Report, soil excavation activities were performed by Geosyntec in early December 2018. Geosyntec advanced one direct-push soil boring adjacent to the previous soil boring S1 and collected soil samples at approximately one-foot intervals from one foot to 16 feet below the trench (six to 21 feet bgs) to delineate the extent of arsenic contamination under the trench. Based on arsenic analysis of soil samples from three, four, and five feet below the trench, Geosyntec delineated the elevated arsenic to a depth of five feet below the trench and identified contamination above background levels to a depth of four feet below the trench (9 feet bgs) based on a maximum concentration of 6.9 mg/kg at five feet below the trench. Ramboll compared this detection to current applicable Direct Exposure Human Health ESLs and determined that 6.9

[8] San Francisco Bay Regional Water Quality Control Board Tier 1 Environmental Screening Levels have not been established for fluoride.

[9] SFBRWQCB Tier 1 ESLs have not been established for benzyl alcohol.

mg/kg exceeds the current applicable ESL of 0.98 mg/kg. However, the detection is within the regional background concentrations of naturally occurring arsenic in the Bay Area, which is between 4.6 mg/kg and 11 mg/kg, according to the 2018 Final Facility Closure report. An area of 2 feet in length, 2 feet in width, and 4 feet depth below the bottom of the trench was excavated and replaced with cement grout. At that time, one composite sample of the excavated soil was analyzed for volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), SVOCs, and CAM 17 metals, and the material was profiled as nonhazardous. A total of four drums of nonhazardous excavated soil and one drum of nonhazardous concrete debris were removed by Clean Harbors and ultimately disposed at a disposal facility in Buttonwillow, California.

Given that the arsenic impacts identified during decommissioning of the acid waste neutralization system were delineated and excavated to commercial/industrial screening levels (or background levels, when higher than the screening levels) to the satisfaction of regulatory authorities, Ramboll considers this matter to represent a Historical REC under continuation of existing commercial/ industrial site use.

3.7.2 Potential Site Conditions

Based on current information and conditions at the facility, Ramboll identified the following findings relating to known and potential site conditions:

- **Past Industrial Operations at the Site.** The site was formerly used for the fabrication of semiconductor microchips by SEEQ from the early 1980s to 1995 and by Micrel (later acquired by Microchip Technologies) from 1995 until 2016. These past operations involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning, which included the use of solvents, gases, acids, and other chemicals. Of note, these past operations involved the use of an acid waste neutralization system (which appears to have been comprised of epoxy-coated subgrade trenches containing piping, and a sump as well as aboveground process tanks),[10] generation of hazardous wastes, and use of two vapor degreasers containing halogenated solvents, presumed to be trichlorotrifluoroethane (Freon 113 or Blaco Tron TMS+) in the 2017 Phase I report (a 1992 regulatory inspection noted a solvent leak that was reportedly contained and cleaned up, but no details were available, See Section 3.7.1 for further information. As detailed in Section 3.7.1, the facility underwent decommissioning and closure activities between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-site disposal of arsenic-impacted soils from this area to commercial/ industrial cleanup standards or background levels). Due to the extended past industrial use (including prior use of vapor degreasers with halogenated solvents) and the limited nature of past subsurface investigation activities, Ramboll considers the past industrial operations at the site to represent a REC
- **Past Use of Site for Agricultural Orchards.** The site was previously used for agricultural purposes, including for fruit orchards, from at least 1939 until the early 1980s. During this time period, an associated outbuilding was present on the eastern portion of the site. The outbuilding may have used aboveground or underground fuel oil tanks for heating purposes and for farm vehicle fueling. Ramboll was not provided with any specific information regarding historical agricultural chemical use, but past orchard operations may have involved the application of

[10] The site is listed on environmental databases related to a subgrade 375-gallon acid waste sump and a 350-gallon waste underground storage tank (UST). The 2017 Phase I report suggests that one or both of these features may have been part of the former acid neutralization system.

arsenical and lead-based pesticides commonly used on orchards in the first half of the 20th century, or other organic pesticides commonly used on orchards thereafter. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product related to this matter, it is not considered a REC; however, absent further information, the potential presence of these compounds in the site subsurface cannot be ruled out. Ramboll notes that this matter is unlikely to result in regulatory scrutiny, assuming no changes to site use. Ramboll further notes that the use of such substances in this region (which is and has been historically widely used for fruit production) would have been fairly widespread and ubiquitous.

- **Limited Pavement and Floor Staining.** Ramboll observed areas of exterior pavement and interior flooring where stains were apparent. Stains ranged from two to ten square feet. Some staining appeared near areas where equipment was previously located. The stains were limited in areal extent, the underlying pavement/flooring appeared to be intact, and no stains appeared to reach floor drains or storm water drains. As such, Ramboll considers this matter to represent a *de minimis* condition.

3.8 Analysis of Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. As such, this section provides a discussion of significant data gaps, if any, that were identified as part of this assessment.

Limiting conditions and deviations from the ASTM Standard for the assessment are discussed below.

- Facility personnel did not have current contact information for representatives of former site owners/occupants. Ramboll made reasonable attempts to obtain such information but it was not otherwise readily available. Thus, Ramboll was unable to interview former owners/occupants about historical operations and site conditions.
- Due to illness, Ramboll was not permitted to interview facility personnel having good knowledge of the uses and physical characteristics of the site. Ramboll's interviews were limited to correspondence with a residential real estate agent who has no involvement with environmental matters at the property.
- Given the large volume (i.e., thousands of pages) of documents provided to Ramboll by the San Jose Fire Department, Ramboll reviewed only the documentation post-dating the prior 2017 Phase I report (which also conducted a review of Fire Department files and summarized the results).
- During the site visit, an outdoor picnic area to the east of the site building was not accessible due to the presence of fencing, but was observed from perimeter areas. In addition, Ramboll did not observe the roof of the building due to access and safety constraints. Also, Ramboll did not observe the western interior portion of the site due to signs cautioning about asbestos danger in the area.
- Historical information, such as aerial photographs, was not readily available to characterize the property from the present back to the property's obvious first developed use or 1940, whichever is earlier. The earliest readily available historical source that would indicate specific site uses is an

aerial photograph, dated 1939, which shows that the property was already developed for agricultural uses. ASTM defines agricultural site use as a "developed" site use. Topographic maps are available dating back to 1889; however, the maps do not provide sufficient detail to evaluate specific site uses.

None of the exceptions, deletions, deviations, or site reconnaissance limitations noted above are considered to represent significant data gaps.

4. ASTM DEFINITIONS

The following definitions are presented in the ASTM Standard:

RECs - Recognized Environmental Conditions:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

CRECs - Controlled Recognized Environmental Conditions:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

HRECs - Historical Recognized Environmental Conditions:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

***De minimis* Conditions:**

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Data Gap / Significant Data Gap:

A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap is significant if other information and/or professional experience raises concerns involving the data gap.

Please note that the term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

LOCATION AND ADDRESS: Southeast corner of Ringwood Avenue and Trade Zone Boulevard (2400 Ringwood Avenue and 1849 Fortune Drive)

RE. File No. PRE21-064: Preliminary Review to explore the possibility of demolishing two existing buildings totaling 135,000 square feet and constructing a four-story approximately 135,000-square foot manufacturing building, two three-story data center buildings totaling 504,221 square feet, one approximately 166,384-square foot parking garage with 355-spaces, and an electrical substation on an approximately 9.78-gross acre site.

Dear Matt,

Thank you for submitting a Preliminary Review for the proposal above. Our goal with the Preliminary Review process is to work with you to arrive at a successful outcome that furthers the development of San Jose as envisioned in the General Plan.

Below are our comments and analysis of your prospective project regarding consistency with the City of San Jose Envision 2040 General Plan and other applicable City regulations and policies:

Proposal Issues and Concerns

Based on review of your application, the items listed below are the substantial issues that would affect the proposed project. These issues are explained in more detail in this letter.

1. Should the applicant choose to formally submit the proposed project, staff suggests the applicant apply for a Planned Development Rezoning and Planned Development Permit. See the Zoning section below.
2. Should the applicant submit a Planned Development Rezoning and Planned Development Permit, the Planned Development Zoning District should demonstrate consistency with the General Plan Land Use Designation of Transit Employment Center and applicable General Plan policies. See the General Plan and Zoning sections below.
3. The project would require design updates to conform with the Citywide Design Standards and Guidelines. Please see the Design Guidelines section below for comments related to site and building design.

Preliminary Review

1. Project Description

Based on the conceptual plans and information you provided, we understand the project to include the demolition of two existing buildings totaling 135,000 square feet for the construction of a four-story approximately 135,000-square foot manufacturing building, two three-story data center buildings totaling 550,000 square feet, one approximately 170,000-square foot parking garage with 355-spaces, and an electrical substation on an approximately 9.78-gross acre site.

The approximately 135,000-square foot manufacturing building, the 216,930-square foot data center, and 166,384-square foot parking garage would be located at the northwest corner of the site at the intersection of Ringwood Avenue and Trade Zone Boulevard. The second, approximately 287,291-square foot data center would be located at the southern portion of the site with frontage along Fortune Drive. The two data center buildings would be separated by a generator yard. An electrical substation serving the site would be located at the northeastern portion of the property along Trade Zone Boulevard.

2. General Plan Consistency

The subject site is designated **Transit Employment Center** on the Land Use/Transportation Diagram of the Envision San José 2040 General Plan.

Density: FAR Up to 12.0 (4 to 25 stories)

> This designation is applied to areas planned for intensive job growth because of their importance as employment districts to the City and high degree of access to transit and other facilities and services. To support San Jose's growth as a Regional Employment Center, it is useful to designate such key Employment Centers along the light rail corridor in North San José, in proximity to the BART and light rail facilities in the Berryessa/Milpitas area, and in proximity to light rail in the Old Edenvale area. All of these areas fall within identified Growth Areas and have access to transit and other important infrastructure to support their intensification. Uses allowed in the Industrial Park designation are appropriate in the Transit Employment Center designation, as are supportive commercial uses. The North San José Transit Employment Center also allows limited residential uses, while other Employment Centers should only be developed with industrial and commercial uses.
>
> An important difference between this designation and the Industrial Park designation is that the development intensity and site design elements in Transit Employment Center areas should reflect a more intense, transit-oriented land use pattern than that typically found in Industrial Park areas. This designation permits development with retail and service commercial uses on the first two floors; with office, research and development or industrial use on upper floors; as well as wholly office, research and development, or industrial projects. Additional flexibility may be provided for retail and service commercial uses within the North San José Development Policy area through the City's discretionary review and permitting process. The development of large hotels of at least 200 rooms and four or more stories in height is also supported within Transit Employment Centers. New development should orient buildings toward public streets and transit facilities and include features to provide an enhanced pedestrian environment.

The proposed project should be **consistent** with the following General Plan policies:

Business Growth and Retention Policy - IE-2.8: Encourage business and property development that will provide jobs and generate revenue to support city services and infrastructure.

Broad Economic Prosperity Policy – IE-6.2: Attract and retain a diverse mix of businesses and industries that can provide jobs for the residents of all skill and education levels to support a thriving community.

Fiscal Sustainability Policy – FS-4.6: Consider conversion from one employment land use to another except for Light Industrial or Heavy Industrial land uses, where the conversion would retain or expand employment capacity and revenue generation, particularly for intensification on-site if the proposed conversion would result in a net increase in revenue generation.

Land Use Policy LU-2.2: Include within the Envision General Plan Land Use/Transportation Diagram significant job and housing growth capacity within the following identified Growth Areas:

> Employment Lands – The Plan supports significant intensification of employment activity within each of the City's major employment districts (North San José, Monterey Corridor, Edenvale, Berryessa/International Business Park, Mabury, East Gish and Senter Road and North Coyote Valley). Within the North San José, Berryessa/International Business Park and Old Edenvale areas, a centralized sub-area with strong transit access has been designated as an Employment Center to support mid-rise or high-rise employment development. The Employment Center in the northeast corner of the Berryessa/International Business Park area (Lundy/Milpitas BART Employment area) is also classified as a BART station area due to its proximity to the planned Milpitas BART station and existing Capitol Avenue Light Rail stations.

Implementation Policy IP-1.3: Ensure that proposals for redevelopment or significant intensification of existing land uses on a property conform to the Land Use/Transportation Diagram. Because the Diagram designation identifies the City's long-term planned land uses for a property, non-conforming uses should transition to the planned use over the timeframe of the Envision General Plan. Allow improvements or minor expansions of existing, non-conforming land uses providing that such development will contribute to San José's employment growth goals or advance a significant number of other *Envision General Plan* goals.

> *Analysis: Due to the site's location within the Transit Employment Center it is imperative that the employment-focused manufacturing building remain a focal use of the site. It is recognized that the 135,000 square feet of manufacturing space replaces the existing square footage of the site, and it will be important that this amount of space dedicated to an employment use is not diminished; where possible it is also encouraged to be expanded. This manufacturing space must also be designed to facilitate employment uses to the highest extent feasible. To demonstrate a high level of employment use at the site, future application materials should include a narrative outlining the incorporated design measures that will facilitate a viable advanced manufacturing building. These measures should be incorporated as development standards to the PD Zoning to the extent possible. Additionally, because the advanced manufacturing building is a cornerstone of the General Plan conformance, staff*

will need to specify in the zoning that the site cannot be built without the advanced manufacturing building proceeding at the forefront of construction. With these measures in place, staff may be able to find conformance with the General Plan designation of TEC and we look forward to further collaboration demonstrating how the project is proposed to meet the General Plan policies on Business and Growth Retention, and Broad Economic Prosperity.

3. Zoning Consistency

The subject site is located in the **IP Industrial Park** Zoning District. However, staff recommends that the applicant apply for a Planned Development Rezoning from the IP Zoning District to the IP(PD) Planned Development Zoning District. The applicant would also be required to apply for a Planned Development Permit to construct the project.

Proposed Uses

Pursuant to Section 20.60.030 of the Zoning Code, the use regulations situated in a Planned Development District shall be as follows:

A. Unless and until a planned development permit has been issued and been effectuated, property in such territory may be used only as if it were in its base district alone.

B. If a planned development permit is effective, any use or combination of uses provided for in said permit is allowed in accordance with and in strict compliance with all terms, provisions and conditions of said permit. Each permitted use shall be confined and limited to the particular location designated therefore in said permit. No use, other than the particular uses specified in the permit, shall be permitted, except as set forth elsewhere in this Title 20.

C. If a planned development permit permits a residential use, incidental transient occupancy in compliance with Part 2.5 of Chapter 20.80 is a permitted use of the permitted dwelling.

D. If a planned development permit has been issued, the planned development district may nevertheless be disregarded and property in such territory used as if it were in its base district alone if such use is confined to part of the subject territory not covered by the permit and a requirement to make such use of such part is not a condition of such permit.

Analysis: As part of the formal application, the applicant should provide a plan set for the proposed Rezoning of the property. The plans should include draft development standards outlining the proposed allowed uses in the Planned Development Zoning District (ie light or heavy manufacturing, data center, substation, etc.). Please note that the applicant should demonstrate that the allowed uses should be consistent with the Transit Employment Center General Plan Land Use Designation and any applicable City Council policies. The proposed 135,000 square feet of manufacturing space should be identified as a minimum square footage in the development standards, and any square footage that is potentially adaptive to manufacturing (such as within proposed parking, data center,

or in an additional building) should be analyzed and identified as the maximum in a range of allowed manufacturing space on the site.

Planned Development Zoning District Development Standards

A. Except where a planned development permit has been implemented, the regulations for development, signs, off-street parking and off-street loading applicable to its base district zoning shall apply to all property located in territory in the planned development district.

B. When a PD permit has been implemented, the provisions of such permit shall prevail over the regulations applicable to the base district zoning of the property. No structure, facility, improvement or sign of any kind shall be constructed upon such property except in strict compliance with all provisions of such PD permit. In particular:

C. No structure, facility, improvement or sign shall be constructed upon such property except the particular structures, facilities, improvements, and signs specified in such permit.

D. Each structure, facility, improvement or sign shall have the exact height, floor area, and dimensions specified for it in such permit.

E. Each structure or facility used for off-street parking and off-street loading shall have the exact number of off-street parking and off-street loading spaces, and other areas, specified for it in such permit.

F. Each structure, facility, improvement or sign shall be constructed at the particular location and cover the exact surface area designated for it in such permit.

G. Each structure, facility, improvement and sign shall be constructed and maintained in strict compliance with all conditions of the PD permit.

Analysis: In addition to the allowed uses, the proposed Planned Development Rezoning should include draft development standards. Development standards should include setbacks, heights, parking requirements, and any other applicable development standards which would further the General Plan Land Use Designation of Transit Employment Center and any applicable General Plan goals and policies.

Table 20-190 Parking Requirements

Use:	Vehicle Parking Required	Bicycle Parking Required
Data Center	1 per 250 sq. ft. of office/meeting/technician space, plus 1 for each 5,000 sq. ft. of floor area, or fraction thereof, devoted to computer equipment space	1 per 5,000 sq. ft. of office/meeting/technician work space, plus 1 for each 50,000 sq. ft. of floor area, or fraction thereof devoted to computer equipment space
Manufacturing	1 per 350 sq. ft. of floor area plus 1 per company vehicle	1 per 5,000 sq. ft. of floor area

Total	TBD	TBD

Analysis: Based on the plans and information provided it is unclear how many parking spaces would be required. For staff to calculate parking, the applicant would need to provide the square footage of office/meeting/technician space, space devoted to computer equipment space, and the number of anticipated company vehicles for the manufacturing use. Should the applicant choose to formally submit, the applicant should provide a detailed parking analysis based on the above ratios. The applicant may also propose their own parking ratios and requirements as part of the Planned Development Zoning District. If specifically tailored parking ratios are included, the applicant should provide them in the draft development standards upon formal submittal. Please note that the City is in the process of updating ratios. See the Parking and Transportation Demand Management (TDM) Standards Update for more information.

4. Citywide Design Standards and Guidelines Review

The project is subject to the Citywide Design Standards and Guidelines. Please review the following information with regards to the design review:

- Standards are objective requirements that are quantifiable and verifiable. Development projects must comply with Standards identified within this document (unless other adopted plans or policies prevail). Standards that are specific to residential, commercial, or industrial land uses (as defined in the General Plan) are listed under "Additional Standards for General Plan Residential, Commercial, or Industrial Land Use Designations."
- Guidelines describe best practices and serve as overarching design guidance. Proposed commercial and industrial projects subject to the Design Standards and Guidelines must be in substantial conformance with the guidelines contained in the document. Guidelines provide a framework of design principles that supplement the mandatory design rules. Guidelines that are specific to residential, commercial, or industrial land uses as defined in General Plan are listed under "Additional Guidelines for General Plan Residential, Commercial, or Industrial Land Use Designations."

A project applicant may request an exception or exception to the design standards contained in the Design Standards and Guidelines. The decision-maker (Planning Director, Planning Commission, or City Council, as applicable) will consider the request and information provided and make findings to approve or deny the request. The decision-maker shall only grant an exception if all the following findings are made:

- There is a physical constraint or unique situation that:
  - Is not created by the project applicant or property owner; and
  - Is not caused by financial or economic considerations.
- Approving the waiver will not create a safety hazard or impair the integrity and character of the neighborhood in which the subject property is located.
- The proposed project meets the intent of the design standard under consideration to the extent feasible.

Project Review:

- **Building and Site Design**
  - Section 2.3.1 Building Placement
    - Standard 1 - To create a continuous streetwall, place at least 75 percent of the ground floor primary street-, paseo-, or public open space- facing (except riparian corridor) façades of buildings with the primary commercial or residential use within five feet of the setback or easement line (whichever is more restrictive) (see Fig. 2.15 and 2.16). When there are multiple buildings on the site, 75 percent of the sum of all primary street-, paseo-, and public open space-facing ground floor building façades must be considered in the calculation above. This standard does not apply when the width of sidewalk is equal to or less than 10 feet.
    - Standard 2 - To create a continuous streetwall, place building façades with the primary commercial or residential use within five feet of the setback or easement line (whichever is more restrictive) for at least 60 percent of the site frontage along secondary streets (see Fig. 2.15 and 2.16). When there are multiple buildings on the site, 60 percent of the sum of all secondary street-facing ground floor building façades must be considered in the calculation above. This standard does not apply when the width of sidewalk is equal to or less than 10 feet.

      Analysis: Trade Zone Boulevard is considered a primary street. Therefore, a streetwall would be required for at least 75% percent of the frontage along Trade Zone Boulevard. For a portion of the façade to count as a streetwall, it must lie within ten feet of the property line or setback line, from ground level to the top of the highest occupied floor of that portion of the building.

      A streewall would also be required for at least 60% of the frontage along Fortune Drive. Should the applicant choose to formally submit, please provide these calculations showing how the project meets this standard.

      Note that a Planned Development Rezoning would allow the applicant to set specifically tailored development standards. However, the project must still comply with the Citywide Design Standards and Guidelines.
  - Section 3.1.2 Form, Proportion, and Scale
    - Standard 1 - Buildings at street intersections with traffic signals, terminus points, and open spaces must include at least two of the following architectural features for a minimum of 20 percent of each building frontage along the street (see Fig. 3.7):
      - Corner plaza.
      - Articulated corner with vertical or horizontal projections.

- Taller massing or exaggerated roof elements.
- Building entrances with a minimum recess of three feet.
- Different façade treatments such as variations in materials and color.

▪ Standard 3 - For streetwalls more than 200 feet in length, provide at least one recess or projection in the façade that is at least:

- 15 feet wide and 10 feet deep for residential, commercial, and mixed-use developments (see Fig. 3.8).
- 10 feet wide and 5 feet deep for industrial developments.

<u>Analysis:</u> The subject site is located at the intersection of Trade Zone Boulevard and Ringwood Avenue. Therefore, the project is required to incorporate at least two of the above elements of Standard 1 for a minimum of 20 percent of both the data center and manufacturing building frontage.

○ <u>Section 3.1.1 Building Massing Relationship to Context</u>

▪ Standard 2 – Within General Plan growth areas, provide building stepbacks from rear shared property lines and public rights-of-way within a stepback plane of 75 degrees from horizontal (see Fig. 3.4, 3.5, and 3.6).

▪ Standard 3 – Intrusion into the stepback plane up to the allowable maximum allowed height is allowed for up to 25 percent of the building massing (see Fig. 3.2).

○ <u>Section 3.3.1 Façade Design and Articulation</u>

▪ Standard 1 - Articulate all building façades facing a street or public open space for at least 80 percent of each façade length. Articulate all other building façades for at least 60 percent of each façade length. Façade articulation can be achieved by providing material and plane changes or by providing a rhythmic pattern of bays, columns, balconies, and other architectural elements to break up the building mass (see Fig. 3.22 to 3.29).

▪ Guidelines 1 - Design the façade as base, middle, and top, using a combination of the following design elements (see Fig. 3.28 and 3.29):

- Base - Create a rhythm of columns, windows, entry stoops, and porches.
- Middle - Employ bays, decks, balconies, plane and material changes, window patterns, and sunshades.
- Top - Articulate top floor(s) using different materials, patterns, roof forms, and parapet heights.

▪ Guideline 3- Incorporate special corner treatments, such as changes in façade treatments, material, or articulation, for buildings at street intersections or adjacent to public open spaces.

- Guideline 4 - Articulate building façades with material changes or art, such as murals, to create patterns of visual interest when a side of a building is built to property line and is visible from public realm.

  Analysis: The buildings with frontage along all public streets (Trade Zone Boulevard, Ringwood Avenue, and Fortune Drive) should be articulated for at least 80% of the façade length. Based on the plans provided, there are currently long blank walls along all sides of the buildings. The project could meet this standard through changes in materials or plane changes to break up the massing of the building on all sides.

- Section 3.3.2 Roofs and Parapets
  - Standard 4 - Parapets and other screening elements at the roof level must screen rooftop equipment from public view.
  - Guideline 4 - Enclose or screen all large rooftop equipment, storage areas, and exterior maintenance system equipment from public view using enclosures, parapets, setbacks, landscaping, or other architectural features with materials and detailing similar to the rest of the building (see Fig. 3.31 and 3.32)

    Analysis: Should the application choose to formally submit, more detailed drawings should be provided showing any proposed screening of rooftop equipment and rooftop storage areas.

- Section 3.3.7 – Materials and Color
  - Standard 2 - Material transitions along any façade must only occur on the inside corner of plane change. When material changes need to happen in the same plane, use trims, cornices, or other architectural elements to create a corner for material transition (see Fig 3.49).
  - Guideline 1 - Use durable high-quality materials, such as tile, wood, masonry, brick, stones, terracotta, or metal.
  - Guideline 2 - Use heavier materials such as masonry, concrete, and stucco with darker colors at the base and middle of building façades and progressively lighter materials and colors such as wood, panels, etc. on the middle and top of façades at upper levels.

- Section 4.1.3 – Mitigating Blank Walls
  - Standard 1 - Limit continuous blank walls on the ground floor to less than 30 feet along primary street façades and 50 feet along secondary street façades (see Fig. 4.13).
  - Standard 2 - Do not create a blank wall longer than 15 feet in the 50 feet closest to a building corner fronting a primary street or public open space (see Fig. 4.13).
  - Please refer to Section 5.2.6 of the Design Standards and Guidelines for visual information regarding data centers.

Analysis: As stated in the Façade Design and Articulation section above, the applicant should do more to break up the long, blank uninterrupted walls on all sides of the building.

- **Site Access and Circulation**
  - Section 2.2.2 Driveways and Vehicle Drop-Offs
    - Standard 1 - Locate curb cuts at least 20 feet away from publicly-accessible open spaces and 50 feet away from pedestrian and bicycle entrances, except within porte-cochères and for sites with less than 60 feet of street frontage.
    - Standard 2 - Entrance/exit driveways must be limited to a maximum of two per 200 feet on all mid-block parcels. For mid-block parcels with less than 200 feet of street frontage, provide only one entrance/exit driveway. Provide a maximum of one driveway on each street for corner parcels with over 200 feet of total street frontage.
    - Standard 3 - For corner parcels or properties with two intersecting streets, provide the vehicular and driveway access on the secondary street or the street with lesser pedestrian, bicycle, and vehicular circulation (see Fig. 2.7 and 2.9).
  - Section 2.2.1 Pedestrian and Bicycle Access Location
    - Standard 1 – When developments have multiple entrances, locate them based on the following priority
      - Public transit
      - Primary Streets
      - Secondary Streets
      - Publicly-accessible open spaces
      - Alleys or internal site circulation
    - Standard 5 - Place the primary building entrance such that it can be accessed from a street, public open space, semi-private open space, or POPOS
    - Guideline 1 – Provide frequent entrances and openings in building facades to connect buildings to the public realm

      Analysis: Based on the plans provided, there would be only one entrance to the advanced manufacturing building located at the street frontage along Trade Zone Boulevard. Staff recommends that the primary entrance be located at the corner of the intersection, with secondary entrances also located along the street frontage. All entrances should be easily accessible for pedestrians and bicyclists from the public right-of-way. Secondary entrances may be located internal to the site.
  - Section 2.3.5 Bicycle Parking Placement

- Standard 1 - Locate at least 40 percent of the required bicycle parking on the ground floor with direct physical access to an elevator or building exit.
- Standard 2 - Place bicycle parking so that bicyclists do not have to cross vehicular parking or drive aisles to enter the building.
- Standard 3 - When provided outside the building, long-term bicycle parking must be within 50 feet of at least one building entrance for small sites and within 100 feet of at least one building entrance for medium and large sites.
- When located outside the building, connect bicycle parking to the pedestrian network by providing a minimum five-foot-wide pathway or walkway between them.

  Analysis: Upon formal submittal, please provide the number and location of bicycle parking spaces. Please also refer to the Zoning section above.

- Section 2.3.6 Vehicular Parking Placement and Surface Parking Design
  - Standard 1 - For medium and large sites, place the first parking stall at least 30 feet away from the driveway when accessing a parking lot from a primary street to allow cars to stack on site rather than in the street.
  - Standard 2 - Place the first parking stall at least 20 feet away from the driveway when accessing a parking lot from a secondary street, alley, or private street (see Fig. 2.32).
  - Standard 3 - Screen at least 75 percent of surface parking from primary streets, secondary streets, public open spaces, and adjacent sites with Mixed-Use and Residential General Plan land use designations using landscaping or three-foot-tall architectural elements that (at least one of the following):
    - Utilize the same materials, colors, and lighting fixtures as the site or building façades on the property for at least 75 percent of the area.
    - Are covered with landscaping or public art for at least 75 percent of the total length along public open spaces, primary streets, and secondary streets.
  - Standard 4 - Provide a five-foot-wide pedestrian walkway, at minimum, to connect buildings and parking or other walkways for at least every 200 feet (see Fig. 2.32).
- Section 3.2.2 Vehicular Entrances and Driveways
  - Standard 1 - Driveways must be less than 25 percent of street frontage for sites that are more than 100 feet wide at the street and not more than 25 feet for sites that are less than 100 feet wide at the street (see Fig. 3.18).
  - Standard 2 - Driveways for parking facilities must be a maximum width of 52 feet cumulatively for each street frontage (see Fig. 3.18).

- Standard 3 - When multiple driveways are provided on a street frontage, they must be at least 50 feet apart measured between the internal edges of the driveways (see Fig. 3.18).
- Standard 4 - Recess parking garage entrances at least two feet and not more five feet when the building façade is at the street-facing property line (see Fig. 3.17).
- Standard 5 - Build City-standard driveways at all vehicular entrances between public rights-of-way and private driveways (see Fig. 3.18).
- Standard 6 - Individual residence garages must be set back from the building façade by at least four feet when placed along secondary streets and at least two feet when placed along alleys or internal circulation.

○ Section 3.3.5 Parking Garage Design

- Standard 4 - Locate openings and exhaust vents on the top of buildings or on second levels to direct air away from the public realm and adjacent structures
- Standard 5 - Design flare-out openings at garage entrances with a minimum width of 26 feet for two-way traffic and 20 feet for one-way traffic to provide line-of-sight between vehicles and pedestrians (see Fig. 3.41).
- Guideline 2 - Design parking structures using building massing, articulation, window patterns, and other façade treatments that are consistent with neighboring buildings (see Fig. 3.40 and 3.43).

Analysis: Additional information would be required to determine if the parking garage meets the standards per Section 2.3.6 of the Design Standards.

- **Landscaping**
  - Section 2.3.8 Landscaping and Stormwater Management
    - Standard 1 - Select trees which at maturity create a tree canopy cover that shades a minimum of 50 percent of each on-site surface parking area, common open space at the ground floor, and Privately-owned (and maintained) Public Open Space (see Fig. 2.37)
    - Standard 2 - Tree wells must be at least four feet larger than the tree trunk diameter at maturity.
    - Guideline 1 - Provide native trees, shrubs, and ground cover for site landscaping and surface parking areas.

Analysis: Consider planting native species of trees and ground cover. As shown on the proposed landscape plan, the only native species of tree is the Western redbud.

- **Services and Utilities**
  - Section 2.2.3 Services and Utilities Access and Location
    - Standard 2 - Provide a covered area for solid waste collection when it is

located outside the building envelope (see Fig. 2.10).

- Standard 3 - Screen all services and utilities located outside the building envelope that are within 30 feet of a public right-of-way (see Fig. 2.10).
- Guideline 4 - Establish a service and utility area for each building on a medium or large site with multiple buildings located away from the public realm.

- Section 3.2.2 Services and Utilities Entrances and Design
  - Standard 1 - Screen solid waste, utilities, and service areas from residential and commercial uses, and on-site and off-site views to limit visual impact on the public realm using fences, walls, or landscaping that (see Fig. 3.21):
    - Use durable and weather-resistant materials.
    - Are four to five feet tall.
    - Do not interrupt the line-of-sight of drivers entering or exiting the site.
  - Standard 2 - Install roofs on exterior solid waste enclosures to prevent rain from getting inside and carrying contaminants into the stormwater system.
  - Standard 4 - Use five- to seven-foot-tall fences or walls with at least 50 percent of their surface area covered with public art or landscaping to screen commercial service areas, corporation yards, and exterior operations from the street and adjacent non-industrial or noncommercial uses.

    Analysis: More details would be required to determine if the substation area meets the standards for screening and design for service and utility areas. As shown currently, it is unclear if the location of the substation would allow the building on Trade Zone Boulevard to create the minimum required 75% streetwall along the public right-of-way. The substation should be fully screened with landscaping, fencing, or walls.

    Additionally, should the applicant choose to formally submit, the project should provide details on proposed trash pickup operations. Would trash be located in an outside enclosure or interior to the building?

5. Comments from Other Departments/Divisions and Agencies

Attached are memorandum(s) from other departments/divisions and outside agencies as indicated below. Please carefully review the memos, as they contain critical information needed to successfully and efficiently moving the project through the entitlement process.

a. Building – See attached.
b. Fire – To be forwarded upon receipt.

c. Environmental Planning – See attached.
d. Public Works – See attached

6. Application Questions

- Application type:
    i. Should the applicant choose to formally submit, a Planned Development Rezoning and Planned Development Permit is recommended. The following applications should be applied for:
        1. Rezoning – Zoning Application
        2. Planned Development Permit – Development/Use Permit Application
- Confirm site layout, building locations, massing, setbacks
    i. See the Zoning and Citywide Design Standards and Guidelines sections above.
- Fire Access Requirements
    i. See the forthcoming Fire Department Memo
- Building Addressing for Trade Zone Boulevard
    i. See the forthcoming Building Department Memo

7. Next Steps

Please be advised that this summary does not constitute a final review. Additional comments will be provided upon submittal of a complete Planning entitlement application.

Your preliminary review application includes a meeting to discuss this project. Please let me know if you would like to meet and your availability.

Should you have any questions, you may contact me at alec.atienza@sanjoseca.gov or (408) 535-7688. You may also contact the Supervising Planner overseeing this project, John Tu, at john.tu@sanjoseca.gov.

We look forward to continuing to work with you and your team on your project in San Jose.

Sincerely,

Alec Atienza
Project Manager
City of San José

***Re*: Trade Zone Boulevard Technology Park, Santa Clara County**

Dear Ms. DeiRossi:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced projects. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: katy.sanchez@nahc.ca.gov.

Sincerely,

Katy Sanchez
