HVAC funding for all schools

Our district has HVAC systems that are 60 years old and need to be replaced. All the literature says we need MERV 13 filters for safety, and yet our systems will collapse if we use those. They barely run (and many days they do not). They are so old, we cannot even get replacement parts. Please do not limit the funding to low socio-economic districts- the wealth of our parents does not translate into available funding for our schools. We have NO FACILITIES money and our students and staff are suffering. I implore you to reconsider your guidelines and provide equitable support to all public schools.
