ICC Comment

The grant program should allow jurisdictional departments overseeing building permits to cover maintenance and subscription costs for permit tracking software as this will be a cost incurred by building departments in the adoption and use of SolarAPP+. SolarAPP+ needs to be able to communicate with the jurisdiction's permitting and inspection software, otherwise it will not function as intended and will not reduce the permitting and inspection times. Because this cost is integral to the use of SolarApp+, it is recommended that this cost be covered by the grant program.
