Pecho Energy Storage Center disagreement

I live at the base of Hollister Peak where the plant is proposed. I am requesting you stop the progression of disrupting the cultural balance of nature, and the Chorro Creek watershed, and disrupting Chumash artifacts, buried, and contamination of the water supply for surrounding residents. The plant will destroy our agricultural base, scenic integrity. And Chorro creek runs into the Estuary and runs very close to this site. My family has owned this, and surrounding properties since 1850. Please keep it rural.
