NOTICE OF REMOTE-ACCESS  
WORKSHOP

RE: Staff Workshop on Electric  
Vehicle Infrastructure Projections (EVI-  
Pro) Analysis for Assembly Bill 2127  
Assessment

## **Notice of Electric Vehicle Infrastructure Projections (EVI-Pro) in Assembly Bill (AB) 2127 Assessment Workshop**

**March 16, 2022**

9:00 a.m. – 12:00 p.m.

**Remote Access Only**

The California Energy Commission (CEC) will host a workshop to present the Electric Vehicle Infrastructure Projections 3 (EVI-Pro 3) model and analysis. The workshop will gather information for the CEC's second AB 2127 assessment. The workshop will solicit stakeholder feedback on the EVI-Pro 3 model and seek input to further inform this analysis. A quorum of commissioners may participate, but no votes will be taken.

The workshop will be held remotely, consistent with AB 361 (Rivas, Chapter 165, Statutes of 2021) as extended by Governor Newsom's Executive Order N-1-22 to improve and enhance public access to state agency meetings during the COVID-19 pandemic. The public can participate in the workshop consistent with the direction provided below. Please note that the CEC aims to begin promptly at the start time posted and the end time is an estimate based on the agenda proposed. The workshop may end sooner or later than the posted end time depending on various factors.

### **Agenda**

The workshop will include a staff presentation on EVI-Pro followed by a question and comment period with the public.

A detailed meeting agenda will be posted prior to the workshop on the [events page of the CEC website](https://www.energy.ca.gov/events), <https://www.energy.ca.gov/events>.

- 1) EVI-Pro model methodology, inputs and assumptions, and outputs
- 2) Scenarios and analysis for second AB 2127 assessment
- 3) Q&A and Public Comment

## **Background**

AB 2127 (Ting, Chapter 365, Statutes of 2018) requires the CEC to biennially assess the electric vehicle (EV) charging infrastructure needed to meet the state's goals of putting at least five million zero-emission vehicles (ZEVs) on California roads by 2030 and reducing greenhouse gas emissions to 40 percent below 1990 levels by 2030. On September 23, 2020, Governor Gavin Newsom signed Executive Order N-79-20, which directed the CEC to update this assessment to support expanded ZEV adoption targets.

The inaugural AB 2127 assessment was published in July 2021, and the CEC is currently developing the second assessment. A key component to the assessment is charging infrastructure analysis to support EV adoption. The EVI-Pro model, developed by the CEC and National Renewable Energy Laboratory, estimates the quantity of light-duty charging infrastructure needed in the state.

This workshop will explain the EVI-Pro 3 model's methodology, inputs and assumptions, and outputs. Staff will discuss changes and updates to the analysis from the first assessment to the second assessment and will seek stakeholder feedback on the model's inputs, assumptions, sources of data, and market trends. Staff will also present planned scenarios for the second assessment and seek stakeholder feedback.
