Submitted On: 3/10/2022
Docket Number: 22-AAER-01

Request for 3-Week Extension to Public Comment Period

Please find attached a letter from Air Movement and Control Association International (AMCA) respectfully requesting a three-week extension to the public comment period (i.e., from April 11, 2022 to May 2, 2022, so developments from the Public Hearing (April 12, 2022) could be considered toward comments, and to allow for industry consensus-based committees to work, and for AMCA to coordinate with other stakeholders as we have in the past.

Thank you very much for your time and consideration. -- Michael Ivanovich

Mr. Michael Sokol
Efficiency Division
California Energy Commission
Docket Unit: Docket No. 22-AAER-01
715 P Street, MS-4
Sacramento, CA 95814

Docket Number: 22-AAER-01 • TN Number: TN 241949

Dear Mr. Sokol:

Air Movement and Control Association (AMCA)¹ International thanks the California Energy Commission (CEC) for publishing the Regulatory Action and Notice of Proposed Action (NOPA) for the Title 20 Commercial and Industrial Fans and Blowers rulemaking, and for the opportunity to comment on the draft regulatory language.

AMCA International has been working collaboratively on the rulemaking with the CEC, California Investor Owned Utilities, and other stakeholders since the rulemaking's inception in 2017. AMCA is committed to helping the CEC fashion a regulation that will aid California in its energy and climate goals while also being fair to industry and consumers. We also acknowledge that California's fan regulation could be adopted by other states while the U.S. Department of Energy Appliance and Equipment Standards Program completes its commercial-fan rulemaking and the rulemaking takes effect.

With these considerations in mind, AMCA respectfully requests that CEC extend the review/comment period for three weeks, from April 11, 2022, to May 2, 2022. The extension would allow the exchange of information generated during the Public Hearing, which is scheduled for April 12, 2022, to beneficially impact the quality of comments from all stakeholders. The extension also would allow AMCA to work with its consensus-based committees and, as it has done in the past, coordinate with the Investor Owned Utilities and other stakeholders.

Thank you for your time and consideration.

Sincerely,

Michael Ivanovich, Senior Director – Global Affairs

¹ AMCA International is a not-for-profit association of manufacturers of fans, dampers, louvers, air curtains, and other air-system components for commercial HVAC, industrial-process, and power-generation applications. With programs such as certified ratings, laboratory accreditation, verification of compliance, and international-standards development, its mission is to advance the knowledge of air systems and uphold industry integrity on behalf of its more than 400 member companies worldwide.
