715 P Street, MS-40
Sacramento, CA 95814

RE: Local Permits Obtained for Geotechnical Data Collection Activities
Pecho Energy Storage Center (21-AFC-01)

Dear Ms. Worrall:

On behalf of Pecho LD Energy Storage, LLC (the “Applicant”), I am writing to help clarify some earlier confusion in recent public statements and reporting regarding the Pecho Energy Storage Center (“Pecho”) project. Contrary to some reporting, Pecho did in fact first obtain what it reasonably believed to be the appropriate and only necessary drilling permits from the County of San Luis Obispo (“County”) before beginning geotechnical data collection.

On November 4, 2021, December 6, 2021, January 6, 2022, January 19, 2022, and January 27, 2022, Pecho received five permits from the County of San Luis Obispo Health Agency, Environmental Health Services Division. These County permits issued in November, December, and January, numbered chronologically as Permits 1-5, are attached to this letter.

These permits also include, among other things, electronic mail correspondence from the County Staff and County Counsel’s Office confirming County Staff’s view that no land use permits were needed for the geotechnical data collection activities.¹ Moreover, as reported on February 24, 2022, one member of the San Luis Obispo County Board of Supervisors told the New Times SLO newspaper that “we’ve checked it out and the appropriate permits have been issued to drill these test wells.”²

On February 23, 2022, the California Coastal Commission (“CCC”) issued a letter notice of violation, after the permitted activities had commenced, alleging that the data collection activities constituted “development” under the Coastal Act. While CCC staff’s letter acknowledges that Pecho did obtain permits from the County, CCC staff has alleged that the data collection required additional permitting under the County’s Local Coastal Program.³

The reports of activities being undertaken without regard to local permitting or respect for the environment or the jurisdiction of state and local agencies are simply incorrect. As explained below, Pecho proceeded only after it secured permits for these activities.

¹ See, for example, the January 7, 2022, email from San Luis Obispo County Deputy County Counsel to County Staff: “I spoke to [the Supervising Planner for SLO County] and he said no land use permit is required.” (See Permit 3, attached, January 6, 2022, PDF page 6 of 10.)

² <https://www.newtimeslo.com/sanluisobispo/noises-coming-from-proposed-energy-facility-site-frustrate-neighbors/Content?oid=12086205>

³ TN#: 241958, p. 3 of 5.

First, Pecho identified, applied for, and was granted the five local County Health permits attached to this letter. In addition to conducting investigations to avoid potential impacts to biological and cultural resources, Pecho also asked County staff whether any other permits would be required, and County staff did not identify any such permits. Accordingly, Pecho believed it had secured all required permits for its data collection work.

Second, Pecho proceeded with confidence because the data collection activities are not “Construction” as defined by the Warren-Alquist Act. Specifically, Public Resources Code Section 25105 defining “Construction” recognizes geotechnical work and data collection activities are **not** the commencement of construction of the powerplant project before the California Energy Commission (“CEC”):

§ 25105. Construction

“Construction” means onsite work to install permanent equipment or structure for any facility. **“Construction” does not include any of the following:**

- (a) The installation of environmental monitoring equipment.
- (b) **A soil or geological investigation.**
- (c) A topographical survey.
- (d) **Any other study or investigation to determine the environmental acceptability or feasibility of the use of the site for any particular facility.**
- (e) Any **work to provide access to a site** for any of the purposes specified in subdivision (a), (b), (c), or (d). (Emphasis added.)

Section 25105 confirms that powerplant applicants can engage in data collection, geological investigations and similar investigations without commencing “construction” of the CEC jurisdictional powerplant. Significantly, the holes drilled for data collection are neither used nor useful to the project before the CEC; that is, they are not, in terms of the statutory language, “permanent equipment or structures for any facility.” This is data collection.

Third, the Warren-Alquist Act and the Coastal Act are both implemented in the context of the CCC’s and CEC’s “Certified Regulatory Programs” (Public Resources Code §21080.5). Certified Regulatory Programs use their own certified procedures but remain subject to the “substantive” provisions of CEQA. (Public Resources Code 21080.5; 14 CCR 15250.)

In this case, CEQA has an express “Categorical Exemption” for data collection. Data collection activities are exempt per CEQA Guidelines 14 C.C.R. Section 15306:

15306. INFORMATION COLLECTION

Class 6 consists of **basic data collection**, research, experimental management, and **resource evaluation activities** which do not result in a serious or major disturbance to an environmental resource. **These may be strictly for information gathering purposes**, or as part

of a study leading to an action which a public agency has not yet approved, adopted, or funded. (Emphasis added.)

The ongoing data collection falls squarely within this CEQA Categorical Exemption.

We are not suggesting that this established Categorical Exemption is a “sword” that would allow Pecho to proceed without local permitting; instead, we are suggesting that (1) the lack of any identified additional “data collection” permitting from the County, (2) the fact that data collection is not “Construction” of the CEC jurisdictional powerplant, and (3) the existing Categorical Exemption for data collection all combined with other factors reasonably led Pecho to conclude it was complying with all applicable laws, ordinances, regulations and standards in conducting the data collection activities with the permits obtained from San Luis Obispo County.

While this process and its conclusions were and remain reasonable, we understand the CCC has a different view. We are working cooperatively with CCC staff and the County to resolve these issues. We will continue to keep the Energy Commission apprised of these matters.

Given recent press concerning the Pecho project, we believe it appropriate to provide documentation that Pecho proceeded with its data collection program only after it had first obtained what it reasonably believed to be all the required data collection permits.

Sincerely,

Curt Hildebrand
Senior Vice President, Commercial Affairs
Hydrostor, Inc.

To: Jeremiah Damery <jdamery@co.slo.ca.us>

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

Hi Jeremiah, here is the information you have requested.

1. The diameter of the proposed soil boring. **The hole diameter will be 6.5 with a down hole hammer and if the hammer waters out we will switch to a 6" Tri-cone button bite.**
2. A detailed description of the proposed sealing method and material. **After all the logging is done, Cascade will trip in 2000' of 2" trimmie pipe to place neat cement with 5% bentonite from bottom to surface. The Neat Cement mixer is one ninety-four pound sack of Portland Cement to five to six gallons of clean water. Additional water maybe required where special additives, such as bentonite are used.**

Hello Ben:

As far as the timing of acting on the 2 new applications for Morro Bay Ranch Limited, the well driller will be calling next week to find out the status.

Best regards,

Carrie Zuur-Lopez

Good morning,

I tried calling but you must be busy. Looking to contact someone who can lend us a hand.

There is upcoming installation of monitoring wells next week and we are in need of a "Surety Bond" form for San Luis Obispo County.

Please let me know if you have the form available.

Thank you.
