CTR's Hell's Kitchen Plant and Its Impact to the Environment

Before Controlled Thermal Resources builds its Hell's Kitchen Geothermal Plant, pictured above, it needs to go through a rigorous approval process. That process is called an environmental review, one that looks at all the various ways that such a plant could disturb or affect the environment and the people around.

And CTR is about to begin that process. This week, Imperial County's Planning & Development Services Department recommended that CTR undergo an environmental review of its construction plans in accordance with the California Environmental Quality Act, or CEQA. <https://lithiumvalle.substack.com/p/issue-7-environmental-review-of-ctrs>
