CodeCycle and Centralized Permit Review Office

I would like to follow up on the comment I submitted 3/23/22 regarding a Centralized Permit Review Office. CodeCycle is an excellent tool for automating the code compliance process, which is essential for improving compliance. Automating the process and a Centralized Permit Review Office are not mutually exclusive and are in fact highly synergistic. Automation may help design teams and contractors to comply with the code but they are not incentivized by code compliance. Compliance and enforcement requires a highly motivated, experienced, independent 3rd party, like the Title 24 Permit Review Office (T24-PROs). Automation will allow the T24-PROs to review more permits in less time.
