Subject:	Acceptance Test Certification Requirements DOCKET # 13-ATTCP-01
Importance:	High

Joe Loyer,

I read your very topical article in the April 2016 INDOOR COMFORT NEWS."
Very informative!
I have been following the ATT requirements and have a question.
First, let me tell you who I am.
I have been in this industry since 1954 as a –

- Purchasing agent
- Installer
- Teacher
- Contractor CSLB 315890 – since Feb 9, 1976, 40+ years.
  C20 (HVAC) and D62 (AIR/WATER BALANCE)
- I am a member of ASHRAE, ACCA, CABEC, IHACI
- I am an Emeritus Professor "College of The Desert" HVAC Program 12 years.
- I am an NBC (National Balancing Council) Supervisor "subsid of National Comfort Institute.
- I am a Certified Title 24 Documentation Author.
- I am a Certified HERS RATER – CalCERTS ID# 24.
- I am very familiar with the CEC Commissioning paperwork.

The National Comfort Institute (for their own reasons) has decided NOT TO become an ATT Certified Provider!

SO----- my question---

Why am I not qualified to be an Acceptance Test Technician and Commissioning Contractor with my CALIFORNIA C20 & D62 LICENSE?
It seems the CALIFORNIA ENERGY COMMISSION folks haven't talked to the CALIFORNIA CONTRACTORS folks.

How should I proceed?

Jack LaFontaine
