Re: CA3 Backup Generating Facility-Vantage, Docket Number 21-SPPE-01 Mitigation Monitoring and Reporting Program

To Whom It May Concern:

This letter is to confirm that the Mitigation Monitoring and Reporting Program (MMRP), prepared by the California Energy Commission and made part of the Final Environmental Impact Report in March 2022, for the proposed CA3 Backup Generating Facility located at 2590 Walsh Avenue, has been reviewed by the City's Planning Department. The MMRP is accepted by the City as submitted with the addition of conditions to clarify Timing of Compliance for mitigation measures BIO-1 and BIO-4 upon issuance of the Development Entitlement for the project.

The following language shall be added to the Conditions of Architectural approval of the project:

BIO-1 Timing of Compliance: Pre-construction surveys shall be conducted no more than 14 days prior to the initiation of demolition or construction activities or tree relocation or removal.

Tree removal shall require issuance for a permit from Department of Community Development (not the city arborist).

BIO-4 Timing of Compliance: Tree protection measures shall be implemented throughout project construction.

Should you have questions or require additional information, please contact Debby Fernandez, Associate Planner at (408) 615-2450. Thank you for the opportunity to review and comment.

Sincerely,
Debby Fernandez (for)

Lesley Xavier
Planning Manager
