## **New Remote Separate Stationary Source**

The SJVAPCD evaluated the installation of the new genset at the remote property as a separate stationary source consistent with the definition in SJVAPCD Rule 2201 Section 3.39. All references to the stationary source in the CEC document are in reference to this separate genset stationary source, S-9921. This separate stationary source is not a major source as indicated; however, this is not to be confused with the La Paloma stationary source, S-3412, which is a major stationary source.
