IEPR-22-02 Gathering and organizing data, part 3

IEPR-22-02 Gathering and organizing data, part 3

Once you have chosen planning methods and located appropriate data sources, to ensure enduring value of the California Planning Library, proper accreditation is the next step.

Additional submitted attachment is included below.

IEPR-22-02 Gathering and organizing data, part 3

Once you have chosen planning methods and located appropriate data sources, to ensure enduring value of the California Planning Library, proper accreditation is the next step.

Lack of proper accreditation invites degradation of your library.

The changes required to build a trusted library will be undone if the Energy Commission does not seek proper accreditation.

Quality systems such as [ISO-9000](#) and [The Deming Prize](#) would be two ways to gain accreditation for the library and the Energy Commission as a whole.

Did you know that in 1989, [Florida Power & Light](#) became the first non-Japanese winner of The Deming Prize?

Will the Energy Commission be the next Deming Prize winner?
