Mr. Joseph Douglas
Compliance Project Manager
California Energy Commission
715 P Street, Sacramento, California 95814
Joseph.Douglas@energy.ca.gov

Subject: Huntington Beach Energy Project (12-AFC-02C)
 COC COM-10, Petition for Post-Certification Amendment

Dear Mr. Douglas,

In accordance with Condition of Certification (COC) COM-10, and as stated in our previous letter dated December 13, 2021, attached please find a Petition to Amend (PTA) the Huntington Beach Energy Project (HBEP) license. Within this PTA, AES Southland Development, LLC (AES) proposes the following modifications to the HBEP license to meet projected demand of the Los Angeles Basin:

- Increase the annual Combined Cycle Gas Turbine (CCGT) operating hours from 6,640 hours per unit per year (including starts and stops) to 7,640 hours per unit per year (including starts and stops).
- Modify air emission limits commensurate with the modification of annual CCGT operating hours.

As demonstrated in this PTA, there will be no significant environmental impacts associated with the implementation of the above actions.

AES looks forward to working with the California Energy Commission to evaluate the project and move through the approval process as expeditiously as possible. If you have any questions, please do not hesitate in calling.

Sincerely,

Ben Morgan
Environmental Manager
AES Huntington Beach Energy Project

Attachment: Petition for Post-Certification Amendment, Modification of Combined Cycle Gas Turbine Operating Hours for the Huntington Beach Energy Project
