Item 4: California Electric Homes Program (CalEHP)

May 24, 2022 Business meeting

Richard Gibbs, Energy Commission Specialist I
Renewable Energy Division, Decarbonization Incentives Office

Benefits to California

- Market Transformation
- Decarbonization
- Health and Environmental Benefits

CalEHP: Overview

Statewide incentive program to increase market transformation for new market rate residential buildings:

- Building of all-electric homes
- Installation of residential energy storage
- \$75 million budget

Authorized from AB 137 (Ting, Chapter 77, Section 17, Statutes 2021)

CalEHP: Eligibility

- New market-rate housing developments
- All-electric new residential buildings and energy storage

CalEHP: Administrator Tasks

- Develop incentive program design with input from CEC
- Provide Technical Assistance for builders
- Form a Technical Advisory Group to ensure stakeholder engagement and feedback

CalEHP: Guiding Principles

- Provide overarching framework
- Express CEC's priorities
- Identify key elements and principles of the program
- Public Engagement and Outreach

Staff Recommendation

- Adopt CalEHP Guiding Principles
- Adopt staff's Determination that action is exempt from CEQA
