California Energy Commission

RE: AB 525 -- Set offshore wind targets of 5 gigawatts by 2030 and 20 gigawatts by 2045

null

Dear Chairman Hochschild and Commissioners:

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country. I hope offshore wind becomes the way to do.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

Sincerely,

Sincerely,  
Pat Wolff

Dear Chairman Hochschild and Commissioners:

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

Sincerely,

Sincerely,  
Karen Stewart

California Energy Commission

RE: AB 525 -- Set offshore wind targets of 5 gigawatts by 2030 and 20 gigawatts by 2045

null

Dear Chairman Hochschild and Commissioners:

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

Sincerely,

Sincerely,  
Jessica Johnston

California Energy Commission

RE: AB 525 -- Set offshore wind targets of 5 gigawatts by 2030 and 20 gigawatts by 2045

null

Dear Chairman Hochschild and Commissioners:

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

Sincerely,

Sincerely,  
Anne Munitz

RE: AB 525 -- Set offshore wind targets of 5 gigawatts by 2030 and 20 gigawatts by 2045

null

Dear Chairman Hochschild and Commissioners:

As a NATIVE CALIFORNIAN, who doesn't mind paying taxes (as we are paying it forward and supporting our state!).....Climate Change is REAL and here. Fossil Fuel needs to be put in the history books, along side of photos of the Outhouse, Carriage Wheels and Asbestos. Why are we STILL subsidizing corporate fossil fuels in 2022? (since 1916) !?!

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

RE: AB 525 -- Set offshore wind targets of 5 gigawatts by 2030 and 20 gigawatts by 2045

null

Dear Chairman Hochschild and Commissioners:

Offshore wind could supply enough energy to meet our entire country's electricity needs twice over. If we act now, we can tap that potential and repower our coasts and the country.

I urge you to set ambitious goals for offshore wind in California: a bold, enforceable planning target of 20 GW of offshore wind and a minimum requirement of at least 10 GW of offshore wind by 2045, and a 5GW goal with a minimum requirement of at least 3GW by 2030.

California has led the nation in solar; now let's go big on offshore wind!

Sincerely,

Sincerely,  
Elizabeth Ladiana
