ESR-21-01 CEC's reliability formula

ESR-21-01 CEC's reliability formula

What is the formula used to provide the results in TN243084-Order (R. ELCC) Scenario - 2023 Supporting Data.xlsx?

Additional submitted attachment is included below.

ESR-21-01 CEC's reliability formula

What is the formula used to provide the results in [TN243084-Order \(R. ELCC\) Scenario - 2023 Supporting Data.xlsx](#)?

Perhaps commission staff have overlooked filing in the [21-ESR-01 docket](#), information on the reliability formula and how it works, making the Energy Commission's reliability formula appear to be a secret formula.

I am very interested in how Saturday ended up with the most samples, as shown in this summary I produced from the data in TN243084.

DOW	Days	Samples	Low	High
Sat	319	319	10	3419
Fri	100	100	4	3185
Wed	26	26	11	1311
Mon	14	14	37	1063
Sun	11	11	116	1352
Thu	1	1	31	31

Show your work by filing in the docket 21-ESR-01, all information used to arrive at the data in TN243084.

The information should include why the formula was chosen, how the implementation was done, and how the results were confirmed.
