P G and E potential Diablo nuclear fires

<https://www.youtube.com/watch?v=M-Ji-l89hgE>

A good YouTube video on what would happen after P G and E nuclear fires at Diablo
I did the research for the slideshow and it was filmed by EON
I studied physics at UCSC in the 1980's
Real potential for P G and E nuclear fires after earthquake, human error, mechanical failure, computer bugs etc..
