## **Docket# 21-ESR-01 - Energy System Reliability**

Please do NOT extend Diablo Canyon closure beyond 2025. I live in Los Osos very near this Nuclear Power Plant.

I am concerned that it's old and unreliable - maintenance deferrals have resulted in outages that last months at a time. I'm concerned where dangerous high level radioactive waste will be stored if use continues. And the plant is dangerously close to an earthquake fault - it'd a seismic time bomb that has been ticking for decades now. My understanding is that PG&E agreed to close back in 2016. And this of course is a company responsible for devastating fires that killed 100s and destroyed thousands of acres. PGE cannot be trusted.
