NLCAA 2022 Curriculum Update Report Summary

ATT and ATE Certification Curriculum:

Throughout the 2019 Energy Code, NLCAA has continued to make non-substantive changes to modify and improve the curriculum. This has included presentation clean-up and minor modifications based on further code clarification that has come up over the past few years.

To prepare for the new 2022 Energy Code updates, NLCAA has made substantive changes based on the guidance letter provided by the CEC. Changes made to the 2022 ATT and ATE Certification Curriculum include, but are not limited to, instruction on the new requirements for form collection, teaching about the new controlled receptacles acceptance test, and more. In addition, as seen in the NLCAA curriculum submissions, the update report tables show where NLCAA has included references to the new 2022 Energy Code updates in the presentations.

ATT/ATE Recertification Curriculum:

NLCAA has created the 2022 ATT/ATE Recertification Course based on the CEC guidance report of new 2022 Energy Code changes. As seen in the recertification curriculum submission, the update report table shows where NLCAA has included references to the new 2022 Energy Code updates in the presentation.

Certification Statement:

I, Michael Scalzo, certify that NLCAA has met and will continue to meet all requirements for the ATTCP program as specified in §10-103.1 and its application approved by the CA Energy Commission.

Sincerely,

Michael Scalzo
