Dont reverse course on Diablo Canyon

The operation of Diablo discourages the use of renewables.

Diablo is old and not reliable. Maintenance has been deferred. The last replacement for aging parts resulted in a seven-month outage.

Diablo is seismically vulnerable.

The proposal to extend operation severs the closure agreement of 2016.

Where/how will this extra high level radioactive waste be stored?

Diablo's Once Through Cooling system is now unlawful. How will that be rectified?
