Close Diablo sooner - do not break the agreement made with trust on all Parties

Diablo is old and has aging equipment. Skilled workers are leaving and no replacements have been trained to run this old decrepit plant. Stop stockpiling radioactive waste above 13 earthquake faults. There is no place to move this deadly material and the transit would be dangerous so stop making it. Put the enormous cost to keep Diablo open into renewables and storage.

As kids, we were all taught to honor our commitments. Do not break trust with all the parties who compromised on this agreement to shut the plant and the engagement panel who have worked so hard to make the future a brighter one for this area.
