Close Diablo Power Plant

â€¢ The operation of Diablo discourages the use of renewables.

â€¢ Diablo is old and unreliable. Maintenance has been deferred. The last replacement for aging parts resulted in a seven-month periodic shutdown of Unit 2 during 2020-21.

â€¢ PG&E is a corporate felon, responsible for nearly 100 deaths, thousands of homes and businesses burned to the ground, and hundreds of thousands of acres scorched.

PG&E can not be trusted.

â€¢ Diablo is seismically vulnerable. It sits near multiple active earthquake faults.

â€¢ The proposal to extend the operation would violate the closure agreement established in 2016 and codified by the California legislature and the CPUC in 2018.

â€¢ Ratepayers and taxpayers have already paid out \$85 million in mitigating costs to the impacted communities and millions more toward decommissioning costs.
