Diablo Canyon Nuclear Power Plant -Extending license

Dear California Energy Commission (CEC), Office of Governor Newsom, and the California Independent System Operator (ISO)

San Luis Obispo is my home.

It has come to my attention that you are considering extending Licensing of Diablo Canyon Nuclear Power Plant In violation of the agreement established in 2016 and codified by the CPUC and California legislature in 2018.

Diablo Canyon is old and unreliable. It has been operated by PG and E who is also unreliable.

Diablo Canyon is a mistake that should never have occurred. It is built on active earthquake faults! There is no way with this simple fact to justify the continued operation of a dangerous nuclear power plant.

Please respond to the following questions:

Where and how will the additional radioactive waste be stored?

How will the unlawful once-through cooling system be rectified and paid for?

Diablo Canyon is outdated, dangerous and not forward thinking. I implore you to come up with better solutions than this one.

Sincerely,

Marcy Israel
