Decommission Diablo Canyon ASAP

As a resident of Morro Bay for 42 years and living with the constant threat of a nuclear accident due to human error or a natural catastrophe I, my family and friends welcome the planned decommissioning of Diablo Canyon and encourage the governor to do so ASAP. The age of the plant, the continued storage and accumulating radioactive spent fuel rods, the presence of a geologic fault in the immediate area, and the environmental impact of its once through cooling on the offshore biota require this decommissioning now. Thank you, Scott McCreery
