## **Save Diablo Canyon Nuclear Power Plant**

Diablo Canyon Power Plant has been a dependable and reliable source of clean, economical, and zero emission energy for the State of California for many years, and has the ability to safely operate for many more years to come. Losing Diablo Canyon would be a major blow to the energy security of the state as well as the state's climate goals.

Diablo Canyon power plant, by itself produces 9% of California's energy. It is the greatest single producer of clean energy in the state.

To ensure the energy security of the state, and continue to make progress on reducing carbon emissions, it is imperative to continue operating Diablo Canyon Power Plant.
