## **Don't stop nuclear - it's our saving grace**

I am writing in support of the continued use of the Diablo Canyon nuclear power plant. Nuclear power is far and away the safest form of consistent clean energy production. The fear associated with nuclear power is rooted in the fear of nuclear weapons; the same power that has threatened to destroy the human race over the last 80 years is also our best chance at saving the planet in our environment. I am Ploor you to continue to use of Diablo Canyon well the development of newer and safer nuclear plants are being developed. The closure of Diablo Canyon will force the use of fossil fuels in its place, Extending our reliance on fossil fuels even farther into the future.
