## **Keep Diablo Canyon open for grid stability and to help meet CA's climate goals**

I think we ought to extend Diablo Canyon's life, as a backstop for our electricity grid and to support our clean energy goals. Otherwise, we'll need to rely on dirty peaker plants and probably have a more chaotic grid, compounded by rolling blackouts from wildfires.

It's not a perfect choice, but it's a pragmatic move that keeps us on track. We have to make some hard choices, and I'd choose less climate change/grid chaos even if there is a small risk of fault lines near the plant.
