## **Save Diablo Canyon, do it for the world**

I am not a California resident, nor I am a US citizen. I live nine timezones away, in Italy. Nonetheless, this matter concerns me, and everyone who lives on this planet. The efforts made by California to install renewable energy are admirable, but fossil fuels are still widely used to fill in the gaps. Shutting down a source of continuous, carbon-free power like Diablo Canyon would just create one such gap and lead to more fossil fuel use. This is not unheard of, as it's exactly what happened in New York when Indian Point was shut down. Since burning more fossil gas only worsens the current climate crisis, making things worse for everyone in the world, I beg you, keep Diablo Canyon open. We need all the clean energy we can make, so let's do it!
