## **Support zero-carbon electricity to fight climate change and California droughts**

Diablo Canyon represents:

- 1/6 of California's zero-carbon electricity
- \$20B in electricity costs savings through 2045
- the near term possibility of large-scale water desalination to help California overcome drought

Whoever cares about the planet, the environment, fighting climate change, and securing a lower-carbon, cheaper, more secure and reliable electricity for California, for themselves and future generations, should therefore help keep Diablo Canyon online.
