## **Keep Diablo Canyon going please**

Keeping Diablo Canyon going, and investing in Fourth Generation nuclear technology (molten salt reactors burning nuclear waste or thorium, is essential

Nuclear energy is needed to reduce carbon emissions, maintain a minimum of energy security, and create energy for water desalination (otherwise very carbon intensive) to water California. And it helps provide a base load and peak load that solar and wind cannot guarantee.

In times of climate change and energy insecurity, and budget constraints, it would be unwise (understatement) to shut down a perfectly good nuclear facility.

Thank you
