## **Diablo Canyon Power Plant Extension**

It is imperative that we keep the Diablo Canyon Plant open, especially if California seeks to be a leader for environmental rights zero carbon emissions. The plant provides a significant amount of our state's green energy, not to mention a stable baseline power level which is critical during peak power uses. We have all experienced the rolling power outages that occur when many are coming home from work. Picture that happening even more once the plant is sunset. Not to mention it proves a safe and clean power source while the state contained to spin up production of other renewable options.

If the plant goes down in 2025, that power is going to have to come from somewhere, and it won't be anywhere near as clean. Please, please keep it open as long as possible.

Thank you,  
Chris
