## **Keep Diablo Canyon Nuclear Power Plant open, meet net zero, save the planet**

Extending licensure to allow Diablo Canyon to remain in operation is necessary to meet California's energy needs. This plant provides roughly 9% of California's electricity, and as of now, we don't have a means of replacing this power. Diablo Canyon has the capability of running safely and efficiently for another 20 years. The grounds have ample space and means to safely store spent fuel. Do not close California's only remaining nuclear power plant. We need net zero and we need to save the planet.
