## **Docket number 21-ESR-01, Diablo Canyon Power Plant**

Please do the citizens of California, the Southwest, the United States and the world a good deed, and keep Diablo Canyon power plant operational for at least 40 more years. You could go one better and increase the number of reactors at that site and include desalination facilities, ideally using high temperature fluid fueled reactors, technology developed in the United States.

I live in Arizona and am proud of Palo Verde plant here and would like to see more carbon free sources of power made available to the U.S., the west, and the majority of world population that desperately needs energy and power to eliminate poverty and suffering.

Please vote to keep and extend Diablo Canyon power plant life.

Thank you,

Michael Aaron Winegart

Honorable public servants:

Please do the citizens of California, the Southwest, the United States and the world a good deed, and keep Diablo Canyon power plant operational for at least 40 more years. You could go one better and increase the number of reactors at that site and include desalination and medical isotope facilities, ideally using high temperature fluid fueled reactors, technology developed in the United States.

I live in Arizona and am proud of Palo Verde plant here and would like to see more carbon free sources of power made available to the U.S., the west, and the majority of world population that desperately needs energy and power to eliminate poverty and suffering.

Please set an example for the public, as well as doing something FOR the environment rather than TO it.

Vote to keep open and extend Diablo Canyon power plant's operational life.

Thank you,

Michael Aaron Winegart
