Please keep the nuclear plant open

Good morning,
I'm writing because that plant is the source of a lot of clean energy and closing the structure would mean using more fossil fuels, we already had the example of how Germany -by closing its nuclear plants- had to use a lot of carbon. Please, we are in a emergency situation concerning the climate, don't allow any more carbon to be burnt and the situation to collapse even more rapidly that is already happening!
please!
