Save Diablo Canyon!

It has become abundantly clear across the globe; if we want to meet climate goals we need nuclear power. It is safe, clean, and provides a large amount of baseboard power that California so desperately needs. As a father to two young boys, I want to see them inherit an earth that has clean air, farmable soil, and less natural disasters. Shutting down Diablo Canyon would be a step in the wrong direction. I ask that for our future you save Diablo Canyon and keep it operating.
