## **Keep the Power Plant Open!**

We need to work to create more alternative energy options in California, not less! Please keep the Diablo Canyon Nuclear Power Plant open and pursue opportunities for more alternative sources of energy like putting solar panels over the aqueducts throughout California. Not only would solar panels create energy, but they would also prevent water loss due to evaporation as the water travels throughout the state. Another precious resource! Shutting down the power plant and the eventual tear down will cost California many jobs and money. Instead let's continue to find alternative sources for energy since our gas reserves are limited.
