Honor the agreement to terminate Diabolo Canyon

The agreement to end Diablo Canyon was negotiated by all interests after years of litigation and regulation. Diablo is too large and inflexible for the modern renewable energy grid. The dangers only grow with this old facility. Mechanical failure, earthquake, radiation leaks, impacts to the Ocean are only going to get worse with time. Remember what happened with San Onofre. Trust in your energy plan development with renewables, only strengthened with the Congressional bill. Honor the agreement.
