## **Keep Diablo running**

I'm familiar with public energy policy and modeling and have advocated for the continued use of safe, clean, and reliable nuclear power for years. This plant was used as a political pawn and there is no sound technical or economic reason to discontinue operations. Diablo has a stellar operational history, a unique and protected location, and provides jobs, power, and economic stability to our region. As members of the Energy Commission, it is incumbent upon you to do what is best for our environment and Diablo provides clean, carbon free power at a very low cost without additional new infrastructure.
