Nuclear energy is the bridge to our future

Ladies and gentlemen, please take a realistic view of the energy needs of California. Technology has not progressed as much as we have hoped. Battery storage is not a viable option yet. Building wind turbines in the migration path of sea birds is not a solution. The lakes that power our hydro dams are at historic lows and will take years to refill. Diablo Canyon Power Plant is built. It is running. It is providing 24/7 clean energy today as it has for the past 37 years. Safely! There are no perfect energy sources. But a safe running nuclear plant is a bridge to our future. Please keep Diablo Canyon running.
Thank you!
